No. 3,684.

From

E. THOMPSON, Esq., M.A.,
Acting Director of Public Instruction,
Madras,

To

C. G. MASTER, Esq.,
Acting Chief Secretary to Government,
Fort St. George.

SIR,

I HAVE the honor to submit the Report on Public Instruction for the year 1877-78.

Director.

2. The Department was administered by Colonel Macdonald for the whole of the year under review with the exception of about two months (from the 11th May to the 9th July), when in consequence of Colonel Macdonald's proceeding to Simla as a Member of the School Book Committee, the duties of his office were entrusted to Mr. J. Sturrock, Under Secretary to Government. During the year Colonel Macdonald made two short tours, one to Bellary and Cuddapah in February, and the other to Cuddalore and its neighbourhood in the following month. It is unfortunate, as remarked by Colonel Macdonald in paragraph 5 of his report for 1875-76, that such tours are not more frequent and more prolonged, but in the present state of things it seems all but impossible for the Director to be absent from Headquarters either often or for any length of time. Colonel Macdonald having obtained three months' privilege leave from the 24th July and proceeded to Europe, the duty of compiling the Annual Report has once more fallen upon me.

I.—INSPECTING AGENCY.

Changes of Inspectors' Divisions.

3. The changes alluded to in paragraph 3 of last year's report were carried out in June and July 1877. By these arrangements the Kistna District was transferred from the 1st Division to the 2nd, the Nellore District from the 2nd Division to the 3rd, South Arcot from the 3rd to the 4th, Tanjore from the 4th Division to the 5th, and Coimbatore from the 5th Division to the 6th. It was considered that under the old system the Inspector of the 1st Division had too extensive a charge, while the 6th Division

was comparatively limited in area: by the present arrangement the Inspectoral charges are made as nearly equal as circumstances will admit.

Changes among the Inspectors.

4. The Inspectors of the 2nd and 6th Divisions, Messrs. Fortey and Garthwaite, remained at their respective posts throughout the year, but in all the other Divisions changes took place. At the beginning of the year Mr. Kershaw was in joint charge of the 4th and 5th Divisions, but on the 28th April he reverted to his permanent appointment as Inspector of the 1st Division, relieving Mr. Metcalfe; in the 3rd Division, Mr. George Duncan was appointed to act for Mr. Fowler who went on leave to Europe early in May; and the 4th and 5th Divisions on Mr. Kershaw leaving them were entrusted to Messrs. James Bradshaw and Bickle, respectively. Finally, in the month of November, Dr. John Bradshaw returning from England relieved Mr. James Bradshaw of his charge of the 4th Division.

Deputy Inspectors.

5. In October 1876 Government were pleased to sanction the appointment, as an experiment, of a Mahomedan Deputy Inspector, whose duty was to be the inspection of Hindustani schools in whatever Division they might be situated. This appointment was on the 12th April 1877 conferred upon Mahommed Ruzza, who has shown both energy and discretion in the discharge of his duties. In recognition of his services his appointment was declared permanent by G.O., 25th April 1878. As far as numbers are concerned there are no other changes to be recorded among the Deputy Inspectors, but I regret to be obliged to state that a Deputy Inspector once before dismissed, but reinstated by Government after a Magisterial investigation, has had to be dismissed again for irregularities in the examination of certain schools and for making false entries in his diaries. One Deputy Inspector (Kurnool) died in July, while another (Chetterpore) resigned in May 1877.

6. The number of Inspecting Schoolmasters has risen from 137 to 149. The great majority of these officers are under the Local Fund Boards, but twelve of them are maintained by the Municipalities of Madras, Nellore, Trichinopoly, Tanjore, Negapatam, Coimbatore, Calicut, Palghat, Cochin and Mangalore, and one, the Inspecting Schoolmaster of the Bhadrachalam and Rekapalli Taluqs in the Godavari District, is paid from Provincial Funds.

Inspecting Schoolmasters.

On this class of officers and on the means of improving them, the late Mr. Kershaw, by whose recent death the Department has sustained so severe a loss, makes the following remarks:—

"My own opinion of this class of officer is that it supplies a very important need; and if the men are honest, zealous, and judicious they do very good work. I am not so well satisfied with the work of the Inspecting Schoolmasters of this Division as with that of the Deputy Inspectors. They are an inferior grade of men both in position and attainments, the 5th Grade men being no better than many of the Schoolmasters they are supposed to supervise, advise, and instruct: in time I hope to see this class of officer composed entirely of Matriculates. Many of these men are personally unknown to me and others I have but the slightest knowledge of, perhaps have seen them once for a few minutes when we both happened to be at the same station. Many of them have little or no method in their work, and much of their work is of an inferior character.

"In order to become better acquainted with these men, and to put them into a better system of working so that they may run more in parallel lines with myself and my Deputies, and to correct their deficiencies, I have proposed to the several Presidents of Local Fund Boards of this Division that they should give me authority to collect the Inspecting Schoolmasters of each circle at some central place in that circle, so that during the current year's tour the Deputies and myself may spend a couple of days with these men in teaching, in training, and in otherwise fitting them to work more in accord with us. I shall thus become better acquainted with this class of agents. If I find the plan answers the purpose which I anticipate, I would assemble them in this way for a couple of days every year during my tour through each circle."

From the comparatively backward state of education in the 1st Division it is likely that the Inspecting Schoolmasters there are men of somewhat lower attainments than the corresponding class in the other or at least in the Southern Divisions, but even the best of them would probably be the better for some such system of training and supervision as Mr. Kershaw has suggested but has not lived to carry out.

II.—University.

Changes in Bye-laws.

7. Section XII of the Act of Incorporation provides that, except by special order of the Senate, no person shall be admitted as a candidate for any degree unless he produces a certificate that he has completed the prescribed course of instruction from an institution authorized in that behalf by the Governor of Fort St. George in Council. For twenty years this section has been practically a dead letter; the grace of the Senate on the day of Convocation authorizing admission to degrees has been held to be a sufficient compliance with its requirements, and private students in any numbers and without any special permission have been allowed to present themselves for examination. For many reasons this was felt to be an unsatisfactory state of things, and after some years of discussion and consideration the law and the practice of the University were brought into harmony by G.O., No. 225, of the 24th May 1877. Private students are not entirely excluded from the higher University Examinations, but under the revised Bye-laws 49 and 64 any student of this description before presenting himself for examination must obtain the

express sanction of the Syndicate. By the same order of Government the following rules of affiliation were approved and are now in force :—

Rules of Affiliation.

1. Institutions or Departments of Institutions may be affiliated to the University of Madras in Arts, Law, Medicine, and Civil Engineering.

2. The power of affiliating rests, subject to the sanction of the Governor of Fort St. George in Council, with the Syndicate, to whom all applications for affiliation must be addressed through the Registrar.

3. In the case of a Government Institution, application must be made by the Director of Public Instruction or other Chief Educational Officer of the Province in which it is situated ; in the case of any other institution, by the Principal or other responsible authority.

4. Every application must be countersigned by two members of the Senate.

5. The application must contain—

(*a*) A statement showing the present staff of teachers and the course of study in the faculty in which affiliation is desired.

(*b*) A declaration that the institution has the means of educating up to the standard under which it desires to be affiliated.

(*c*) Satisfactory assurance of there being a fair prospect that the institution will be maintained on the proposed footing for five years.

6. The Syndicate will, once in three years, revise the list of affiliated institutions ; and, in the event of an institution changing its course of instruction or ceasing to possess the means of educating up to the prescribed standard, the Syndicate may, with the sanction of the Governor of Fort St. George in Council, withdraw the privilege of affiliation from such institution.

The following is a list of institutions affiliated to the University in the various faculties, and invested with the power of granting the required certificates :—

IN ARTS.

First Arts.

1. Church Missionary Society's English Institution, Palamcottah.
2. High School, Coimbatore.
3. Do. Ernakulum.
4. Do. Shimoga.
5. Do. Vizianagram.
6. Maharajah's High School, Mysore.
7. Noble High School, Masulipatam.
8. Provincial School, Bellary.
9. Do. Calicut.
10. Do. Mangalore.
11. Society for the Propagation of the Gospel's High School, Tanjore.
12. Do. do. do. Trichinopoly.
13. Do. do. Seminary, Madras.

Bachelor of Arts.

1. Bishop Cotton's Schools and College, Bangalore.
2. Central College, Bangalore.

3. Doveton Protestant College, Madras.
4. Free Church Institution and Madras Christian College, Madras.
5. His Highness the Maharajah's College, Trevandrum.
6. Presidency College, Madras.
7. Provincial College, Combaconum.
8. Do. Rajahmundry.
9. St. Joseph's College, Negapatam.

IN LAW.

1. His Highness the Maharajah's College, Trevandrum.
2. Presidency College, Madras.

IN MEDICINE.

1. Medical College, Madras.

IN CIVIL ENGINEERING.

1. Civil Engineering College, Madras.
2. School of Engineering and Natural Science, Bangalore.

The revised Bye-laws just noticed do not deal with the case of students who, having produced the required certificates for a certain examination and having failed to pass, present themselves at the next or any subsequent examination. A recent ruling of the Calcutta Senate makes it necessary for such students to produce a further certificate of six months' attendance in a recognized institution subsequent to failure, and it may be worth while for the Madras Senate to consider the propriety of adopting a similar rule in our own University. In conclusion, I may allude to a collateral advantage likely to be secured by the adoption of these bye-laws. As attendance at an affiliated institution for eighteen months previous to registration is now required, and as that registration must take place on or before the 1st October for the First Examination in Arts, and on or before the 1st November for the B. A. Degree, it is clear that students who ordinarily begin their College course in the month of February have not much time to lose: they cannot therefore, as has not unfrequently been the case in former years, absent themselves from College for lengthened periods without running the risk of losing their certificates and with them the privilege of presenting themselves for examination. In this way therefore it is probable that greater regularity of attendance will be enforced, and as a natural consequence greater proficiency attained.

The only other alteration in the bye-laws is the substitution of the word "Urdu" for "Hindustani" in Bye-laws 37, 52, and 67. This alteration was passed by the Senate on the 21st April and received the required sanction of the Governor in Council on the 24th May.

Results of the University Examinations from 1857 to 1878.

8. The results of the University Examinations from their establishment to the close of the last official year are given in the annexed table:—

Years.	Matriculation.			First Arts Examination.			Bachelor of Arts Examination.			Bachelor of Civil Engineering Examination.			Bachelor of Laws Examination.			Remarks.
	Number of Candidates examined.	Passed		Number of Candidates examined.	Passed		Number of Candidates examined.	Passed.		Number of Candidates examined.	Passed		Number of Candidates examined.	Passed.		
		From Government Institutions.	From Private Institutions.		From Government Institutions.	From Private Institutions.		From Government Institutions.	From Private Institutions.		From Government Institutions.	From Private Institutions.		From Government Institutions.	From Private Institutions	
1857-58 { September 1857.	41	30	6	No examination.			No examination.			No examination.			No examination.			Besides the results entered in this table, three candidates obtained the degree of Doctor of Medicine—one in 1858-59, another in 1870-71, and a third in 1872-73. Two candidates passed in 1868-69, one in 1872-73, and three in 1873-74 for the degree of Bachelor of Medicine and Master of Surgery; also one secured a license in Medicine and Surgery in 1867-68. Two candidates passed in 1874, three in 1875, two in 1876, and six in 1877 for the Preliminary Scientific Examination in Medicine. One passed the first M.B. and C.M. Examination in 1876, and one in 1877. One candidate passed in the first L.M.S. Examination in 1877.

The degree of Master of Arts was obtained by one candidate in 1869, by five in 1870, by one in each of the years 1872, 1873, 1874, 1875, 1876, and by three in 1877. All the candidates, save six, were ex-students of the Presidency College. Of the six exceptions, one was a Bachelor of Arts of the University of Bombay, one was a private student, and the others were ex-students of the Combaconum Provincial College, Sullivan's Gardens Seminary, Trevandrum College, and the Free Church Mission Institution.
Total ...	21,699	3,725	4,237	4,698	1,077	765	1,097	402	183	41	19	...	284	58	67	The degree of Master of Laws has been conferred on four candidates—one in 1870, one in 1871, one in 1874, and one in 1878.

N.B.—The figures under 'Government Institutions' include also students passed from institutions other than those under the Madras Government.

9. It will be seen from the table in the margin that for the first time for several years the number of candidates for Matriculation has not increased. This may be in part owing to the effects of the late famine, but it is much more due to the exceptional number of successful candidates in December 1876 and the consequent decrease in the number of men presenting themselves again after previous failure. The number passed this year is less by one-third than the number passed in 1876, but as the results of that year certainly failed to prove any real progress, so the falling off this year cannot be taken as proof of any real decline. Compared with those of 1875, the results of 1877 show an advance both absolutely and relatively, and give no cause for the fear that our pre-collegiate training is less efficient than heretofore. This sort of slight, but steady, advance is what is to be hoped for, and even expected, as education gets more and more diffused throughout the country; but speaking from long experience as a College Teacher, I strongly deprecate the slightest lowering of the Matriculation standard, for even in past years it has far more often occurred to me to be sorry that so many have passed than to regret that some have failed. I am glad therefore to be able to show by reference to the table in the margin that the undue leniency of the examination of 1876 has not been repeated, but that there has been a return to something like the standard of former years. Of the optional languages, Latin among the classical, and Malayalam among the vernacular, languages show the highest percentage of failures, but the variations are not so great as to call for further remark.

Female Students.

10. An interesting feature of this year's Matriculation list is that it contains for the first time in the history of the University the name of a female student, Miss Edith Annette Gow, from Bishop Cotton's School, Bangalore, who obtained a place in the First Class. I do not know if any female candidates have already passed at either of the other Indian Universities, but a recent *Gazette of India* contains rules sanctioned by the Governor-General in Council for the admission of females to the examinations of the University

of Calcutta. The examinations there will in the main be the same for females as for males, but in the higher examinations a female student may substitute French, German, Italian, or an Indian vernacular for the second language, which is always a classical language in Calcutta, and Botany or Political Economy for some portion of the otherwise compulsory Mathematics. If Miss Gow continues her studies, or if she has any successors in future years, the Madras Senate might in this case also discuss with advantage the precedent afforded by Calcutta.

11. The following list shows the number of institutions which succeeded in passing pupils for this examination during the last two years. Its arrangement differs in one respect from that adopted in former reports. Hitherto there have been only two heads, viz., "Madras Government Institutions" and "Other Institutions". In the present list I have grouped the schools under three heads, and totalled the results of the two kinds of Government Institutions. This arrangement seemed preferable as bringing out more clearly the results obtained on the one hand by the Government and purely secular institutions, whether of Madras, Mysore, Travancore or Cochin, and the results obtained on the other by schools under private management, aided or unaided, secular or sectarian. The private students, so numerous last year, have greatly diminished in number though they have not fallen quite to the low level of 1875.

12. The number of candidates for the First Examination in Arts shows a very considerable advance upon the previous year. This is in striking contrast to the decrease among the Matriculation candidates, but the nature of the examination of 1876 is the cause of both. As the Matriculation Examination of that year was exceptionally lenient, so the First Arts Examination, at least in English, the only absolutely essential subject, was exceptionally severe, and the large number of candidates who failed served to swell the list for December 1877.

The most striking feature in the annexed table is, in addition to the improvement in English already referred to, the serious falling off in Trigonometry and Physiology as compared with 1876-77. It must however be borne in mind that Physiology was first introduced into this examination in the former year, and that probably the Examiner thought it his duty to be lenient on that account; the cause for the failure in Trigonometry is not perhaps quite so obvious, but I believe that it may be traced to a growing tendency among students who have no particular fancy for Mathematics to neglect the study of Trigonometry altogether as it is not positively essential that they should pass in it. This probable effect of the proviso in Bye-laws 60 and 74 was foreseen when they were passed some years ago; but it was thought that if a student gave less of his time to a distasteful subject he would give more to those subjects in which he was likely to do well, and so though failing perhaps in one branch of the examination be likely to prove a better man than one who had just managed to get up enough of each subject to secure the prescribed minimum.

Obtaining one-third marks on the whole.	...	2

The following list, drawn up on the same principle as the corresponding one for the Matriculation Examination, shows the success which has attended individual colleges and schools. It will be observed that, excluding private students, in this examination the institutions under the Madras Government have passed more candidates than all the other

institutions put together, and the same thing only more clearly marked will be seen in the results for the B.A. Degree. In the Matriculation Examination however private institutions have a clear majority over Government institutions of both classes combined :—

13. The general results of the B.A. Examination are shown in the annexed table. Though there was a considerable increase in the number of candidates, the number passed fell short of the previous year's outturn by about 25 per cent. This unfavorable result is due partly to the exceptional number of failures in History and pure Mathematics, but more directly to the sudden change of standard adopted by one of the English Examiners. English History seldom receives from our students the attention it deserves, and on this occasion the neglect was severely punished. With regard to Mathematics I may observe that the papers were generally considered to be above the average in difficulty, but this fact alone would not account for the failures increasing more than 100 per cent. The real cause is, I believe, the same as produced the disasters in Trigonometry in the F.A. Examination, but it is some consolation to know that we are not likely to have a recurrence of the misfortune, as in future years candidates who take up Physical Science or Logic and Moral Philosophy for their optional subject will not have to pass in pure Mathematics.

14. Before proceeding to notice the remaining University Examinations, which are all of a more special nature, I wish to call attention to some remarks made by an Examiner who has regularly taken part in our examinations for the last six years on some besetting sins of the students.

"There is no doubt," says Captain Hallett, "that diffuseness is a besetting sin among University candidates—a sin that requires checking. The lads write on and on without thinking what they write * * *. There are two other very prevalent faults which seem to require notice, viz., carelessness and slovenliness. These are closely akin to diffuseness, being with it bred of impatience * * *. First as to carelessness. The candidate is in so great a hurry to answer that he does not wait to see what he has to answer. He cannot spare time to read and appreciate the question. The consequence is he answers a part of it only, or does not answer it at all, but supplies instead two or three pages of more or less valuable information which the Examiner has not asked for * * *. Let me give an example of this carelessness. At the late F.A. Examination I wished to see if candidates possessed the very necessary power of *describing* in simple and concise language something with which they were familiar. I chose an easy subject, any out-door game they happened to know. I also asked that this game might be criticized as a test of skill and as a means of exercise. At least one-third of the candidates made no attempt whatever to describe a game, but favored me instead with physiological common places on the benefit of exercise generally. They were asked for a homely letter. They produced a quasi-scientific essay. Some few selected cards and chess. In both cases it was evident that the question was not read carefully * * *. Turning now to slovenliness, it will be found that a very large proportion of answer books

abound in smudges and erasures—smudges because the writers do not stop to blot the sheets; erasures because they write the first word or expression that crosses the mind without pausing to consider its suitability, and as a necessary consequence have to alter and re-alter. In fact these answer books are practically rough drafts and are quite unfit for submission to an Examiner * * *

"Seeing that graduates in this country are almost without exception lads having their way to make in the world, the question naturally arises whether any amount of book learning will compensate for the total want of order, cleanliness, and neatness here exhibited. It seems to me that a minimum of these desirable qualities should be insisted on."

M.A. Examination.

15. The M.A. Examination this year was a total failure. Four candidates were registered for this examination, and three were examined, but none passed. Two failed in Branch V, Mental Philosophy and Sociology, and the third in Branch I, Language (English and Sanskrit).

16. Twenty graduates were examined for the degree of B.L. and ten passed—nine from the Presidency College and one from the Maharajah's College, Trevandrum, the first candidate who has passed from that institution since its Law Lectures were recognized by the Syndicate under Bye-law 95. S. Devaraja Aiyar, B.L., obtained the higher degree of M.L. on this occasion, and was the only candidate who appeared for it.

The only marked failure is in the Latin of the Matriculation and First Arts Examinations; in the B.A. Degree this language shows an improvement upon the two preceding years. Among the vernaculars, Malayalam and Canarese show low percentages of success in the Matriculation Examination; in the two higher examinations these languages reach nearly the same high percentage as the other vernaculars.

Classes of the Community represented at the University Examinations.

20. The following table shows the extent to which the several classes of the community are represented among the successful candidates in Arts for the last two years. In the Matriculation Examination all classes naturally show a falling off, the total number being so low as compared with that of the previous year, but the difference is most marked among the Mahomedans, and next to them among the East Indians. In the First Arts on the other hand, the total having advanced, we find considerable progress in the case of Brahmins, Hindus not Brahmins, and East Indians; while there is a slight falling off among Native Christians, and Europeans fall from 5 to 1. This last element is however always small and specially liable to fluctuation on that account. The Mahomedan element remains stationary with a single representative :—

Classes of Community.	Matriculation.		First Arts.		B.A. Degree.

Europeans	32	23	5	1	1	...
Total ...	1,250	807	131	191	70	52

Ages of Candidates.

21. The subjoined table, showing the ages of candidates for the three leading examinations in Arts, will not be without interest. If the evidence of only two consecutive years can be trusted, it appears that there is a slight tendency in the average age to increase, the only exception being the average age of passed Bachelors of Arts. It will also be observed that only in one instance (Matriculation, 1876-77) has the oldest candidate succeeded in passing. In every case also it appears that the average age of the men who passed is lower than that of the candidates registered.

Statement showing the Ages of Candidates for the Matriculation, F.A., and B.A. Examinations during 1876-77 *and* 1877-78.

22. The following table is drawn up in a form prescribed by the Government of India. It contains some particulars not to be found or not so clearly stated in the preceding tables, but it will be observed that some of the heads are not applicable to this University. In this connection I may observe that the graduate who took the degree of M.L. this year is entered under the head "Doctor of Law."

Cost of the University.

23. The following statement shows the net cost of the University for the year 1877-78. The balance against the University in 1876-77 was Rupees 11,535, while this year it has fallen to Rupees 3,838. For 1878-79 the estimated cost to Government is Rupees 1,832, but I believe there is every reason to expect that this small deficit will disappear, and that the University will be more than self-supporting :—

III.—Arts Colleges.

Presidency College.
7 Professors.
1 Assistant Professor.
6 English Masters.
9 Moonshees.

24. The Presidency College was under the care of Mr. Porter from the beginning of the official year to the 29th of December, when I relieved him on my return from furlough. Mr. S. Seshayya, Assistant Professor, being appointed to act as Head Master of the Provincial School at Calicut, was succeeded by Mr. C. Nagoji Row, whose place in the Junior Department was taken by Mr. A. Ganapati Aiyar of the Agricultural College. The only other changes in the staff were caused by the deaths of the Persian and Malayalam Moonshees, both zealous and efficient teachers whose loss is much to be deplored.

The following statement shows the strength of the different departments at the close of the last three years, the number of students who went up for the University Examinations, and the result of each examination :—

Years.	31st March.			Examined.			Passed.						
							Matriculation.		F. A.		B. A.		
	College.	Upper School.	Middle School.	Matriculation.	F. A.	B. A.	First Class.	Second Class.	First Class.	Second Class.	First Class.	Second Class.	Third Class.
1875-76 ...	165	144	77	46	32	24	4	25	7	14	1	13	5
1876-77 ...	154	142	72	58	38	35	7	40	7	13	...	15	15
1877-78 ...	196	140	65	60	29	39	2	30	4	15	1	7	13

In reviewing the Principal's report, Colonel Macdonald remarks as follows :—

"This report on the Presidency College is on the whole eminently satisfactory. Notwithstanding the increase in the scale of fees, there has been an unprecedented advance in the strength of the College, and the small falling off in the Junior Department is probably sufficiently accounted for, not only by the famine and by the new rates of fees, but by the fact that the Balura Pátasala and another English school in Triplicane have raised their standard and have commenced sending in pupils to the Matriculation Examination.

"The success of the institution in the University Examinations is remarkable. In the Matriculation Examination the Presidency College is surpassed only by the Provincial College of Combaconum. In the First Arts Examination it stands below the Combaconum and Christian Colleges as regards the number of passed Candidates, but much above them as regards the proportion of pupils passed to those examined, while in the B.A. Examination, besides the excellent quality of the results, the number passed is equal to the total number passed by the Christian, Combaconum, and Doveton Colleges put together."

The table in the margin shows the various districts from which the students of the College Department have come during the last three years. Three Collectorates unrepresented last year have this time sent up pupils, and the only district now without a representative is Ganjam. This is probably owing to the establishment of a Provincial College at Rajahmundry.

Districts.	1875-76.	1876-77.	1877-78.

The laboratory was completed in September and is now fitted with all the requisite appliances except gas, a want which will probably be supplied before long. The completion of the laboratory has not been followed by any increase in the number of students taking up Physical Science as the optional subject for the B.A. Degree, the predilection for Logic and Moral Philosophy being apparently as strong as ever.

A prize of the annual value of Rupees 60 has been founded in the name of Mr. Justice Innes in accordance with the tenor of the will of the late T. Kuppuswami Aiyar, a leading Vakeel in the District Court of Tanjore.

Provincial College, Combaconum.
1 Principal.
3 Assistants.
6 English Masters.
4 Pundits.

25. The Provincial College at Combaconum was for the first nine months of the official year presided over by Mr. Gopal Rau, Mr. Porter resuming charge of it early in January. This College is now the largest in Southern India and contained on the 31st of March as many as 245 under-graduates. It appears from the Principal's report that in the First Arts Classes at least the only limit to their size is the amount of accommodation available, many candidates for admission having to be rejected for want of room. At the date of the report each of these classes had more than 100 students. The Bachelor of Arts Classes are of more manageable size, a great advantage both to teachers and pupils. Though only moderately successful in the B.A. Degree Examination, this College as usual distanced all competitors in the two lower University contests: in the Matriculation Examination 73 passed out of 92 sent up, and of these no less than 23 were in the First Class. The Junior Department of the College was kept up during the year in its usual state of efficiency, the standard of each class being considerably higher than it is in the corresponding classes anywhere else. Of the 245 students in the College, all but 47 belong to the district of Tanjore; of the 47, Madura sends 16, South Arcot 11, Trichinopoly 10, Coimbatore 7, and Tinnevelly 3. In this College also the introduction of the higher rates of fees has had no adverse effect upon the attendance; on the contrary, both the College and School Departments have received a larger accession of strength than usual; and Mr. Porter calculates that, if the attendance does not fall off, the receipts from school fees will amount to Rupees 20,000 in the year 1878-79, and that in any case they will not fall below Rupees 18,500.

Provincial College, Rajahmundry.

26. The proposed conversion of the Provincial School at Rajahmundry into a College and the establishment of a tentative Junior B.A. Class were noticed in last year's report. The measure received the sanction of Government on the 19th November last, and four college classes—the full number—are now at work. The salaries to be paid to the Principal and his First Assistant were fixed by the same order at Rupees 700, rising to Rupees 800 and Rupees 500, respectively, and the requisite sanction of the Government of India and of the Secretary of State has recently been received. The establishment of this College has given a great stimulus

to education in the Northern Circars, and Mr. Metcalfe notices with natural satisfaction the difference between the difficulty he had in 1873 in getting together a small First Arts Class and the alacrity now shown by students in joining the degree classes. Owing to the continued absence of Mr. Metcalfe, first as Acting Inspector of Schools, First Division, and afterwards for six months on sick leave to England, the College was during the working year 1877 almost wholly in the charge of Mr. Bilderbeck, and it is to his exertions and to those of his Assistants, of whom Mr. Kenny from Berhampore Zillah School was one, that the success of the institution in the University Examinations is mainly due. In the First Arts Examination 16 were successful out of 26, and out of a class of 35 pupils, 20 matriculated, of whom two were placed in the First Class.

The College buildings have been enlarged and improved during the year under review, and scholarships for students in the B.A. Classes founded by the Rajah of Pithapuram and the Zemindar of Parla Kimedi. In awarding the Parla Kimedi Scholarships preference is to be given to students from Ganjam.

Of the 66 students in the College Department 42 belong to the Godavari District, 12 come from Vizagapatam, 10 from Ganjam, and 2 from Kistna.

27. The increase in the number of students attending the Government Arts Colleges during the last few years is very striking, but it is by no means an unmixed good. When I first became Principal of the Presidency College the whole College numbered 42 students; now there is not a single class in the institution that does not exceed that number. It is obvious that when our classes were small (the senior class seldom had more than seven or eight pupils at the time to which I refer), an amount of individual attention could be given to each student which is now hopeless. This is especially true in the case of English composition which has to be treated in a much more summary manner than in old days, and it cannot be expected that our present and future College students will as a body compose as accurately as their predecessors. I have already noticed the unwieldy size of the First Arts Classes at Combaconum. On this subject Mr. Porter writes as follows :—

"Classes of this size will no doubt necessitate some change in the style of teaching. When it becomes necessary from the size of a class to speak above

a conversational tone, it is necessary to study brevity and terseness which again involves more careful preparation, and probably the teaching will tend to become more and more like the carefully-prepared lecture of a Professor in a Scotch University. On the other hand it will tend to assimilate itself to the Scottish system in another point not perhaps so desirable, that is, as written examinations cannot be given so frequently as before, the students must be left much more to themselves as regards their own preparation and study. Already I have had to diminish the amount of composition in the F.A. Classes by one-half and give it only once a fortnight instead of once a week. Any one accustomed to correcting composition papers will see that even this is a very severe tax on the time and energy of a teacher."

With these remarks I entirely concur, but I am afraid that little or nothing can be done in present circumstances to mitigate the evil. With the increase of our College classes, however, there should be a corresponding increase in the strength of the instructive staff, and something might be done in this direction without increasing the cost to Government. If, for instance, it were ruled that for every 50 students above 200 an additional Assistant Professor should be employed, this Assistant might have a salary of Rupees 250 at the Presidency College and of Rupees 200 at Combaconum, the whole additional cost being defrayed by the fees of the 50 students in question.

Free Church Institution and Madras Christian College.

28. The Madras Christian College has been throughout the official year in the charge of the Rev. G. Milne Rae, Mr. Miller's health not having been sufficiently restored to enable him to return when he intended. It appears from the report of the College Council that the Rev. G. Patterson now devotes the whole, instead of a part, of his time to teaching as a Professor; that the Rev. R. N. Macdonald, whose appointment was noticed in the last report, has been recalled for conference with the Home Committee; and that another Professor was expected in his place. This gentleman, the Rev. Alex. Alexander, has since arrived. A slight falling off will be observed in the number of students attending the College Department, and the institution is no longer the largest College in Southern India, but it is only surpassed in this respect by the Provincial College, Combaconum, and its success in the University Examinations was considerable as shown in the following table:—

Years.	31st March.				Examined.			Passed.						
								Matriculation.		F. A.		B. A.		
	College.	Upper School.	Middle School.	Lower School.	Matriculation.	F. A.	B. A.	First Class.	Second Class.	First Class.	Second Class.	First Class.	Second Class.	Third Class.

1877-78	233	190	377	280	82	71	31	2	30	3	26	..	.	11

The School Department was not inspected during the year under review.

Doveton Protestant College.

29. The Doveton College was unfavorably mentioned in last year's report, and, as far as statistics are concerned, a better account can hardly be given this year. There has been an increase of ten pupils in the College, Upper and Middle Departments, but this is counterbalanced by a decrease of fifteen in the Lower School. It is however to be hoped that the exertions of the new Principal, Mr. J. Cook, M.A., who arrived in November last, will speedily bring about a change for the better. The Acting Inspector proposed to visit the institution last November, but at the request of the Secretary deferred his visit to the current year, when the various reforms initiated by Mr. Cook may be supposed to have had some effect :—

Years.	31st March.				Examined.			Passed.						
								Matriculation.		F. A.		B. A.		
	College.	Upper School.	Middle School.	Lower School.	Matriculation.	F. A.	B. A.	First Class.	Second Class.	First Class.	Second Class.	First Class.	Second Class	Third Class.

Sullivan's Gardens Seminary.

30. The re-organization of Sullivan's Gardens Seminary being under consideration, new students have not been admitted since January, and the numbers, never large, are therefore smaller than usual. There are only five Matriculation students now on the rolls. On this institution Mr. G. Duncan writes :—

Class.	Number on Rolls.		
	1875-76.	1876-77.	1877-78.
B. A. Class	...	1	1
Preparatory B. A. Class.	...	2	2
F. A. Class	...	3	2
Preparatory F. A. Class.	...	6	...
Matriculation Class ...	15	5	5
Total ...	15	17	10

"The only grant received by this Seminary from Government is one of Rupees 40 per mensem on account of the First Assistant Master. If this grant could be transferred to some other of the Society's Educational Institutions, the Seminary which has been for some years past only nominally subject to Government inspection might be altogether withdrawn from it."

31. The Gospel Society's School at Tanjore has for the last year or two been ranked as a College, but in October 1877, on the resignation of

Mr. Marsh, under whose care it won and maintained its reputation, the B.A. Classes were given up, and the institution will therefore resume its place among Collegiate Schools.

IV.—Collegiate Schools.

General Comparison of Collegiate Schools.

32. The number of Collegiate Schools has risen from eight to ten; the Tanjore High School has, as stated above, ceased to be a College, while the Church Missionary Society's High School, Palamcottah, has opened First Arts Classes, and been affiliated to the University up to the First Arts standard. The total strength of these institutions on the 31st March shows a slight decline in the College classes and a considerable one in the Lower School classes, but this decline is more than counterbalanced by the advance of the Upper and Middle School classes, so that on the whole there is an increase of 126 pupils. Bearing in mind what has already been said with regard to the Matriculation and First Arts Examinations of 1876 and 1877, it will not be surprising to find that these schools have only passed 164 pupils for Matriculation against 248 of the previous year, but that 42 have succeeded in the First Arts Examination against 24 of December 1876. The former in fact is no evidence of decline and the latter is no evidence of progress:—

Provincial School, Bellary.

33. The Provincial School at Bellary has been unfavorably reported upon for some years. Established early in 1855 with the late Mr. Kershaw as Head Master it rapidly obtained, and for many years kept up, a highly respectable position among institutions of its class, but almost from the date of Mr. Kershaw's promotion to an Inspectorship it began to decline, and its present condition is deplorable. The main causes of this decline appear to be the rivalry of the London Mission School or Wardlaw Institution and the constant changes in the Head Mastership. On Mr. Kershaw's departure, Mr. Ranganada Mudaliyar was appointed Head Master, but he was frequently away from Bellary acting for lengthened intervals as Professor at the Presidency College, and in the early part of this year he was permanently transferred to Combaconum College. During 1877 the school was conducted by Mr. J. R. Thomas, B.A., Head Master of the Brennen Zillah School at Tellicherry, and he appears to be responsible in no small degree for the disgraceful results of the past year. These results are described by the Inspector, Mr. Fortey, in the following terms :—

"I am sorry to say that the condition of this important school which was unsatisfactory at the beginning of the year was much more so at its close. There was, it is true, a slight increase in the attendance, but this was due entirely to accessions in the Middle School, the attendance in the Collegiate classes having fallen from 15 to 8 and in the Upper School from 44 to 30. The results of all the examinations to which the pupils were subjected, whether University or Departmental, written or oral, were more or less unsatisfactory, and in some cases very discreditable. Thus of 20 boys who were candidates for Matriculation, only 3 passed, and of 5 who appeared at the F.A. Examination *none* passed. Again, in my competitive examination of 5th Classes in the Higher Class Schools of the Division, the 5th Class of this school ranked 6th out of 7 schools examined, and in a similar examination instituted by the Director for Upper 4th Classes, that class in this school ranked 13th of 21 schools examined. I was obliged also to report unfavorably on the lower classes which I examined *viva voce*. It is clear therefore that throughout the school the classes fell very far short of the standards they should have reached.

"In justice to the Assistant Masters, I am compelled to add that the greater part of the responsibility for this failure rests, in my opinion, on the late Acting Head Master."

This school was visited by Colonel Macdonald in the early part of this year, his tour in the Ceded Districts having been mainly occasioned by the very unfavorable reports he received of it; and in Proceedings issued soon after his return, he states that a personal visit to the school had confirmed the unfavorable impressions which he had derived from Mr. Fortey's letters and the published results of the University Examinations. The whole tenor of these Proceedings shows that the Director agreed with Mr. Fortey in fixing the responsibility for these grievous shortcomings on the Acting Head Master. The Head Mastership has not yet been permanently filled up, but Mr. Burroughs, Head Master of the Zillah School at Chittur has now had charge of the school for some months, and it may be hoped that the work done during the current year will show better results, and that some measure of its former prosperity will return to the school.

Provincial School, Calicut.

34. The Provincial School at Calicut occupies the first place among the schools of its class. During the past year there has been an increase of 47 pupils well distributed among the three departments of which the school consists, and its success in the University examinations has been considerable. In the First Arts Examination the results could hardly be better. Out of the whole Presidency only thirteen succeeded in obtaining places in the First Class at that examination, and of these thirteen, three came from Calicut School and stood second, fourth, and fifth in order of merit. The Inspector's report of the lower classes discloses some defects which the Acting Head Master is now trying to remedy, but the report upon the whole is satisfactory, and both Mr. Garthwaite and Colonel Macdonald express their conviction that the general condition of the school is creditable to Mr. S. Seshayya who was in charge of it for nearly the whole official year.

Provincial School, Mangalore.

35. Numerically Mangalore is the strongest of the Provincial Schools, but its strength as compared with Calicut lies exclusively in the lowest of the three departments. It will be observed that Calicut has twice as many pupils in the Higher School as Mangalore, but that Mangalore has an equal superiority in the Middle School. Judged by the standard of University examinations, Mangalore has the advantage in the lower and Calicut in the higher. Mr. Burroughs was in charge of the school throughout 1877, and the general proficiency and discipline of the school are very creditable to him. Mr. Moss, the permanent Head Master, returned to his duty in February last and Mr. Burroughs was then posted to Bellary.

Noble High School, Masulipatam.

36. The increase in strength noticed in last year's report of the Noble High School has not been fully maintained during the year under review, but the falling off is only in the Middle and Lower Schools, the Upper School and College showing a small advance. This school has always made a very favorable impression upon the Inspectors. Last year Colonel Macdonald quoted at some length the opinion of Mr. Kershaw, and this year Mr. Fortey, to whose Division Kistna now belongs, writes as follows :—

"This is a valuable and well-conducted institution and has been for many years under the able management of the Rev. J. Sharp. The school-house is a handsome and commodious building and remarkably well found in all necessary apparatus and appliances."

The success of the school in the University examinations was moderate, and the 5th Class of it did not stand high in Mr. Fortey's comparative examination of Higher Class Schools in his Division. In the Inspector's opinion this institution has probably suffered from its proximity to the new College at Rajahmundry, and there can be little doubt that it does not now draw many students from the Godavari District, but it is clear that it still retains its hold upon the affections of Kistna students, as only two pupils from that district are to be found on the rolls of the Rajahmundry College.

37. The High School, Trichinopoly, is one of the very largest in the Presidency; even if the Lower School were removed which has been done for years in Government Schools of the same class, it would contain all but 700 pupils, nearly as many as the three Provincial Schools put together. Its great strength lies in the Middle Department, and as this is the most paying part of every school it is not wonderful that the Inspector should remark that the High School has been carried on with a profit to the Society. The success of the school in the First Arts Examination was very poor indeed, but at Matriculation it stood fifth in all the Presidency, being only surpassed by the Combaconum, Presidency, Madras Christian, and Trevandrum Colleges. The school was twice visited by Dr. Bradshaw, but not formally inspected either by him or by his predecessor. The great size of the Middle School renders a regular inspection a burdensome duty, and perhaps it can hardly be expected that the Inspector should find time for it every year. This school has been for some years conducted by Mr. Creighton, but in June 1877 on his departure for England Mr. C. W. Pearce, formerly at Vepery, was placed in charge of it.

S. P. G. High School, Trichinopoly.

38. The Gospel Society's High School at Tanjore was inspected by Mr. Bickle in July 1877 with very satisfactory results. This was before Mr. Marsh's retirement from the Principalship; at that time there were B.A. Classes, and one student succeeded in obtaining his degree at the last examination. As already stated these classes have since been abolished, and the school is only affiliated to the University up to the First Arts standard. Its success at last Matriculation was considerable, but the First Arts results were only moderate.

S. P. G. High School, Tanjore.

39. St. Joseph's College was inspected by Mr. Bickle in September last, and the Inspector's report is on the whole favorable, though the spelling and writing of some of the classes are pronounced inferior. The College Department has again increased in strength, but the three Divisions of the school have all suffered from the establishment in Negapatam of a Native High School.

St. Joseph's College, Negapatam.

40. Previous to its recent affiliation to the University, the C.M.S. High School, Palamcottah, was known as the "English Institution," and was ranked among Normal Schools. Mr. Bickle inspected the school last February, and the results were on the whole satisfactory. Five pupils passed the Matriculation Examination, and a First Arts Class has been formed, which contains nine students.

C. M. S. High School, Palamcottah.

41. The High School, Coimbatore, has slightly increased its numbers during the past year taking into consideration all the Departments of which it consists, but there is a decrease of 25 per cent. in the College classes. The report on the institution is not quite as good as usual, but something probably is due to the change of Inspectors. Mr. Garthwaite speaks very favorably of Mr. Flanagan, the Head Master, and considers that his Assistants generally are painstaking men.

High and Branch Schools, Coimbatore.

Vizianagram High School.

42. The Vizianagram High School, maintained by His Highness the Maharajah, has made a great advance in strength during the official year. In the comparative statement the Primary School is not included though it is quite as closely connected with the High School as the Branch School at Coimbatore is with its parent institution. The total number of pupils on the 31st March is given by Mr. Kershaw as 403, of whom 265 are in the High School. Much of the success of the school seems due to the energy of the Head Master. Mr. Kershaw says—

"The school has improved very much under the efficient and zealous conduct of Mr. Chandrasekharam, the Head Master; he is a hardworking man and more devoted to his school than Hindus generally are found to be. He evidently does not regard his school as a mere stepping stone to something else."

The school staff requires strengthening, and if the Rajahmundry College succeeds in passing a fair number of its pupils at the next B.A. Degree Examination it may not be difficult to replace some of the less efficient Teachers now employed by really competent men. In December next this school will send up its first batch of candidates for the First Examination in Arts.

V. Higher Class Schools.

Higher Class Schools, First Division.

43. Since the date to which the last year's report referred, the Kistna District has been transferred from the First to the Second Division. There is therefore a falling off in the number of Higher Class Schools, but if we consider only the three Collectorates, of which the First Division now consists, the number has risen from six to eight by the addition to the list of the Anglo-Vernacular School at Chicacole and the Onslow School, Chetterpore. Of these schools Mr. Kershaw remarks that "all are not developed to the same extent, three being at present in a struggling phase of existence," probably referring to the two schools just mentioned and the Central School, Narsapur. The total number of pupils has increased during the year by about 200, but it must be observed that half this increase is due to the Onslow School, which was closed during the year 1876-77. The number matriculated has fallen from 32 to 26, but in the circumstances alluded to more than once already this must be considered rather a favorable result than otherwise. The following table compares the attendance in these Institutions during the last two years, and shows the number of pupils who matriculated from each school:—

Institutions.	31st March 1877.				31st March 1878.				Examined.		Matriculated.

Zillah School, Berhampore.—"This school," says Mr. Kershaw, "stands well at the head of this class of institutions." Eight boys passed the Matriculation Examination, two of whom were placed in the First Class. Arrangements have been made for strengthening the teaching staff of the school, and at the beginning of next year a First Arts Class will be formed. This school acquitted itself creditably in the Departmental comparative examination of Upper Fourth Classes. It will be observed that the loss of strength noticed in last year's report has been almost entirely recovered.

Anglo-Vernacular School, Chicacole.—This school is treated as a Talak school in the Inspector's Report, but it has been recently raised to the status of a Zillah school, and will probably send up candidates to the Matriculation Examination of December 1879. Mr. Kershaw thus speaks of it:—

"The number on the rolls is limited by the small staff of Masters and the dimensions of the schoolhouse; otherwise I expect we could soon get up a school here of 200 boys. You will observe too the satisfactory proportion of the fees to the cost, the school paying two-thirds of its expenses. I hope to see the Chicacole school advance a step in standard before long. A large town like Chicacole needs a Higher Class School coming up to the Matriculation standard."

Onslow School, Chetterpore.—This school was reopened in July 1877, having been for some time in abeyance, and has now a Madras graduate for its Head Master. It was inspected in the following December with very poor results. The classes by no means reach the standard of Government school classes of the same description, and some time must elapse before this deficiency can be made up. A First Arts man has recently been appointed Second Master, and the prospects of the school may be considered brighter.

Hindu High School, Vizagapatam.—The strength of this school is the same as it was last year, but as the lowest class has been removed altogether this is really a proof of progress. There are now two graduates on the staff of the school, and on the understanding that a third graduate was to be engaged, the Syndicate recently recommended to Government that this school should be affiliated to the University up to the First Arts standard. The step is a bold one, and Mr. Kershaw expresses a fear that it is rather premature—a fear which I share to a great extent; for, unless a school is very much stronger than the Vizagapatam School is at present, adding higher classes almost always leads to unsoundness in the lower part of the school. Six boys out of twelve succeeded at the last Matriculation Examination, and one passed in the First Class. The school has never done so well before, and Mr. Kershaw attributes the success mainly to the vigour that the Head Master, Mr. Winckler, has put into the institution.

London Mission School, Vizagapatam.—This school passed only a moderate examination before the Inspector in July 1877, the higher classes failing in some important subjects, especially in Mathematics. The qualifications of the teachers appear low for a school of this class, but the staff has been lately strengthened by the appointment of a graduate. Two Missionaries assist in the teaching and management of the school, and the effect of their labors with the Sixth Class is shown in

the results of the University Examination, five pupils passing out of eight candidates, and one being placed in the First Class.

Hindu High School, Cocanada.—This school with the Primary School attached to it contains more than 400 boys, and is the largest school of its kind in the 1st Division. Unfortunately the school buildings afford very inadequate accommodation, and the quality of the teaching staff, according to Mr. Kershaw's last report, was not sufficiently good. The first want is likely to be soon supplied, and Government have recently been asked to sanction a building grant. It is to be hoped that the other defect will be remedied before long, as the Committee of Management do not appear to be in want of funds. At the last Matriculation Examination five pupils of this school succeeded out of fourteen.

C. M. S. Anglo-Vernacular High School, Ellore.—The strength of this school has declined by fifteen during the year, but as the whole falling off is due to the lowest classes it is not perhaps of much importance. What is of far greater consequence is the general weakness of the teaching staff, no Assistant Master holding a higher certificate than that of Matriculate, and the low standard of most of the classes. Out of eight candidates only one passed the Matriculation Examination.

Central School, Narsapur.—Of this school Mr. Kershaw writes—

"This school has been making a desperate struggle for the last two or three years to recover the position which it had allowed to slip away from it and to be occupied by an unaided Mission School. It has partially succeeded in its endeavours, the numbers have considerably increased, and a fair higher department has grown up. After an interval of several years this school again appears in the Matriculation list."

Only one candidate however succeeded, and Mr. Kershaw elsewhere expresses an opinion that if the contest with the Mission School is to be brought to a successful issue the character of the teaching must be very much improved.

Higher Class Schools, Second Division.

44. The number of Higher Class Schools in the 2nd Division last year was four; it is now six. Owing to the transfer of Nellore to the 3rd Division, it has lost the Free Church Mission School established at the chief town of that district; but the addition of Kistna to this Division brings with it three schools of this grade—the Hindu High School at Masulipatam, the Church Mission School, Bezwada, and the American Mission School, Guntoor. The attendance at these schools is all but stationary, and the number matriculated has fallen from 38 to 23, a greater fall than can be accounted for by the higher standard adopted at the last examination. It must however be recollected that three out of the four districts constituting the Division were among the severest sufferers by the late famine, and it may therefore be considered satisfactory that the decrease in some schools is not greater. Kurnool and Cuddapah show the most serious falling off, on which some remarks will be found further on.

Church Mission School, Bezwada.—"This school," writes Mr. Fortey, "professes to be of the higher class, but did not justify its claim to that rank in December last, when six pupils were candidates for Matriculation and not one of them passed. The teaching staff is weak, and both masters and pupils seemed to me deficient in energy." In reviewing Mr. Fortey's report, Colonel Macdonald says—

"The number of masters is large for so small a school, and greater results would probably be produced with fewer men of higher qualifications."

Hindu High School, Masulipatam.—This is a school of a very different stamp. During the past year its numbers have greatly increased, and the staff of teachers has been greatly improved. Among the Assistant Masters there are now one graduate and two First Arts men. The following extract from Mr. Fortey's report shows his estimate of the University successes of the school:—

"In speaking above of the Higher Class Schools in this Division, I remarked that there was one signal exception to their general want of success at the Matriculation Examination. I referred to the Hindu High School at Masulipatam, and I might almost have called it a brilliant exception. At the Matriculation Examination sixteen pupils passed out of twenty-three examined. Now the only institution in the Presidency which passed a greater number of pupils and at the same time a higher percentage of the number examined was the Provincial College at Combaconum, as may be seen by referring to the last report of the University Syndicate."

Nor is it only the Matriculation Class that has received the Head Master's care, for a general soundness is observed in the lower classes also, for which Colonel Macdonald thinks that great credit should be given to the Head Master and his Assistants. "The school," he remarks, "was distinguished both in the Matriculation Examination and in Mr. Fortey's comparative examination, and the results of his oral examination of the middle and lower classes were generally satisfactory." The success of this school is the more noteworthy, inasmuch as the same town contains also the Noble High School, an institution long established, of high repute, and, as has been already remarked, singularly well provided with all educational appliances.

American Mission School, Guntoor.—This school is still very weak. At Mr. Fortey's inspection the lower classes answered fairly, but no pupil of the Sixth Class passed for Matriculation, and the Fifth Class was the lowest of all at the Inspector's comparative examination. The absence till the present year of an Upper Fourth Class has probably had a bad effect upon the two higher classes, but this defect having been remedied better things may be hoped for in a year or two. The school is under the management of the Rev. Lemon S. Uhl, and a graduate is employed as Head Master.

Wardlaw Institution, Bellary.—The numbers on the rolls of this school, which is conducted by the London Mission, have increased during the year from 251 to 292, the school profiting, as Mr. Fortey remarks, by the misfortunes of the Provincial School. At inspection the condition of the junior classes was found to be tolerably satisfactory, but at Matriculation only two boys passed out of eighteen. On the other hand the Fifth Class acquitted itself well at the comparative examination, and

there seems reason to believe that the results of the next University Examination will be more favorable.

Zillah School, Kurnool.—The attendance at this school has fallen off considerably owing chiefly to famine and disease. The Head Master wrote in November last—

"Of the boys that come to school in the morning many go home in the course of the day shivering with cold and fever. The medical authorities here say that this is an exceptional season. The health of the teachers is very indifferent."

In these circumstances much cannot be expected, and it is therefore matter of satisfaction that of the three boys presented for Matriculation two passed, and that the school held a respectable place in the Inspector's Divisional examination of fifth classes.

Zillah School, Cuddapah.—This school seems to have suffered more than any other from the distress and unhealthiness of the past season. Writing in January the Acting Head Master, after speaking of the very irregular attendance of the boys in the latter months of 1877, remarks—

"In addition to the frequent absence of boys I had that of Masters. I have had often two, and sometimes three, Masters ill, and have frequently been so myself. Since the reopening of the school there has not been any improvement either in attendance or strength, nor can it be expected when the season continues as unhealthy as before. At present I have one Master on sick leave, two others ill (these were absent yesterday and to-day), and a good many boys absent, some of whom have been laid up through the holidays and are still ill, while about half a dozen are daily sent home with ague and fever."

It is not surprising therefore that only three boys out of fourteen passed the University Examination, and it is some credit to the Head Master and his Assistants that in such adverse circumstances the school did fairly in the comparative examinations of the Fifth and Upper Fourth Classes.

Higher Class Schools, Third Division.

45. The number of Higher Class Schools in Madras and the District of Chingleput remains unchanged, but the exchange of South Arcot, which has three Higher Class Schools, for Nellore, which has but one, has reduced the total number of these schools in the Division from nineteen to seventeen. The Saidapet High School, it will be observed, having been taken over by Government from the 1st October 1877, now appears as the Zillah School, Saidapet. The number of pupils has increased by 304, the increase being wholly in the Upper and Lower Departments, the Middle School classes showing a small decrease. The number of Matriculates has fallen from 191 to 106, a somewhat worse result than that obtained in the 2nd Division, and for which probably there is not the same excuse.

Free Church Mission School, Nellore.—This school does not appear to be in as satisfactory a condition as it used to be. The Hindu Anglo-Vernacular School, noticed in last year's report, continues to draw away some of the pupils of the Mission School, and the rivalry here, as has been the case in several other places, has proved detrimental to discipline and to keeping up the proper standard of classes. Besides, as Colonel Macdonald remarks in his review of Mr. Duncan's report, the teaching staff is weak for a school of this size and standing.

Patcheappah's High School, Madras.—This school, it will be observed, is the only High School in the Presidency Town which has not got a Lower Department. This is supplied practically by Govindu Naidu's Primary School; and if the two institutions are reckoned together, the number of pupils exceeds a thousand. The High School has suffered for a time by the loss of its late Principal, Mr. Lovery, who had served it for many years with zeal and success, and who retired on a pension in July 1877. At one time Mr. C. C. Flanagan, M.A., of the High School, Coimbatore, acted as Principal, but he returned to his former appointment after a few months. Till the end of 1877 the Assistant Principal, C. Gopalakrishna Mudaliyar, had charge of the school, and deserves some credit for the success it met with in the Matriculation Examination.

Bishop Corrie's Grammar School.—The Inspector's report bears testimony to the good order in which this school is maintained, but some serious defects are pointed out in almost all the classes, and Arithmetic proved more or less a failure throughout the school. The school however did very well at the Matriculation Examination, nine passing and three being placed in the First Class. In this respect it is a singular exception to the Higher Class Schools of the Division, for it succeeded in passing more boys in 1877 than in 1876. Under the new Head Master, the Rev. Mr. Atkinson, this school may be expected to reach a still higher standard.

S. P. G. High School, Vepery.—This school has made a great advance in strength, and, considering all things, did fairly at the Matriculation Examination. Mr. Duncan's inspection report is very favorable as a whole, but some of the sections of classes might with advantage be amalgamated, and the money thus saved might well be applied to raising the salaries of the rest of the Masters, as opportunities occurred for replacing the present teachers by others of higher qualifications.

Hindu Proprietary School.—The upper classes of this institution are more than twice as full as they were last year, while the remaining classes show a slight decline. The school succeeded in passing eight pupils at Matriculation, of whom two were in the First Class, which is, comparatively speaking, a very creditable result. Mr. Duncan visited this school in September and writes as follows:—

"Though I have had to report weak points here and there, I consider the general state and tone of the school creditable to Mr. D'Vaz, the Head Master. The manners of the boys contrasted most favorably with those of the boys of some Higher Class Schools I have lately visited."

Church of Scotland Mission Institution.—This school has retrograded slightly in strength and considerably in the number of the pupils passed at Matriculation. The results of Mr. Duncan's inspection of the

lower classes are tolerably good, but there seems great need for improvement in several subjects, notably in Translation and Mental Arithmetic. The Head Master, Mr. Sinclair, was absent on furlough for the whole year, his place being filled by the Rev. A. Dowsley.

Wesleyan Mission School, Royapettah.—This school was not formally inspected during the year. The middle and lower classes show a satisfactory advance in strength, but in the upper classes there is a slight decline, and the school cannot be said to have done well in the Matriculation Examination.

St. Thomé Seminary.—This institution continues to advance, especially with regard to the higher classes. It is true that only five pupils matriculated in 1877 against eight of the previous year, but then one stood so high in the First Class that he was elected to the Governor's Scholarship, and is now continuing his studies in the Presidency College. This school owes its progress in no small degree to the fostering care of the Very Rev. B. Amarante. Mr. Duncan reports as follows :—

"Though the classes are not in every respect in a satisfactory condition, the school is, I believe, fast progressing in efficiency under Mr. Michael, the present Head Master, and in popularity as well."

St. Mary's Seminary, Black Town.—On this school also there is no inspection report. The middle classes have sensibly declined in numbers, but the upper and lower ones remain stationary. Only four candidates out of fifteen passed the Matriculation Examination against twelve of the previous year.

London Mission Institution.—This school has somewhat declined in strength, though not in the higher classes. The number passed at Matriculation is very small considering the size of the school. The school was inspected quite early in the official year by Mr. Fowler, and the report as a whole is not unsatisfactory. The Rev. Mr. Joss is doing his utmost to raise the standard of this school, which has for many years been lower than that of most High Schools in Madras.

Balura Pathasala (*Triplicane Anglo-Vernacular School*).—This school has made some progress during the past year. Only one pupil passed the Matriculation Examination, and with the Presidency College so near to it a strong Matriculation Class can hardly be expected, but the teaching staff has been improved, and the Committee seem anxious to improve it still more as far as their limited means allow. The Inspector's report, except as regards the Matriculation Class, is not unfavorable.

Harris School.—This school is maintained by the Church Missionary Society for Mahomedans exclusively. It did not justify its claim to be considered a High School at the last University Examination, for though six pupils were sent up none succeeded in matriculating. This failure is thus accounted for by Mr. Duncan :—

"I attribute this result mainly to the divergence which exists between the nomenclature of the classes and the actual work done by them. An examination of the syllabus enclosed will show that while the names of the classes closely follow the Government scheme, the work performed by a

class is in most cases of a more elementary kind than properly attaches to its name. The Arithmetic of all the classes appears to be a year or more behind the Government scheme."

A good point about this school is the attention paid to translation throughout the classes.

Zillah School, Saidapet.—Reference has already been made to the change that has taken place in the management of this school. There has been during the past year a rather serious decline in the strength of its upper and middle classes, though a fair amount of success was obtained at the University examination. Mr. Duncan reports that the school is working satisfactorily, and that a trained graduate has lately been added to the staff of Assistant Masters.

Patcheappah's Branch School, Conjeveram.—The Inspector's report upon this school is very favorable as a whole. Writing and translation appear to be more attended to than in most schools of this description. The attendance has increased, but the number in each class is still small. The fact is that Conjeveram does not supply sufficient material for two good higher class schools. It is satisfactory to observe that four pupils out of five passed at Matriculation—one in the First Class. The Head Master, Mr. P. V. Ramaswami Raju, appears to keep his classes fairly up to the Government standard throughout the institution.

Free Church Mission Branch School, Conjeveram.—Though five pupils of this school passed the Matriculation Examination, it does not seem as a whole to be in as sound a condition as its rival. The numbers in the upper and middle classes have slightly decreased, but the total strength is in advance of last year's owing to the development of the lower classes. Colonel Macdonald, in reviewing the report, says—

"The quantity of English read in the middle classes is far too small, and translation seems to have been generally neglected throughout the school. A high degree of efficiency can however hardly be expected in a Higher Class School constituted as this is. There is not a single graduate among the teachers."

Free Church Mission Branch School, Tiruvallúr.—Mr. Duncan writes of this school—

"Except in the case of hand-writing, I consider the general state of the school creditable to the Head Master, of whom I formed a very favorable opinion."

In this school also translation appears to be well attended to. The upper classes are however very weak, and the Inspector considers that they are likely to remain so, as Madras is so easily reached from Tiruvallúr. At the Matriculation Examination this institution, like the Harris School, failed to pass a single boy.

Free Church Mission Branch School, Chingleput.—This school has made a slight advance in strength during the year. Mr. Duncan reports favorably of some of the classes, but Reading and Translation were, in his opinion, much neglected. Only two boys passed the Matriculation Examination. For the small numbers attending the upper classes the same reason may be given as in the case of Tiruvallur, the opening

of the South Indian Railway having brought Chingleput so close to Madras.

Higher Class Schools, Fourth Division.

46. The transfer of Tanjore to the 5th Division deprived this Division of five Higher Class Schools, and the addition to it of South Arcot brought in four in their place, so that the total number of schools of this class has changed from seven to six. Taking these six schools together it will be observed that the number of scholars has fallen from 1,354 to 1,303, and the number matriculated from 51 to 41. This latter result is not unsatisfactory in the circumstances; the Chittur Zillah School has made a decided advance and the Salem School has maintained its ground.

Patcheappah's Branch School, Chilambaram.—The middle classes of this school have increased in strength, but the others have declined to an almost equal extent. Dr. Bradshaw's report, though satisfactory in some respects, dwells on the deficiencies exhibited in English pronunciation, and as the lower classes are taught by Masters who themselves have had but little opportunity of acquiring a good pronunciation this is not very surprising. The Inspector thinks that it would be more satisfactory if the school were limited to the Upper Fourth standard, and the boys of the higher classes encouraged to go to Cuddalore, Combaconam, or Madras where they would enjoy greater advantages and be taught at less expense to Government and to the trustees. As long, however, as a town is able to keep up a school of about 200 boys, it seems to me only right that that school should be of the higher class. Nine boys of this school matriculated on the last occasion.

Zillah School, Cuddalore.—The Head Master of this school, Mr. Sconce, having gone on leave to England in April 1877, the school has been throughout the year in the charge of N. Raghunada Chari, B.A., an Assistant Master in the Provincial College, Combaconum. At Matriculation seven pupils passed out of twelve, and though this is not so good a result as in 1876, still it is far from unsatisfactory, considering that the average number passed by the school for the last nine years is less than three. In fact the higher classes of this school seem to be in a sound condition as is evidenced by the creditable place taken by it, not only at Matriculation, but also at the comparative examination of the Fifth and Upper Fourth classes. The First Class was re-established on the 1st February last, the step being advisable on local grounds, though most Zillah schools have long since dispensed with the more elementary classes.

The school has again somewhat fallen off in strength; but, considering the attraction exercised by the lower scale of fees in force at St. Joseph's Institution, this is only what must be expected. Dr. Bradshaw here suggests that "the fairest way to act by it would be that the same rate of fees should be charged in aided schools of the higher class as in Government schools." The lower classes of the school and the vernacular teaching generally appear to require more attention.

This was one of the schools visited by Colonel Macdonald in his recent tour. In Proceedings issued after his return he mentions some shortcomings at Cuddalore, but his observations are of a general rather than of a special nature, and I propose to introduce the substance of them at the close of the section on middle class education.

St. Joseph's Institution, Cuddalore.—Of this school Dr. Bradshaw writes—

"St. Joseph's Institution, though under the management of a Roman Catholic Mission, is not a Mission School, but was started in 1868 for the sake of some 20 Roman Catholic Native boys who form a boarding school, and about 30 other Roman Catholic boys residing in Cuddalore. The lower rate of fees attracted others, and since 1873 the strength has risen from 138 to 300 at present; thus 138, 217, 240, 296, 313, 300. Its chief strength however lies in the Lower Department, which alone exceeds the lower classes in the Zillah School by 100 boys. The same class-books are used as in Government schools, and no religious instruction is given, the Christian boys alone attending on Saturdays for religious teaching.

The Superior is a French priest, who does not take part in the secular teaching ; the Head Master is an F. A., and he is assisted by twelve other teachers, two of whom are F.A's."

It is remarkable that the fee receipts of St. Joseph's Institution are the same as those of the Zillah School though the number of pupils is double. The Inspector found the English pronunciation of the upper classes very faulty, and noticed a want of good grammatical teaching. The classification of the Middle Department was also defective, but the Superior, the Rev. Mr. Tarbes, has recently adopted some of Dr. Bradshaw's suggestions for the reorganization of the school, and better results may be expected in future.

S.P.G. School, Old Town, Cuddalore.—This school has recently been raised from the middle to the higher class, but practically it is still a Middle Class School, the Upper Department containing only five pupils. The increase noticeable in the strength of this school is mainly due to the transference to it of a number of boys belonging to what was known as the Pensioners' Boys' School, Cuddalore, closed on the 31st December. A part of the Government grant drawn by the latter school has been given to the Gospel Society's School, and the staff of masters may now be considered fairly equal to the work they have to do.

Zillah School, Chittur.—There is again a decline in the strength of this school. Various causes are assigned for it, such as the effect of the famine, the rate of school fee, and the comparative proximity to Madras, Dr. Bradshaw being of opinion that it is much more the custom now than it was formerly for boys who intend to pursue their studies in the University to leave Chittur for Madras at an early stage of their education in order that they may have the advantage of the European teaching available at low rates of fee at some of the aided institutions of the Presidency town. Dr. Bradshaw's inspection in December last did not produce favorable results, and the Deputy Inspector's Vernacular examination proved equally unsatisfactory. At the comparative examination of the Upper Fourth Classes this school stood low, but twenty-one passed out of thirty-eight presented against seven of the previous year.

The school is still badly accommodated in a private house too small for the classes even at their present strength, but a considerable sum has been subscribed for a new school building and a suitable site selected.

Zillah School, Salem.—This school also has seriously fallen off in numbers. The famine has no doubt had something to do with this, but the chief cause is the successful rivalry of the London Mission School. "This latter school," says Dr. Bradshaw, "withdrew from Government aid and control in 1876-77, and since then has moved into a larger building, and a European Missionary has been placed in charge. This, together with the low rate of fees and less exacting rules regarding admission and promotion, has drawn many to it." This school did badly at the Inspector's comparative examination of the Fifth Class, and stood very low in the departmental examination of the Upper Fourth Class, but at Matriculation it was fairly successful. Among the causes that have contributed to the unsoundness of this school Dr.

Bradshaw mentions constant changes of masters, and especially their absence on other duty in famine camps or other departments.

Higher Class Schools, Fifth Division.

47. There are fourteen Higher Class Schools in the 5th Division, Tanjore contributing exactly half the number. To the Tanjore High Schools the Anglo-Vernacular Schools at Tiruvadi and Tiruvalur have been recently added, but they cannot be expected to send up pupils to the Matriculation Examination for a year or two to come. In Madura the three schools noticed in last year's report remain without change, and in Tinnevelly the former three have increased to four by the addition of the S.P.G. School, Sawyerpuram. Taking these fourteen schools together, the increase of pupils is very small, not much more than 1½ per cent., while the number matriculated has fallen from 101 to 58. It is however to be remarked that of these 58, thirteen were in the 1st Class against five of the previous year.

Town School, Combaconum.—The Inspector reports as follows upon this important and excellently managed school :—

"The Town School at Combaconum contained 820 pupils at the close of the year. It is by far the largest school in this Division and probably in the whole Presidency. It was examined on the 4th, 5th and 6th September 1877, when there were 701 pupils present, only fourteen of whom constituted the 6th Class, a Matriculation class having been added only at the beginning of the year. The results of my examination were, on the whole, highly creditable to the school. The only subject which had not received due attention was Geography, which in most of the classes was not satisfactory. This is the only school in the Division which I found to have a Writing Master, and hence the writing was generally good. The discipline of the school was excellent; and during the three days I was engaged in examining it as well as on a subsequent occasion when I paid a private visit to it, I did not hear a single boy speak above a whisper, and then only when there was legitimate occasion for doing so, unless they were engaged upon their lessons in class. Of the fourteen boys in the 6th Class, all of whom attended the Matriculation Examination, no fewer than thirteen passed, five being placed in the 1st Class and one of these ranking so high as to secure a free scholarship."

This school has been a success from the very first and is greatly indebted for its prosperity to the fostering care of the Principal and Assistants of the Provincial College. The standard maintained in all the classes is exceptionally high, and the financial condition of the school is most satisfactory. It is believed that the managers have now a considerable sum in hand for a new building which is much needed, and Colonel Macdonald has intimated his willingness to recommend to Government a liberal grant-in-aid from the Educational Building Fund.

Wesleyan Mission School, Mannargudi.—The attendance at this school has somewhat decreased owing mainly to the establishment of a rival institution called the Native High School. This circumstance appears to have had the further effect of weakening the discipline of the Mission School ; and the report of the Inspector, Mr. Bickle, is as to this and other matters very unfavorable. Ten pupils however passed the Matriculation out of twenty-two examined, and three were placed in the First Class, which is a good deal above the average for the Presidency. The Native High School sent up two candidates, both of whom passed, according to the Syndicate's report, in the Second Class.

Wesleyan Mission School, Negapatam.—At this place also a Native High School has been established, and the Mission School has suffered to the extent of one-third of its pupils. Matters were worse at one time, and the upper classes have nearly recovered their former strength. Mr. Bickle reports as follows :—

"This school was examined on the 26th and 27th September 1877 under very unfavorable circumstances, as about two months previously no fewer than 147 boys, or more than half the strength of the school at the time, had during a sudden panic, induced by certain proceedings on the part of the temporary manager of the school, deserted to join a 'Native High School' whose establishment was due to those proceedings. The majority of those boys being Brahmans, the school was deprived of the best part of its intellect. The results of my examination were nevertheless moderately good on the whole."

Further on he observes—

"Six boys who passed the Matriculation Examination from the Native High School had been studying in the 6th Class of this school before they seceded to the other school. Had they remained, the Mission School would have passed ten pupils last December, a fair number in itself and equal to the number passed in 1876—a result but rarely obtained owing to the higher standard of the last examination."

S. P. G. High School, Porur.—This school has seriously declined during the year. With the exception of the 5th and 1st Classes the examination results are pronounced by the Inspector very unsatisfactory, and with such a weak and under-paid teaching staff it is not likely that much better results will be obtained. If a school is really to be a higher class school, its staff should at least contain a graduate or two and more than one First Arts man. Four pupils appeared for Matriculation last year and two passed, one in the First Class.

German Mission School, Tranquebar.—The attendance at this school remains stationary, and the upper and middle classes are weaker than they should be. Mr. Bickle's examination produced, on the whole, fairly satisfactory results, but he points out defects both in the teaching staff and in the accommodation provided for the school. At Matriculation this school did very poorly, both absolutely and in comparison with last year's results.

Anglo-Vernacular School, Tiruvadi.—This school appears for the first time among Higher Class Schools. Its promotion from the middle class is thus described by Mr. Bickle:—

"The Anglo-Vernacular School at Tiruvadi was raised to a Higher Class School in January last by the addition of a 5th Class, and at the same time, to avoid an increase in the salaried staff of teachers, it was arranged to place the 1st Class in charge of a Master who was to be remunerated by such fees as the class paid."

The results of the Inspector's examination were highly satisfactory, almost the only defect reported being the inferior character of the pupils' writing. The school suffered somewhat at one time from the establishment of the S. P. G. School at Kandiyur, only a mile from Tiruvadi, but at the end of the year it had almost regained its former strength. This school distinguished itself at the Departmental comparative examination of Upper Fourth Classes, all its three representatives finding places in the First Class.

Anglo-Vernacular School, Tiruvállúr.—This school was also raised to the higher class in January with the same arrangements as at Tiruvadi. The report of the Inspector though very favorable is not quite so good as that upon Tiruvadi, but the school is evidently in good condition and its former strength has been more than maintained. At the comparative examination two out of the three representatives of this school were placed in the First Class. Between two and three thousand Rupees have been collected for the purpose of building a new school-house, and the District Engineer has been asked to prepare a plan and estimate.

Zillah School, Madura.—"This school passed," says Mr. Bickle, "a fairly satisfactory examination, notwithstanding that many changes had

taken place in the staff of Masters in the course of the year." He however proceeds to point out some defects in the Fifth Class, and also alludes to the very discreditable position taken by the Fourth Class at the comparative examination. At the University Examination as many as seventeen passed, three being in the First Class. In this respect Madura stands at the head of all the Zillah schools. At the time of the Inspector's visit, ninety boys were paying an extra fee of 2 Annas for the privilege of attending the gymnastic class, but Mr. Bickle does not appear to have been much impressed with the value of the exercises which he saw performed.

S. P. G. High School, Ramnad.—The attendance of this school remains stationary, and its success at Matriculation was very small, but Mr. Bickle reports that in July 1877 the school passed, in the main, a satisfactory examination.

Anglo-Vernacular School, Shivaganga.—This school has slightly retrograded in all its three departments. From Mr. Bickle's report I should fear that it hardly deserves to be counted among Higher Class Schools, its Fifth Class being miserably weak. The lowest classes passed the best examination, but the writing of all the classes is pronounced decidedly bad.

S. P. G. School, Sawyerpuram.—This school was formerly known as the Sawyerpuram Training Institution, "but as it is at present constituted," says Mr. Bickle, "the designation is inapplicable, as it has not the means of training its students for teachers, nor does it profess to do more than read the text-book on method required for 4th and 5th Grade Certificates." On this subject Colonel Macdonald has the following remark:—

"Viewed as a Normal School the constitution of the institution seems to be radically defective, as it appears that no student had more than three quarters of an hour's actual experience of teaching during the year."

Five pupils out of twelve succeeded in matriculating and forty-four out of forty-seven passed for the 5th Grade at the last Teacher's Certificate Examination. The school has made a moderate advance in strength during the year, but the results of the Inspector's examination were not very satisfactory.

Hindu Anglo-Vernacular School, Tinnevelly.—This school has increased in strength during the year in the upper and middle classes, and has recently been affiliated to the University up to the First Arts standard. At the last Matriculation Examination, this school and, in a minor degree, the Hindu Anglo-Vernacular School at Palamcottah were very unfortunate, the bulk of the pupils being prevented from attending the examination on the 18th December by an extraordinary flood which made a bridge that they had to cross impassable. The results therefore —two passing from each school—are no indication of what the schools in ordinary circumstances might have accomplished. Mr. Bickle's examination in January produced fair results on the whole, but he points out defects in classification and in handwriting. With the hope of curing the latter fault a Writing Master has been appointed, and the Collector of Tinnevelly has promised prizes in this and the Palamcottah School for the best specimens of handwriting.

Hindu Anglo-Vernacular School, Palamcottah.—The inspection results of this school were also unsatisfactory. Colonel Macdonald observes—

"This report shows that the school is not in a very sound state. The teaching is not efficient, the attainments of the masters are low, and, owing to the weakness of most of the classes, the fees are not sufficient to enable the managers to give adequate salaries to the teachers."

The school has however made a great advance in strength during the past year, especially in the higher and middle classes.

Church Mission School, Tinnevelly.—The higher classes of this school are unfavorably reported on by Mr. Bickle who examined them in February last: the lower classes acquitted themselves better. The total strength of the school shows little change, but the middle classes are the only ones that have increased in the number of pupils during the year. The total failure at the Matriculation Examination is mainly due to the flood, but the school cannot be considered to be in a sound condition, nor has it been so for some time past. Colonel Macdonald, in his review of Mr. Bickle's report, remarks—

"This school has been examined of late years by three different Inspectors and always with the same result. There seems no doubt that the unsound state of this institution is due to the inferior qualifications of the Head Master and his Assistants."

Higher Class Schools, Sixth Division.

48. The transfer of Coimbatore to the 6th Division has added one Higher Class School, the London Mission School, Coimbatore, to the three schools, all in Malabar, which were noticed in last year's report. The total strength of these schools has fallen from 722 to 706, and the number of pupils passed at Matriculation from 38 to 21; in both cases the falling off is attributable to the schools at Palghat and Cannanore.

London Mission School, Coimbatore.—On this institution and its recent rise in standard, Mr. Garthwaite observes—

"This school was a Middle Class School until lately. In September a Fifth Class was formed, and in January a Matriculation Class. No pupils have matriculated from the school. The attendance is numerous and the Masters, though not high in qualification, are intelligent, painstaking men. * * * * I doubt whether the raising of the standard has been a judicious step. There was no real necessity for another Higher Class School in the town of Coimbatore, and the effect will probably be to draw off the energies of the managers and the Head Master from the task of improving the instruction in the middle and lower classes without doing anything as regards higher class education that could not have been better done in the collegiate school in the neighbouring street."

There can be little doubt that Mr. Garthwaite's opinion is sound from a purely educational point of view; but the managers would probably reply that they have other objects more at heart, and that they are naturally unwilling to let their pupils leave them just when the religious teaching inculcated might be expected to bear fruit.

Brennen Zillah School, Tellicherry.—This school remains nearly stationary in point of attendance; the middle classes have increased, but the others have declined in strength. Mediocrity in most things seems to characterize this institution; whether in regard to the University Test, the comparative examination, or Mr. Garthwaite's inspection, the result is everywhere the same, not very bad, but certainly by no means good. During the greater part of the year Mr. Thomas, the Head Master, was absent on other duty at Bellary, and Mr. Hensman, a Native Christian graduate, had charge of the school.

Zillah School, Palghat.—This institution was formerly known as the High School, but assumed its present name on being taken over by Government at the beginning of the year 1877-78. The Inspector's examination in August was fairly satisfactory as a whole, but the school did not distinguish itself at the Matriculation Examination, and there has been a somewhat serious decrease of strength in the Middle Department.

Anglo-Vernacular School, Cannanore.—This school suffers from want of a sufficiently strong staff. Colonel Macdonald, in his review of the Inspector's Report, says—

"At Mr. Garthwaite's inspection the number of subjects marked middling and bad greatly preponderates over those marked good or fair. This result seems mainly due to the fact that the teachers are attempting to do work above their qualifications, but Mr. Garthwaite is satisfied that they must have worked hard to do even what they have done."

The Head Master is only a First Arts man of no very special qualifications, and better results can hardly be expected. The salary of the Head Master, Rupees 85 per mensem, is hardly enough to secure a thoroughly-qualified man in North Malabar, though it might be sufficient for a post of the same grade in Tanjore or Trichinopoly.

Comparative Examination of Fifth Classes.

49. In my remarks upon the schools in the 2nd and 4th Divisions, both collegiate and higher class, I have had frequent occasion to speak of the comparative examinations of the Fifth Classes instituted by the Inspectors of those Divisions. The principal difference between them is that while Mr. Fortey has a comparatively narrow range of examination and does all the work himself, Dr. Bradshaw extends the examination, but has the papers set and the answers valued by the Head Masters and some of the First Assistant Masters of the schools under his charge. The main object of the examination is to check injudicious promotion to the Matriculation Class, none being allowed to enter it, at all events in the Government schools of the Division, who have not successfully passed this ordeal. In his annual report Mr. Fortey suggests the extension of the scheme to the whole Presidency, or, if that cannot be compassed, at any rate to all Government schools that contain Fifth Classes and for whose well-being the Department is wholly responsible. Colonel Macdonald approved of the suggestion, and in November and December next all the Fifth classes will be subjected to an examination similar to, but of course somewhat more difficult than, that which has been carried on for the last three years in the Upper Fourth Classes. Speaking of injudicious promotion to the Matriculation Class brings me to another point on which it may be well to say a few words. I have already alluded to a table introduced for the first time into the Annual Report of the Syndicate, showing in the case of each University examination the number of candidates from each school or college as well as the number who passed. In many instances— I might perhaps say in most— these numbers differ from those reported by the Heads of the Institutions or Committees of Management, and the main reason is this, that Head Masters are much in the habit of selecting a certain number of the pupils in the Matriculation Class whom they think likely to pass, and in all calculations afterwards this number is practically regarded as the total of those sent up by the school; so the master is able to say, "I passed no less than nine boys out of eleven," or something to that effect. Probably his Matriculation Class consisted of some twenty-five or even thirty boys, but nothing was generally heard about these additional candidates until the Syndicate's report this year divulged these secrets. The Syndicate's statement is based upon the applications of the candidates themselves, and therefore may sometimes attribute to a school a few more candidates than it really had at the time of registration, as boys who have left a school sometimes forget or dislike to use the words "private study" in their applications; but, making every allowance for these discrepancies, it must be evident that the Syndicate's report gives a fairer account of the real constitution of the Matriculation Class of each individual school than any statement of "selected boys" or boys "sent up with the approval of the Head Master." This evil is not perhaps as rampant in Government as in private schools, for the former have to send in returns to the Director which ought to show exactly how many went up and how many failed; but though in their case the truth is generally, though by no means always, told, it is a pity that the truth should often be so sad to tell.

The theory of a Matriculation Class is that it contains only boys who are supposed to have a fair chance of success at the end of the year, and

the sooner the practice is in harmony with the theory the better. This result, it is hoped, will be attained to a great extent by the Comparative Examinations, now in force in Government schools, of the Fifth and Upper Fourth Classes, and, as far as boys wholly trained in Government schools are concerned, the test will probably be all but perfect. Confusion however must in some degree arise by boys entering the higher classes of Government schools after previous study in private institutions, and of course without having had to pass the comparative examination. In these cases it will be incumbent on Head Masters to be rigid in their private entrance examinations, and in no instance to admit a boy who would have stood but a poor chance of passing the departmental test. In the Standing Orders for Government schools recently drawn up by Colonel Macdonald this subject is thus alluded to:—

"If promotions are properly regulated throughout the school, every boy in the First Arts and Matriculation Class should, as a matter of course, be fit to appear for the First Arts and Matriculation Examinations, unless prevented by illness or some special cause. The practice of selecting the best boys to go up for this examination and forbidding the rest to appear is wrong in principle. It is of course to be expected that there will be some failures, but on an average about two-thirds of the pupils ought to pass, and some of those who pass should be in the First Class. As a general rule, the soundness of the work done in the Matriculation Class will be judged, not by the absolute number of boys who pass, nor even by the proportion which these bear to the number sent up, but by the proportion which they bear to the number in the class.

Comparative Examination of Upper Fourth Classes.

50. This examination was originally confined to the Upper Fourth Classes of Provincial and Zillah schools, but on the last occasion it was extended to the first-class Taluk schools and the Madrasa-i-Azam. These latter however were not to send up the whole of their Upper Fourth Classes, but each school was to be represented by three chosen champions, and reference to the table of results annexed will show how well these champions maintained the credit of their respective schools. Including the Madrasa-i-Azam, eight out of the nine Anglo-Vernacular schools head the list as far as the total of average marks is concerned.

That the Taluk school boys should acquit themselves so well is a very satisfactory circumstance, but it must be always borne in mind that these were picked boys, and that their good averages were not in danger of being reduced by the failures of the idle and incompetent boys that always will be found at the bottom of a large class. This element however will not have to be taken into consideration in future, for at the examination of next November the whole of the Taluk school classes will appear, and the comparison between them and the corresponding classes in Provincial and Zillah schools will be perfect. Taking into account both quantity and quality and reckoning all that fall below one-third of the total marks as failures, it seems to me that the most successful schools on this occasion are Mangalore and Rajahmundry; the latter passed the greater number, but the number placed in the First Class was the same for both schools though Mangalore only sent up half as many boys as appeared at Rajahmundry. For the quality of the boys, and the ratio of boys passed to failures, Cuddalore holds a very high position, while Chittur, Calicut, and Salem make a good figure as far as mere numbers are concerned.

From the table in the margin it would appear that these classes had steadily improved in standard, but I am inclined to think that the papers set on the first occasion were both too long and too difficult, and that it was found necessary to make the subsequent examinations somewhat easier; if this is so no very definite conclusions can be drawn from the improvement in the figures, but at all events it may fairly be assumed that some advance has been made in general efficiency, as it is the natural tendency of such examinations to waken up both masters and pupils.

51. In the margin will be found a list of Higher Class Schools not under inspection or connected with the Department in any way, and from which no returns are received. The numbers passed at the last Matriculation Examination are taken from the Syndicate's report. The school which heads the list, and which passed as many as the next three put together, has recently applied to be placed under inspection, not apparently with the slightest expectation of obtaining a grant, but simply from the belief that a favorable report from a Government Inspector will contribute to the prosperity of the school. The school is managed and taught by three graduates, ex-pupils of the Combaconum College, who employ a competent staff of assistants, and, after paying all charges, are believed to gain a fair remuneration for their own labors. The other Native High Schools in the list have all been noticed incidentally in connection with the schools from which they originally sprung, the result of schism or panic.

VI.—Middle Class Schools.

Government Middle Class Schools.

52. In last year's report Colonel Macdonald noticed at some length the remodelling of the Anglo-Vernacular and Taluk schools which had taken place in 1876-77. A list was given of all these schools arranged according to Inspectoral Divisions, but these latter have changed so materially in the mean time that it seems necessary to annex another table here showing the distribution of these schools at the end of the official year. These schools are divided into three classes or grades according to the standard they have reached; thus, generally speaking, a school is in the First Grade if it has an Upper Fourth Class, in the Second, if it has a Lower Fourth, and in the Third if the Third Class is its highest. It does not however follow that the grade of a school is changed immediately on the creation of a new class. A school may be permitted to open a higher class as a tentative measure, and only after a year or two, if it continues to do well, will its grade be raised; on the other hand if for any reason a school lowers its highest class it does not at once sink to a lower grade; time is allowed for recovery, but if that recovery does not take place within a reasonable period, it is then permanently degraded.

1st Class.	2nd Class.	3rd Class.

		Satyamangalam.
		Dharapuram.

It will be observed that no schools in Malabar or Canara appear in the above list. The Government Middle Class Schools of those districts were excluded from the scheme of 1876 at the request of the Inspector of the 6th Division, and no change has been made in their status since that time. The various changes that have taken place in the other Divisions will be noticed in the following pages.

Middle Class Schools, First Division.

53. The following statement shows the attendance, standard, and condition of the Middle Class Schools of the 1st Division. Owing to the changes that have taken place in the areas of the educational divisions, the number of Middle Class Schools in each Division will of course differ considerably from the number of the previous year; it seems better therefore to speak as if at the end of the year 1876-77 the

Divisions stood as they do at present, in order to bring out more clearly the advance or decline of the districts that compose the Division. The 1st Division, it will be observed, has 26 schools of this description with an attendance of 1,496 pupils against 1,438 of the previous year. The increase is very small, but the quality of the schools has probably improved, as the pupils in the Middle Department have increased from 325 to 458.

In Ganjam the best Middle Class Schools are the Taluk School at Russelkonda, the Town School, Berhampore, and the Zemindari School at Parla Kimedy. Three schools in this district have disappeared from the present list—the Taluk Schools of Chicacole and Purushotmapur and the Samasthanam Branch School at Srikarmam. The first has been raised to the higher class; Purushotmapur after being degraded to the lower class has recently been abolished altogether, and Srikarmam is now only a school of the lower class.

In the district of Vizagapatam the Zemindari School at Bobbili takes the lead both as to numbers and efficiency, but Mr. Kershaw's reports on the schools of this district are rather unfavorable as a whole. Among the Taluk schools, Chodavaram, which was noticed in last year's report as relegated to the lower class, has been abolished and its place filled by a newly-established Taluk School at Ellamanchili; among the private schools, the Samasthanam Branch Schools at Jami and Voddadi have shared the fate of Srikarmam; Parvatipur and Narsapatam have fallen in standard, having no class above the third.

In Godavari four schools—the Government Mahomedan School, Ellore, and the Subscription Schools of Peddapuram, Ramachandrapuram, and Kottapetta—appear in the list of Middle Class Schools for the first time, while the Subscription School at Tallapudi on the other hand has fallen from the middle to the lower class. The Taluk School at Amalapuram has advanced in strength and standard, and fair reports are given of the schools at Ellore and Akavidu, but the rest are all in a more or less unsatisfactory condition. Mr. Kershaw has the following remarks upon the Middle Class Schools of his Division and middle class education in general :—

"Very few of these schools satisfied me at inspection, which may be accounted for partly by the inferior men that at present we are obliged to retain, and partly to the considerable rise in standard that has been required of these schools during the last year and a half, which neither boys nor Masters have yet fairly got abreast of though many of them are gradually coming up to it. There is another cause which I believe has more to do with the unsatisfactory state of this class of schools than any other, and which in the present state of things I despair of removing. I refer to the fact that a Matriculate has far more brilliant prospects in any other branch of the public service than in the educational branch. His educational attainments are of comparatively little value to us, and his prospects are bounded by a maximum pay of Rupees 30; whereas the same literary attainments carried into the Revenue Department would open out a much more glorious prospect, for every Matriculate sees a Deputy Collectorship looming large in the distance, to get which only requires, in fancy, certain technical examinations to be scrambled through. The consequence is that 99 out of 100 of this grade of Masters devote their whole time, strength, and thoughts to this object, and thus daily become more and more unfit for the post of Schoolmaster. Not a single grain of knowledge that will be useful to them in that capacity is ever acquired after they have passed the Matriculation Examination, and a good deal, I suspect, of what they had crammed for that examination is lost by disuse.

"I am hopeful that this grade of school will ere long begin to take a better position in our educational scheme than it has hitherto taken; although the last year, from various causes, has been unpropitious to the growth of middle-class education, the present increase in numbers taken in

connexion with the rise in standard should be regarded with satisfaction. If the lax and low standard of six years ago had been maintained the increase in numbers would have been very marked, but by the raising of the standard and the consequent rejection of all those who have not acquired certain prescribed rudiments of education we compel a very large number to seek those rudiments in the elementary schools who used to form the first class (the largest) in these schools."

Middle Class Schools, Second Division.

54. In the 2nd Division now embracing Kistna, Bellary, Kurnool, and Cuddapah there are fourteen Middle Class Schools. Their total strength has fallen from 689 to 675, and what is more, the middle classes have declined from 207 to 192.

In the Kistna District the number of Middle Class Schools is unaltered. The Hindu Anglo-Vernacular School at Bezwada has come down from the higher to the middle class, but then, on the other hand, the Church Mission Mahomedan School at Masulipatam has disappeared from the list. The Anglo-Vernacular School at Guntoor, described as tolerable in last year's report, can now only be considered unsatisfactory: the branch of the Noble High School on the contrary is not only the best Middle Class School of the district, but also of the whole Division.

In Bellary the Municipal Town School has sunk from the middle to the lower class, and the Taluk School at Anantapur, described last year as very bad, reached so low an ebb that it was abolished in the course of the year and the establishment transferred to Madhanapalle in the Cuddapah District under G.O., 24th December, No. 480. The new school at Madhanapalle was not however opened till the 1st June last, so that it does not appear in the present list.

The Taluk School at Adoni has improved in numbers and has advanced from "Bad" to "Fair," but, except perhaps for Penukonda, not much can be said of the other Middle Class Schools of the district.

In Kurnool, Nandial continues to be the only middle-class school of the district, and its condition is anything but encouraging. "Some years ago," remarks Mr. Fortey, "two Taluk schools were opened, one at Nandikotkur and one at Koilguntla; but the attendance, never very large, gradually fell off until they were obliged to be closed. The fact is they were ruined by the elementary Local Fund schools. In these latter, although little, if at all, better than ordinary village schools, the education given is almost gratuitous, and the people preferred sending their children to such schools to paying more for superior instruction."

In Cuddapah the number of middle-class schools remains the same; these three schools though not very strong numerically, especially in the Third Class, appear to be doing pretty well.

Mr. Fortey thus concludes his remarks upon Middle Class Schools :—

"It is much to be wished that some means could be found to stimulate the partially dormant energies of both masters and pupils in schools of this class. In the higher class schools an incentive to exertion is supplied (at least so far as the senior classes are concerned) by the University and departmental written examinations which bring them into competition with one another. But this mode of comparison cannot be applied to middle-class schools; for the pupils are so little advanced that a test in writing is not suitable, and the schools are so far apart as to preclude the possibility of assembling the pupils *en masse* and examining them *vivâ voce*. Looked at in another point of view the evil is this. The absence of an exact standard of comparison induces uncertainty and tends to a kind of mental compromise, so that both approbation and censure are toned down, and nobody gets his full share of praise or blame."

Middle Class Schools, Third Division.

55. The 3rd or Presidency Division consists of the districts of Nellore, Madras and Chingleput, and contains 22 middle-class schools. The total number of pupils has fallen from 2,456 to 2,351, but the schools are in all probability in a sounder and more advanced state, as the numbers in the middle classes have risen from 800 to 937.

In the Nellore District Ongole is the only Government Taluk School. It is again very favorably reported upon, and sanction has been given for the formation of an Upper Fourth Class. The number of Local Fund Anglo-Vernacular schools remains at six, for the school at Kaligherry dwindled down almost to nothing and had to be closed; its place is supplied by Kavali, formerly reckoned as a mixed school, but now only containing boys. All these schools suffered more or less from the famine. Mr. Duncan writes as follows about Gudur, which appears to have been most affected :—

"The school at Gudur was so much affected by famine and disease that it had to be temporarily closed during a part of the year. Eleven of the pupils died of fever, and the majority of the rest ran away to their villages. The Second Master also died. The Head Master was transferred to the school at Kavali, and the Anglo-Vernacular classes temporarily ceased to exist. At the time of my visit the school had but two classes—one Telugu, with seven little boys present, and one Hindustani, also with seven pupils present. Six out of the seven Telugu boys and two of the Hindustani boys had been admitted but a few days before my inspection. The two Masters seemed to be doing their work as well as they could. Shortly after my visit a Second Master was appointed, and the school revived considerably."

In Madras the only Government Middle Class Schools are the Madrasa-i-Azam and the Anglo-Vernacular School at Mylapore, both exclusively Mahomedan schools : of the former Mr. Duncan says—

"The upper classes were numerically weak, and the discipline of the classes was very defective, but in most other respects the school was in a fairly satisfactory state. Eleven boys from this school gained admittance to the Fifth Class of the Presidency College in January, being nearly double the number that proceeded to the College in the previous year."

The Mylapore School is stated to be improving under a new Head Master. Of the aided schools the most flourishing are Govindu Naidu's Primary School, the Anglo-Vernacular School, Muthialpet, and the Civil Orphan Asylum. The first is in connexion with Patcheappah's High School, to which it serves as a feeder. It contains upwards of 500 boys, and the Inspector's report upon it is very favorable as a whole. Muthialpet School has over 200 boys, and is also entirely under the management of Native gentlemen. The school premises are inconveniently crowded, Mr. Duncan describing the building as filled with boys in every part, even the roof being turned to account for the accommodation of the classes. Colonel Macdonald, in reviewing the favorable report of the Inspector, suggests the erection of a new school-house in a better locality, and offers to recommend the school for a building grant. Mr. Duncan concludes his report on the Civil Orphan Asylum in these words :—

"During my examination the conduct of the boys was all that I could wish, and orders were obeyed throughout with military precision. The training given in this institution is, I consider, of an entirely satisfactory character."

The other schools do not call for any special remark except, perhaps, St. Peter's School at Royapooram. Owing to disputes as to the management and the unsatisfactory state of the school itself, the grant-in-aid was suspended at the close of the official year, and the school ceased to be under inspection.

In the Chingleput District the Tâluk School at Poonamallee is now the only school of this grade. Its condition is only tolerable, but it has to contend with the rivalry of a Mission school of somewhat higher standing. The Wesleyan Mission School at St. Thomas' Mount is unfavorably spoken of by Mr. Duncan, and the qualifications of the teaching staff appear to be inferior.

The Roman Catholic School at Palaveram on the other hand is very favorably reported upon in almost every respect. There is no change whatever in the number of middle-class schools either in Madras or Chingleput.

Middle Class Schools, Fourth Division.

56. The 4th Division, embracing North and South Arcot, Salem, and Trichinopoly, has 33 schools of the middle class. The number of scholars has risen from 2,330 to 2,390, of whom 724 belong to the middle classes, against 674 of the previous year.

In North Arcot, except that the Anglo-Vernacular School at Arkonam has been closed or rather amalgamated with a neighbouring school, there is no change to record among the middle-class schools. The reports on all the schools except Ranipett, which has declined in standard though not in numbers, are more or less satisfactory. Wallajapet is the best of the Government schools, and would be still better than it is, in Dr. Bradshaw's opinion, if the Masters were not all Tamil men. The ratio of Telugu to Tamil pupils is 5 to 8, and this ratio would probably rise if there were a Telugu teacher. Of the others, Palmanair has advanced in standard, while Arcot has fallen off in numbers, and in the early part of the year in efficiency too, but the latest account is that improvement has set in. Among the private schools, the Church of Scotland Mission School at Vellore takes the lead; it has greatly increased in strength, and is in fair, but not more than fair, order.

South Arcot contains eight Government taluk schools and only one private school of the middle class. Of these the school at Tirukoilúr is decidedly the best and has made satisfactory advance both in strength and standard. On the other hand the Tindivanam School dwindled away owing to the American Mission School at the same place having been raised to a middle-class school, and since the close of the official year the sanction of Government has been given to its abolition. Four of these Taluk schools were visited by Colonel Macdonald in his recent tour, but the only remark made upon them is of a general nature and refers to the very peculiar mode in which translation was carried on. "In some of the taluk schools," he says, "in which written translation exercises were shown, it was found that they were almost identical and had in fact been done by the Master at the blackboard and copied out by the pupils. The use of dictionaries in translating seemed to be generally unknown." The only private school, the Anglo-Vernacular School at Manjacoopum, is by no means in a satisfactory condition, and Dr. Bradshaw has recommended its managers to reduce the school to the lower-class standard, the neighbourhood of St. Joseph's Institution and the Zillah school, rendering its existence as a middle-class school at once precarious and unnecessary.

In Salem the number of middle-class schools remains at eleven, but among Government schools the Town School, Shivapet, takes the place of the Local Fund School, Womalore, and in the list of private schools Denkincotta has become a lower-class school and the Anglo-Vernacular School, Matigiri, has taken its place. The private schools cannot be said to be in a very satisfactory state, but the Taluk School at Tirupatur is doing very well both in numbers and in the standard it has reached, and Dharmapuri has also progressed during the year. Three of the Tirupatur boys appeared at the Comparative Examination; all passed and are now studying in High Schools. Namkal has suffered a good deal from famine, but probably still more from its neighbourhood to Trichinopoly, which draws away its higher-class boys.

The Srirangam School is a first-class Taluk school; for years it has held a very good position, and at the Comparative Examination all its three representatives passed, two of them in the First Class. Its prosperity however seems likely to be checked by the new scale of fees. On this school Dr. Bradshaw remarks—

"The Anglo-Vernacular School, Srirangam, has for many years taken a leading place among the Government Middle Class Schools, and was

eighteen months ago raised to the first grade. It was favorably reported on when inspected in July, and at the comparative examination of the Upper Fourth Class two of the boys passed in the First Class and the other in the Second. Srirangam could well supply material for a higher class school, and in fact a very large proportion of the upper classes in the S.P.G. High School, Trichinopoly, come from Srirangam, which is but three miles distant. The Anglo-Vernacular School has been injuriously affected by the new scale of fees; Srirangam is one of the mofussil towns of the Second Grade, and the fee for the Upper Fourth Class is the same as that for the Matriculation Class in the High School, and the fee of the Lower Fourth exceeds that in the corresponding class in the High School by eight annas, and similarly in the other classes; the consequence was that not only was a school started by some ex-normal students which drew away boys from the Lower Department, but the upper classes were thinned through several boys preferring to walk in daily or join in paying the bandy-hire to the S.P.G. High School, where the difference of the fee makes it worth while to do so. I certainly think it anomalous that the fees in a middle-class school should be higher than those in a collegiate institution, merely because the former is a Government school; the result is a considerable falling off in the income to Government derived from the fee collection in the Anglo-Vernacular School. In spite of the good position this school maintains, it is still wretchedly housed, being held in a dark, ill-ventilated mantapum affording insufficient accommodation."

The Wesleyan Mission School at Trichinopoly is attended almost exclusively by lower caste Hindus and Native Christians, there being only one Brahman in the whole school. "Though the work done," says Dr. Bradshaw, "will not bring the school or its managers and teachers a name in the University lists, it is certainly very praiseworthy, and the school affords education for boys who would find it difficult to procure it elsewhere." Of the remaining schools the only one that demands attention is the Anglo-Vernacular School at Kulitalai. It owes much to the interest taken in it by the manager and to its being well-housed in what was once the Taluk Kacheri. The school is so well known that boys come from a distance to read in it, and the Middle Department is exceptionally strong.

Middle Class Schools, Fifth Division.

57. The 5th Division which includes Tanjore, Madura and Tinnevelly, contains no less than 44 middle-class schools.

Eleven of these schools have raised their standard during the year, two have lowered it, and one, the S. P. G. Anglo-Vernacular School at Thenthirupathi, has been closed altogether. The advance in standard however has not been accompanied by an advance in numbers, for the total number of pupils has fallen from 2,463 to 2,383 and the middle classes from 676 to 662.

Mr. Bickle's report on the Middle Class Schools of his division is minute and copious, but there is only room in this place for allusion to a few of the most prominent examples of excellence and progress or of the reverse.

In Tanjore there are only two Government Taluk Schools, Pattukotai and Tiruvadamarudur; the former is in fair condition and advancing in strength and standard, but the latter is not prospering, and the inhabitants have been warned that if the school is not better supported it will be removed elsewhere. The Inspector remarks that it is the custom at Tiruvadamarudur to send all the boys whose means permit it to continue their education at Combaconum. The five schools supported by the Gospel Society are all favorably reported upon, except the Kandiyur School, which takes the place of the school which was closed at Vediarpuram. It did not succeed at the latter place, and removal does not seem to have improved it. The fact is, that it is not required where it is, being within a mile of the flourishing Government School of Tiruvadi. The accommodation at Karanthattangudi is insufficient and uncomfortable: Colonel Macdonald made an offer of a building grant, but it does not seem to have been attended to. Of the Wesleyan Mission Schools, that at Nagore is doing well and contains several Mahomedan boys, though there is a Government Mahomedan School in the place; that at Tiruturaipundi is not so flourishing, and the school building is described as untenantable. Of the four Anglo-Vernacular Schools in this district, Kapistalam is the best in every way, and Palamaneri the worst. Of this last Mr. Bickle says: "The school passed a bad examination; the Second Master possesses no guarantee of his fitness for his post, having passed no examination at all; the school was held in a shed, the roof of which was not proof against the rain, and there was hardly any furniture. Such a school as this scarcely seems deserving of a grant-in aid." The Chattram Schools, so called because solely maintained from the Raja's "Chattram Fund" administered by the Local Fund Board of the Tanjore Circle, contain English and Sanskrit sections. The Ortanad School is very unfavorably spoken of; the Head Master has been guilty of neglect and "other gross irregularities," for which he has been reduced to the Second Mastership; but things do not yet seem to have changed for the better.

In Madura there are two Taluk Schools, Dindigul and Periyakulam, and six aided Middle Class Schools; the former are in fair order, but very weak in numbers. The aided schools do not appear to be very flourishing at present; those in the town of Madura have seriously declined, but Sholavandan seems to be improving in efficiency, and Tirumangalam also has made some advance.

In the Tinnevelly District there is no Government school of the middle class. Of the five schools managed by the Church Missionary Society, the school at Menganapuram is the only one that can be considered sound. The Sankaranainarkoil school is very weak in numbers, but the society are making great efforts to develope it, and a small building grant has been lately applied for. Suviseshapuram has only one Master of the old 9th Grade to teach three classes; it is not wonderful therefore that its condition is so unsatisfactory. Of the three Gospel Society schools, Alwar-Tinnevelly is rapidly improving in every way, but the school at Thenthirupathi has had to be closed owing to declining numbers,

and Radhapuram is not in a healthy state. This school has two sections, Anglo-Vernacular and Vernacular, and each section is divided into three classes taught by a single master: the system does not seem to succeed, and Mr. Bickle remarks of the Vernacular section that if tried by the results grant process hardly a dozen boys would be likely to pass even for the First Standard. The remaining schools, twelve in number, are, it will be observed, in a generally unsatisfactory state, almost the only exception being the school at Nanguneri which is making some progress. The cause of this undesirable state of things is in almost every case the same. The schools are split up into a number of small classes all taught by one master; it is fortunate if a school with five classes gets an additional teacher. At Vijianarayanam there has been for some time no master at all, and the school may be considered dead. Reference to the table will show that the majority of these schools can hardly claim to belong to the middle class, half a dozen boys constituting the utmost strength of their middle classes.

Middle Class Schools, Sixth Division.

58. The 6th Division now includes Coimbatore, Malabar, South Canara, and the Nilgiri District. It has 45 Middle Class Schools, exceeding in this respect even the 5th Division which has 44. If we regard the number of pupils the 6th Division is still more conspicuous, for there are 3,154 pupils against 2,383 in the 5th Division. Large as the number of pupils still is, there has been a considerable falling off during the year, for on the 31st March 1877 these districts had 3,570 pupils in Middle Class Schools. It is to be regretted that the decrease is mainly observable in the higher classes, the number of pupils in those classes having fallen from 1,560 to 1,309. The falling off is thus accounted for by the Inspector Mr. Garthwaite:—

"Nearly all the Middle Class Schools appear to have suffered from the famine, partly in the efficiency of the instruction, but still more in the attendance. Even in those parts of the division where scarcity rather than actual famine prevailed, the high price of food left little margin for other expenses, while in many cases the well-to-do had extra burthens thrown upon them, which made them less able to meet the demands for school fees, books, &c. In many places it is the children of the class of smaller officials that compose the larger portion of the attendance; and where actual famine prevailed, it was often the case that such persons and their families actually did not get enough to eat; and in these cases there was, of course, a strong temptation to save the money usually spent upon school fees, which even in more prosperous times were complained of as excessive. In this division not only in Government, but also in the Local Fund and Municipal schools the fee-rate has been screwed up to a point which is beginning to exclude the children of the poor; in fact, in Government schools that point was reached long ago. Hence every slight extra pressure is now sufficient to result in children being withdrawn from school."

In Coimbatore the number of Middle Class Schools is still seven—six Government and one private—and the only difference in the list is that the London Mission School at Coimbatore has become a higher-class school, and its place taken by the Hindu Anglo-Vernacular School at Karur, which was formerly reckoned among schools of the higher class. Of the Taluk Schools, Udamalpetai is the only one commended by Mr. Garthwaite, who seems to be struck with the disproportion between population and school attendance in the leading towns of the district. "In the Coimbatore District," he says, "the schools are situated in the midst of streets, and within not more than a mile of hundreds of respectable houses, and if attended at the rate of many Malabar schools, double or even treble the number of pupils should have been in these schools. The fact seems to be that in the Coimbatore District it is chiefly on the official class that the schools depend for their attendance; schools like several of the Malabar Local Fund Middle Class Schools, attended chiefly by the children of the agricultural classes, are unknown. It is a remarkable fact that except the languishing school at Karur, all the middle class district schools in Coimbatore are Government schools.

The people seem never, except in the solitary instance of Kangayam, to have availed themselves of local taxation to provide the means of middle class education for their children."

Karur is peculiar from the circumstance of its having no lower department; in fact it was intended to be the higher class school of South Coimbatore, but it has singularly failed to fulfil its mission. At Kangayam there is a fine school building, but few scholars to use it. This school has been in the habit of drawing an annual lump grant of Rupees 1,600, but this anomalous privilege has recently been withdrawn.

In Malabar also the total number of Middle Class Schools remains unchanged, one school, Kongad, having been raised from the lower class (to which however it seems destined to return before long), and another, the Church of England Mission School at Cannanore, having been closed during the year owing to a falling off in the subscriptions. Of the three Taluk Schools in this district, that at Badakara takes the lead both in strength and efficiency of teaching, while the Municipal School at Kalpatti (Palghat) is equally distinguished among the schools of its own class. The Local Fund Schools in the Calicut Circle are, as a general rule, in a better condition than those in the Tellicherry Circle. The Mangeri School appears to be the best, and those at Betutnad and Kottayi follow close upon it, while in the Northern Division Peringolam and Payyoli are the only schools reported as fair, and they were not visited by the Inspector himself. The private schools in Malabar are now reduced to two: of these the Basel Mission School at Calicut is not favorably spoken of by Mr. Garthwaite, and though in some respects his report upon the Protestant Boys' School at Cochin is more satisfactory, he concludes by saying:—

"My opinion is that it would be well if the place of this and the Municipal School were taken by a good Government Middle Class School."

The Taluk Schools in South Canara are three in number, Udipi is the best, but all are weak in numbers, and even Udipi does not contain nearly as many pupils as the worst-attended Local Fund Board School in the district. These latter schools also, it will be observed, have been most favorably described, but here also the reports depend mostly upon the

verdict of the Deputy Inspector, as Bantwal was the only school of the class which Mr. Garthwaite was able to visit personally.

The only private school in this district, the Anglo-Vernacular School, St. Rozario, Mangalore, maintains, says Mr. Garthwaite, its usual position of respectable mediocrity.

In the Nilgiri Circle there are three Middle Class Schools of which the Ootacamund Lawrence Asylum is by far the most important. The Annual Report of the Committee, which has already been submitted to Government, is, on the whole, satisfactory; but for two epidemics—which might have been confined within narrow limits if those first attacked could have been isolated from the others—the health of the institution was more satisfactory than in previous years; the industrial work of the school was conducted with regularity, and, as far as the accounts submitted enable me to judge, with profitable results as to the farm and the tailors, and carpenters' shops, while the ordinary education of the boys was certainly carried on more successfully and intelligently than heretofore. The institution was inspected by Mr. Garthwaite soon after the close of the official year, and it is encouraging to observe that though last year he was only able to commend the teaching in the highest class, on the present occasion the instruction of the lower classes also is in several respects mentioned with approval. The number of boys has risen from 313 to 318, there being 51 admissions against 46 departures. Of these last six enlisted, six entered the Government Telegraph Department, five were apprenticed to the Lawrence Asylum Press, and two to the Government Bakery at Bangalore, one died, one remained in employment at the Asylum, eight pupils, over age, were removed for various employments, and the remaining seventeen were withdrawn owing to their parents leaving India and other causes. A comparison between the number of boys in the industrial classes at the close of 1876-77 and on the 31st March of the present year shows a falling off of 31 boys, 21 in the tailors' shop and 12 in the gymnastic class, which does not appear in this year's list at all, and indeed ought not to be so placed, as all the other classes are essentially different in their nature. On the other hand, it will be seen that the telegraph class has increased from seven to sixteen, and from the number of boys who have lately obtained situations in the Telegraph Department, it appears that a good opening has been found in it for the adult pupils of the Asylum.

The Breeks Memorial School is in anything but a satisfactory condition; from various causes the attendance has declined during the year from 59 to 25, and the original object of the institution, that of providing education for the poorer classes, seems not to have been attained. The services of the European Head Master were dispensed with on the 1st March, and the standard of the school has been lowered. Of the Church Mission School at Ootacamund Mr. Garthwaite remarks that he found it numerously attended, but that the instruction was very poor.

Mixed Schools of the Middle Class.

59. The annexed table gives similar statistics for mixed schools of the middle class in all the six divisions. It will be seen that they are of three different kinds—(1), Girls' schools, with some boys mixed with the girls in the lower classes, as for instance the four schools at Madras; (2), Boys'

schools, in which by some accident a solitary girl or two may have been admitted, as at Raidroog, Denkankotai or Mayavaram; and (3), schools for East Indian or European children in which the sexes are fairly balanced as at Vellore, Trichinopoly and the Remount Depôt at Oosoor. Schools of the second class might, I think, be ranked amongst boys' schools, for as it is they frequently change from one list to another, and thus promote confusion and prevent fair comparison of one year with another; for example, in last year's report Denkankotai and Mayavaram appeared as purely boys' schools, while on the other hand Kavali, in Nellore, which was last year a mixed school, appears in the present report among the ordinary middle class boys' schools of the 3rd Division.

Concluding remarks on Middle Class Schools.

60. The account given above of the state of middle class education is as usual a chequered one, and it is not very easy to ascertain whether on the whole progress has been made or not. As to numbers, the question of progress may be at once answered: there is a falling off of about 500 pupils in all the schools of the middle class just noticed taken together. This however is not large when the total, 12,450 in round numbers, is considered, and it is of the less importance, because the falling off, such as it is, is wholly in the lower classes, the pupils in the 3rd and 4th classes who give these schools the right to be called middle class schools having actually made a small advance of a little over 1 per cent. Now I believe it is certain that the standard aimed at, and in great measure attained in Government schools of this class, has sensibly risen during the last two years, and it is probable that Inspectors in giving their opinion on the condition of other schools have had this higher standard in mind and pronounced their verdict accordingly. It may therefore be hoped, although the Inspector's reports are more often gloomy than otherwise, that middle class education in quality at least has after all made some progress. That numbers should fall off a little is hardly matter of surprise, when famine and sickness have borne so hardly upon the population; and I think that there is rather reason to rejoice that in all the circumstances of the country the decrease has been so small.

The following extract from the Proceedings of the Director of Public Instruction records some of the impressions made upon Colonel Macdonald's mind by the various Government schools visited by him, and as it contains much that no doubt is equally applicable to many other schools, it is printed in full. It is inserted here as it deals chiefly with schools designed for higher and middle class education:—

"The Director of Public Instruction has recently had an opportunity of visiting the Government schools noted in the margin, and his attention has been directed to certain points on which some general remarks seem necessary.

Provincial School, Bellary,
Zillah School, Cuddapah.
Do. Cuddalore.
Taluk School, Tripatty.
Do. Tindivanam.
Do. Villupuram.
Do. Panroti.
Government Mahomedan School, Cuddapah.
Do. Girls' School, Cuddalore.

2. The Head Masters of the Provincial and Zillah schools named in this list have ceased to furnish the Inspectors with monthly progress reports. Such reports are prescribed in the "Instructions to the Head Masters of Provincial and Zillah Schools" published in 1856, and should in future be submitted in all Provincial and Zillah schools. It is the duty of the Inspectors to see that the books read in each class are in accordance with the prescribed curriculum, and that the portions gone through are such as are necessary to ensure the work of the year being completed in the year.

3. In 1875 the number of school hours was reduced from six to five for the purpose of getting more paper-work done. It was intended that the pupils should have daily exercises to do at home, and that the Masters should devote an hour daily to correcting papers at home. In the revised

curriculum, directions are given for the exhibition of these exercise books, when schools are inspected, and it is expressly stated that the exercises are to be signed and dated, the object being to enable Inspecting Officers to see that proper attention is paid to paper-work. These instructions had generally been very imperfectly attended to, and, in some instances, had been altogether neglected.

4. One of the most important and difficult subjects is translation from the Vernacular into English. In the Zillah School of Cuddalore the Acting Head Master stated that the pupils never did any translation on paper, but were taught the subject orally, and the same sort of misconception prevailed in other schools. In some of the Taluk Schools in which written translation exercises were shown, it was found that they were almost identical, and had, in fact, been done by the Master at the blackboard and copied out by the pupils. The use of dictionaries in translating seemed to be generally unknown. Skill in translation can be attained only by constant practice, and, as laid down in the scheme, a pupil should begin in the second class to translate on paper, as well as he can, little sentences from the First Vernacular Reader, and gradually advance to fables, narratives and descriptions as he rises in the school. Every boy should be required to provide himself with Percival's Dictionaries, and those who can afford it should be recommended to buy larger dictionaries.

5. The curriculum generally seems to be very imperfectly carried out. In the Provincial School of Bellary, English History was not studied in the sixth class or Indian History in the upper fourth, because it was known or supposed that the boys of these classes would not be examined in these subjects, and Cornwell's Geography had been substituted for Clyde's and Duncan's. In the Zillah School of Cuddalore there was no English History in the sixth class, and in the fifth class the only portion of Lethbridge's Prose Selections read was Ali Baba and the forty thieves, which ought to have been read out of school. In many of the schools the standard in Arithmetic was greatly below that laid down, and pupils had been promoted without completing the course not only in Arithmetic, but in other subjects. *In the Provincial School of Bellary the pupils of the lower fourth class had been learning English Poetry, which is designedly omitted in accordance with the views of the Committee for the revision of Text-books. The orders regarding recitation of poetry and holiday tasks had not been attended to in many cases.

6. Sufficient use does not seem to be made in teaching physics of the apparatus supplied. All the air pumps were out of order. There is scarcely any use in teaching physics at all, unless the experiments named in the text-book are performed. In the Zillah School of Cuddalore the Acting Head Master of the Zillah school had not performed Experiment 5, because two pieces of glass were wanting, as if two pieces of glass could not be found in Cuddalore. Experiment 6 requires no apparatus, but this had also not been performed owing to the alleged impossibility of discovering or producing an oily or greasy surface.

7. It appears that the pupils in the Zillah schools seldom take any books out of the school libraries to read, for the simple reason that most of the books in the libraries are beyond their comprehension. It seems very desirable that care should be taken to provide these libraries with a few easy and entertaining books, which are likely to create a taste for reading.

8. The District Book Depôts do not appear to be sufficiently supplied with books and maps. There were numerous complaints that books which are named in the curriculum could not be procured. At Panruti the

Taluk School was still without Wyld's Tamil Maps of Europe and Asia, although these had been sanctioned and the money was available to pay for them.

9. Several schools were insufficiently supplied with maps. On the other hand the Government Girls' School, Cuddalore, had maps of the World, Europe and Asia in English, although English is not taught in the school."

Physical Training.

61. Some progress, but not much, has been made in the way of establishing gymnasia and promoting physical training generally in Government schools. Apparatus has been purchased, and an instructor employed, at the Zillah Schools of Salem, Cuddapah, and Kurnool, and since the end of the official year similar arrangements have been made at Bellary and Berhampore. In the Inspectors' Annual Reports the only allusion to gymnasia, to the best of my belief, is made by Mr. Bickle, who states that 90 pupils were in attendance at the Gymnastic class in Madura Zillah School at the time he last inspected it. This school was mentioned in last year's report as the only Mofussil school that had at that time begun a course of gymnastic training. The measures taken by the Gymnasium Committee in Madras and the grant-in-aid sanctioned for them by Government belong almost entirely to the history of the current year.

VII.—Elementary Education.

Classification of Elementary Schools.

62. The Elementary Schools of the Presidency will be noticed in the order adopted in the reports of the last two years, in which they have been classified as follows:—

(*a*) Government schools maintained from Provincial Funds, under which head come—

(1.) Elementary Taluk Schools.
(2.) Hill Schools of Goomsur and Pedda and Chinna Kimedi.
(3.) Elementary Government Schools for Mahomedans.
(4.) Government Schools in the Bhadrachalam and Rekapalle Taluks.
(5.) Pensioners' School, Tripasore.

(*b*) Local Fund Schools on the Combined and other systems.
(*c*) Municipal Schools on the Combined and other systems.
(*d*) Schools aided on the Salary Grant system.
(*e*) Schools aided on the Results Grant system.
(*f*) Schools aided on the Combined system.
(*g*) Unaided Schools.

Girls as well as boys are admitted into nearly all these classes of schools. No school will therefore be excluded from this section on the ground that they are mixed schools. The statistics of results schools will, as usual, include all results schools. The unaided schools are chiefly schools which are expecting grants on the results system. These will be noticed when they have been examined under the standard, although the grant earned may not have been actually paid within the year.

Besides the schools above mentioned, there are the Jail schools and the Army schools: these are under inspection, but furnish no returns to this department.

Elementary Taluk Schools.

63. A Government Taluk school is always intended to be, and almost always actually is, a Middle Class School; it is only therefore in exceptional cases that any such schools have to be noticed in this chapter. The recent remodelling of the Taluk schools has further contributed to keep these schools in their proper place, and unless a school is on the high road to extinction, it is not likely to find itself among schools of the lower class. In 1877-78 Purushotmapur was the only Elementary Taluk School, and even that school was closed in July last under G. O., No. 226, dated 8th June 1878.

Hill Schools.

64. The number of Hill schools in Goomsur and Chinna and Pedda Kimedi is still sixteen. The total number on the rolls is given at 700 against 709 of the 31st March 1877; but it can hardly be considered that 700 boys are under instruction, for the average number of absentees is enormous, being nearly 45 per cent. Mr. Kershaw has taken steps to have the most irregular of the pupils removed from the rolls, and the probability is that next year there will be a considerable apparent decrease in strength, but that the schools will be in a much sounder state than in former years. Still Mr. Kershaw who visited every one of these schools during the last cold weather considers that progress had been made. It has hitherto been the custom for the Masters to spend two months of every year at the Normal School at Russelkonda, and Major Smith, the Assistant Agent, attributes the recent progress of the schools mainly to this practice: the Inspector on the other hand argues that this custom is bad for the school at Russelkonda which is inconveniently crowded while the Hill Schoolmasters are in attendance, and bad for the Hill schools also inasmuch as about four months elapse between their closing for the vacation and reopening after it. Colonel Macdonald appears to be of the same opinion, and suggests that the annual migration should be confined to those men who are reported by the Inspector or Deputy Inspector as having forgotten what they have been taught. On another circumstance, which in the Inspector's opinion and also in Colonel Macdonald's interferes with the efficiency of these schools, Mr. Kershaw remarks as follows:—

"I would beg to call your attention to the two last columns in the statement giving the names, &c., of the Masters. You will observe that a large proportion of the Masters have not held their present posts for one year, that very few indeed have held their posts for two consecutive years. You will observe that on an average every Master is changed about once a year. Major Smith told me that this constant change and transfer cannot be avoided. It is not my province to prove that it might, could, or should be avoided; but interested as I am in the welfare of these schools, I cannot help remarking that such frequent changes of Head Masters are most injurious to the schools. It takes away all notion of responsibility from the Masters who are not backward at taking advantage of such relief. The usual reply to any censure of mine has been, 'I have only been three months in the school, and am not responsible for my predecessor's negligence.'"

65. Last year there were ten Government Elementary schools for Mahomedans: this number, it will be seen from the marginal table, has now been reduced to nine, Ellore, one of the best of them, having been raised to the middle class. Of the nine schools, five have declined in strength, two, those at Arcot and Nagore, very seriously, and the remaining four have slightly improved. On the whole there has been a falling off in the attendance of 14 per cent. I fear also that as to quality and condition these schools are as a whole equally unsatisfactory. Mr. Kershaw says of the Rajahmundry school that it does not make any progress, and that there is not much hope for the future, considering the class of society from which the pupils are drawn. The next four schools are in the 2nd Division, and Mr. Fortey says of them :—

Mahomedan Schools.

Schools.	Pupils on the 31st March		Condition.
	1877.	1878.	
Rajahmundry ...	29	22	Indifferent.
Masulipatam ...	24	17	Do.
Adoni	20	22	Do.
Cuddapah	28	26	Do.
Kurnool	15	18	Do.
Vellore	53	61	Good.
Arcot	44	21	Very poor.
Trichinopoly ...	56	65	Good.
Nagore	66	35	Bad.
Total ...	335	287	

"The languages taught are English and Hindustani, and the rates of fee are half those levied in schools for Hindus. These schools do not prosper, however, for in the towns where they are situated there are pure Hindustani and Telugu schools in which the rate of fee is still lower, and the desire for instruction in English is confined to a very few."

The schools at Vellore and Trichinopoly are superior to all the rest, both in quality and in strength; and Dr. Bradshaw has hopes that before long they will, like Ellore, be promoted to the middle class. "Arcot," he says, "has fallen lamentably low both in strength and standard," and the Deputy Inspector observes: "The fee collection is made with great difficulty, and the Masters are paying for some boys out of their own pockets. All this is due to the poverty and apathy of the majority of the Mahomedans of Arcot." Though Government sanctioned a school of this description for the town of Chittur as far back as December 1876, the school has only just been established and does not appear in the marginal list. The reason is thus stated by Dr. Bradshaw :—

"Sometime ago Government sanctioned the opening of a Mahomedan school at Chittur on the same footing as the others; and early in last official year a Matriculated Mahomedan, who had applied for the post, was appointed, but he never joined; and an attempt to secure a qualified teacher later on in the year failed. Meantime an uncertificated Mahomedan opened a school with the expectation of being appointed Second Master when the school would be established; this was done, and his school formed the nucleus of the Chittur Mahomedan School when a Matriculated man took up the appointment of Head Master in April last; but this history properly belongs to 1878-79."

The only remaining school, Nagore, is in the Negapatam Circle, and Mr. Bickle's report upon it was so bad that the Director reduced the Head Master's salary. The decrease in numbers is attributed partly to a misunderstanding between the Head Master and one of the principal inhabitants of Nagore, but chiefly to the Head Master's neglect of duty. The Mahomedan Deputy Inspector reports that the boys know Tamil much better than they do Hindustani. In the opinion of the same officer, who has recently returned from a tour in the 1st and 2nd Divisions, four out of the first five schools on the list deserve to be closed at once ; Cuddapah is the only one he would spare.

"The provident policy of Government," he writes, "relative to the establishment of special Hindustani schools, has sadly failed to produce the intended result. In such towns as Rajahmundry, Masulipatam, Kurnool, and Adoni, where the Mussulman element preponderates, one is naturally led to imagine that Hindustani schools would be in a thriving state; whereas it is quite the reverse, and they boast of a beggarly number of some sixteen or twelve pupils. In conclusion, I beg to submit that the maintaining of these schools tells very hard upon the State, and it is no distributive equity to benefit a class of subjects who are (as if doggedly) determined not to appreciate the liberal and special opportunities afforded them for their amelioration; they have only to pay half the rate of school fee."

Elementary schools in the Bhadrachalam and Rekapally Taluks.

66. There has been no change during the year in the Government Elementary schools in the Bhadrachalam and Rekapally Taluks. They are still five in number, but from the latest accounts received in this office, it is to be feared that the school at Marrigudem is still without a Master. The sanctioned pay for this mastership having recently been raised from Rupees 5 to 10, it is probable that, if not already filled, it will not be vacant long. The most important feature connected with these schools is the abolition of the Inspecting Schoolmastership; as there were only five schools to inspect, it was thought unncessary to have an officer of this grade, and he has accordingly been made Head Master of the Girls' school at Bhadrachalam. The salary thus saved has been partly utilized in raising the pay of other Masterships. The attendance at the four schools actually opened has risen from 110 to 118.

Pensioners' school, Tripassore.

67. The Pensioners' school at Tripassore has long been in a most unsatisfactory state. It appears evident that as long as the school is under its present Master and Mistress, there is no chance of any improvement; but as Tripassore is an out-of-the-way place, it is difficult to induce any really qualified person to go there on the salary allowed. The number of pupils, too, is so small, only nineteen on the 31st March last, that a larger salary is not to be thought of. The Acting Inspector suggested the appointment of a Native Christian Master, and Colonel Macdonald was of opinion that an East Indian Schoolmistress, drawing the amalgamated pay of the present teachers, Mr. and Mrs. Cox, would probably do better with these children, but as the school is not in any case likely to exist very long, it has been decided to make no change.

Yénádi school, Sriharicottah.

68. The Yénádi school at Sriharicottah, which had had for years a precarious existence, was finally abolished by an order of Government on the 8th October 1877.

69. The following statement shows the distribution of Local Fund schools of the lower class at the end of the year as compared with the previous year :—

Local Fund schools.

Districts.	Circles.	Lower Class Local Fund Schools		Pupils		Remarks.

Grand Total ...		712	774	20,765	(a)21,538	c) of these 768 are girls.

This statement can hardly be fairly compared with the similar statement given in last year's report; for it is drawn up upon a more definite principle with regard to schools on the combined system. The heading of the paragraph being "Local Fund Schools," all those schools simply aided and not managed by the Local Fund Boards have been excluded from the present table, and will be spoken of further on when I come to mention "Schools aided on the Combined System" in accordance with the distribution of subjects given in the opening paragraph of this chapter of the report. It has been remarked in more than one previous report that the combined system is worked differently in different circles, and it might be added that in one circle at least it is worked by the same Local Fund Board in two different ways: the minor differences are very numerous, but the great distinctive feature which I have taken as the basis of my classification is this: to whom are the fees paid, if any, and who bears the expense of keeping up the schoolhouse, supplying furniture, and meeting the cost of contingencies? If the Local Fund Boards not only pay fixed stipends and results grants, but also supply the wants just enumerated and in return have the fees paid into the Treasury, the schools are Local Fund Board schools; if the teachers have to find their own appliances and keep the fees to themselves, then, on the other hand, the schools are essentially private schools aided on a particular system. An ordinary salary grant school is not called a Government school, because its masters have certain fixed parts of their salaries paid from Provincial Funds, nor ought a school to be called a Local Fund school, because the Board gives it aid in a particular way. Taking then the table as it stands, and comparing the figures for the present year with the figures obtained on the same principle for the previous one, we find on the whole an increase of 62 schools and 769 scholars. The increase is very small in both cases, and particularly so as to the latter; but when we consider how much elementary schools of every kind must have suffered from the famine, it is satisfactory to find that Local Fund schools have not at all events retrograded even in such adverse circumstances. The only division that shows a decline is the second, and almost the whole of that decline is due to Kurnool—a district in which famine has been very severely felt, and in which unfortunately the working of the combined system has never been a success. Mr. Fortey's views upon this subject have been brought to the notice of Government in former reports, and the following extract from his annual report will show that he still retains his unfavorable opinion of the system as worked in his division :—

"In former reports, I have repeatedly pointed out the superiority of the results system to these combined systems as a means of improving our ordinary village schools. I have shown that the results schools are on the whole at least equally efficient, and that they are infinitely more economical and less troublesome to manage. I shall therefore content myself on the present occasion with remarking that in combined schools each passed pupil costs Local Fund Boards and Municipalities on an average Rupees 18-12-0, whereas each passed pupil in results schools costs Rupees 4-5-0, or less than one-fourth of the former sum."

Variations in combined system.

70. Though the statistics of schools aided on the combined system are postponed to a future paragraph, I think that this will be the most convenient place to notice the differences that exist in the working details of the

combined system, and to quote the remarks of such of the Inspectors as have touched upon the subject in their annual reports. Mr. Fortey thus notices the variety of system that prevails in the 2nd Division:

"It is proper here to remark that there are several combined systems working in this division. In the Kurnool Municipality a small sum is advanced monthly to each Schoolmaster, and deducted from his grant at the end of the year. In the Kurnool Circle the masters receive fixed salaries, and on their schools being examined they are paid in addition results grants calculated at one-fourth of the usual rates. In three of the four schools in the Bellary District the masters receive Rupees 7 per mensem *plus* full results grants, in the 4th the master also receives Rupees 7 per mensem, but when the results grant is paid to him the excess of his receipts in salary above Rupees 4 per mensem is deducted. In the Penukonda Circle and in the Guntoor Municipality and Circle the masters receive fixed salaries *plus* full results grants.

"As far as I can make out from the Deputy Inspectors' returns the school fees are in all cases credited to the Municipal or Local Fund Boards; but in the school at Penukonda and in two of those in the Bellary Circle no fees appear to have been collected."

Dr. Bradshaw has the following remarks on the system as worked in Vellore and Cuddalore Circles; in the former it will be seen a dual system obtains, and in the latter the schools were at last practically turned into salary grant schools:—

"Of the fifty-six schools all the items of expenditure in twenty-two are met from the Local Funds, and the school fee-collection is credited to the Local Fund Board. The teachers of the remaining thirty-four schools are paid Rs. 4 each, and they take the fees themselves and make their own arrangements for all the other charges.

Cuddalore Circle.—Of the forty-four schools, two are working on the salary system, and the remaining forty-two on the combined system; the Masters are classified as follows:—

Class.	Number.	Nominal Salary.	Fixed.	On Results.
		Rs.	Rs.	Rs.
1st ...	4	15	10	5
2nd ...	42	10	7	3
3rd ...	13	7	5	2

"In consideration of the famine the Masters were allowed full pay since August, and the amounts thus paid in excess of the monthly fixed salaries was deducted from the amount of results grant earned by them."

In the report for 1874-75 I remarked that one great advantage of the various modes of working the combined system, then in its infancy, was that it would in time be seen which mode was most practically useful, and already one important lesson has been learnt. That lesson is that the attempt to work the system cheaply on what may be called the Madura plan, as it had its origin in the Madura and Dindigul Circles, *is an utter failure. In those circles a fixed salary of Rupees 5 per* mensem was allowed to the Masters, but then the whole amount so given was deducted from the results grant earned at the end of the year.

This was in fact the results system with a small monthly advance; the Masters earned no more than they would have done under that system, only they received month by month a certain instalment of the grant instead of having it all in one sum after their schools were inspected. It will be seen from the following extract from Mr. Bickle's report that the system has broken down entirely in the Dindigul Circle; in Madura after a short trial it was abandoned altogether:—

"*Local Fund Schools.*—These schools are all worked on the *combined system*. The masters receive small fixed salaries which are deducted after the schools have been examined from the amount of grants which the schools earn, in case there should be an excess. Two of the schools did not gain grants sufficient to pay their salaries. The Deputy Inspector states that this mode of remunerating the teachers has not proved a success. At the close of the year under report four of the seven schools were without Masters, and the Deputy Inspector finds it a difficult matter to secure competent men on the present terms. Two of the schools in existence at the end of 1876-77 were closed during the year, and two new ones were opened."

The fact is that as the year wore on, and the Masters began to fear that their schools would not earn in results grants more than they had already received as stipends, they did not think that it was worthwhile to continue their teaching; the schools were closed, and the Masters disappeared, the Local Fund Board getting almost no return at all for the money they had expended in salaries. The one great advantage supposed to attach to the combined system, that of superior permanence, is thus lost, and in any future discussion as to the relative merits of different modes of working the system this particular form of it may be disregarded as involving nothing but failure and disappointment. This mode, it will be observed from the extract already quoted from Mr. Fortey's report, is adopted also by the Kurnool Municipality, but it has only been in force during the year under review, and as there are but 30 boys on an average in each of the four schools, the system does not seem likely to flourish there more than it has done in Madura or Dindigul. Though it is sufficiently clear that this form of working the system is a failure, it is not so easy to determine which form of working it has been most successful. That the system is generally popular may be gathered from the testimony of Mr. Kershaw, a somewhat unwilling witness—

"This kind of school seems to have great attractions for Local Boards, teachers, and the village people. It is considerably more costly than the result system, but it gives a greater stability to the schools, places the Masters more under control, and thus will in the end provide a better education than the results schools. The main reason why its superiority is not yet very apparent is that most Local Boards in establishing these schools merely convert an existing result school into a combined system school, and retain the services of the old Masters. When the old Masters die out the Local Boards will have a voice in appointing their successors, and will gradually introduce a better qualified set of teachers. This was found necessary, for whenever a new and certificated man was sent to a recently established combined system school, the villagers immediately banded together to support their old Village Schoolmaster against the intruder. No pupils were sent to the new school, and the Master was often subjected to petty persecution of various kinds. I was not much in favor of the

system, but perhaps it may answer better than the simple results system, as it is more popular, as I have stated above, with all concerned."

That the system should be popular with the Masters and village people is by no means surprising, for the Masters earn more money than they would under the results grant system, and in many cases it has been reported that the people pay smaller fees or no fees at all in consideration of the greater advantages enjoyed by the teachers; but why the Local Fund Boards should also be so strongly in favor of it is not perhaps so clear. Amid all the variations of the system, monthly salaries with full results grants, the same with half or quarter results grants, monthly salaries subject to some decrease of the annual grant and so on, one thing remains constant, and that is the costliness of the system as compared with the pure results grant system. The impression then of the Local Fund Boards and of those independent authorities who are in favor of the system as applied to elementary education must be that the schools are better than results grant schools, and that if more money is spent upon preparing the ground a better harvest is reaped. I am bound to say that, in my humble opinion, this superiority is, to say the least, open to grave doubts. Mr. Fortey has, I think, conclusively proved that this superiority does not exist in his division; if the other Inspectors would investigate this point carefully in their divisions, and give the results of their inquiries in their reports for the current year, a great step in advance might be taken towards the solution of this difficult but most important problem. Three years ago I came to the conclusion that the combined system was better adapted to the constitution and needs of Middle Class schools, and that the results grant system would be most advantageously followed in elementary schools, and my present opportunities of observation have only served to strengthen my convictions on this subject.

Municipal schools.

71. The number of Municipal schools has risen during the year from 69 to 77, and the number of pupils from 3,919 to 4,158. The increase is mainly due to the opening of new schools in Kurnool and Coimbatore.

(a) 5 on the combined system. (b) On the combined system.

The majority of the above schools are salary schools, but a respectable minority, 32 out of 77, are on the combined system, and this class of school seems on the increase. Though I have expressed my doubts of the value of this system as compared with the results system, I have no hesitation in preferring such schools to salary schools of the same standard. On this point Mr. Fortey remarks :—

"Now for the improvement of these lower class fixed salary schools, I *have* a suggestion to offer, and that is their conversion into 'Combined'

schools. I have repeatedly pointed out the injurious effect of substituting combined for results schools as diminishing the direct interest of the teachers in the results of examination. But the conversion of 'fixed salary' into combined schools would have precisely the opposite effect."

The history of the year, I think, affords an illustration of the truth of this principle. In last year's report Colonel Macdonald had occasion to speak very unfavorably of the Municipal schools at Madura. Since that time they have been converted from fixed salary into combined schools, and the change appears, from Mr. Bickle's report, to have had a beneficial effect. He writes:

"The ten Municipal schools at Madura were placed under the combined system at the beginning of September last. These schools consist of two, three, or four classes each, and are taught by two, three, or four Masters, though the number of teachers does not, in every case, correspond to the number of classes.

"The highest class of each school is equal to either the first or second class in Government schools. These schools were all examined by the Deputy Inspector in March last with satisfactory results. A moiety of the grants earned was paid to the teachers, and in addition they have received fixed salaries of Rupees 12, 10, 8, and 7 each. The total expenditure on these schools was Rupees 4,895-10-11, of which Rupees 3,700-3-0 was paid in salaries, Rupees 576 in results grants, Rupees 471-7-3 for house-rent, Rupees 48-0-8 for contingent expenses, and Rupees 100 for prize books. The school fees realized Rupees 1,319-2-0, so that the cost to the Municipality was Rupees 3,576-8-11."

The only objection to these schools now appears to be their expense, as they cost on an average about Rupees 30 a-month, but this, as I have already observed, is a defect common to all combined schools.

Schools aided on the Salary Grant System.

72. I now proceed to notice the schools aided on the salary, results and combined systems. The statistics of the first mentioned class of schools are included in the following table which shows the number both of schools and scholars, and the amount of aid afforded from Provincial, Local, or Municipal Funds:—

Lower Class Salary Grant Schools.

Districts.	Number of Schools.	Number of Boys.	Provincial Funds.	Municipal Funds.	Local Funds.
			RS. A. P.	RS. A. P.	RS. A. P.
1. Ganjam ...	1	Closed.	...	...	30 0 0
2. Vizagapatam.	3	70	71 9 10	240 0 0	254 0 0
3. Godavari ...	13	771	319 5 4	1,672 0 0	633 0 0
4. Kistna ...	5	263	375 11 11	420 0 0	432 5 4
5. Bellary ...	9	425	344 0 0	599 2 3	48 0 0
6. Madras ...	16	1,458	7,345 9 7	...	174 12 10

Districts.	Number of Schools.	Number of Boys.	Provincial Funds.	Municipal Funds.	Local Funds.
			RS. A. P.	RS. A. P.	RS. A. P.
7. Chingleput.	6	374	550 11 4	...	504 0 0

Total .	80	4,573	12,402 13 4	3,958 2 3	2,813 8 4

These schools were not separately noticed in last year's report, and I have therefore not instituted a comparison between their condition at the beginning and end of 1877-78. In some districts there are no schools of this description, and it seems likely that they will in the course of time decline still further in numbers. Ganjam, Cuddapah, Kurnool, Nellore, North Arcot, Malabar, and South Canara are the districts wholly unrepresented in this list.

Schools aided on Results Grant System.

73. The following table shows the working of the results grant system for each district. The attendance in aided schools has fallen from 160,218 to 144,214, but this number does not include the attendance of schools which received grants during the year, but were closed before its expiration. The number of unaided schools preparing for results grants has fallen from 3,776 to 3,058, and the number of pupils from 74,368 to 54,045. The unaided schools consist as usual of schools under improvement which will probably be presented for grants in the present official year, and of schools which for some reason or other have not received the grant earned during the past year. Here at last the disastrous effects of the great distress of the past twelvemonth make themselves manifest. Other classes of schools have suffered but slightly from the famine and its attendant miseries, and some have even progressed in spite of it, but here when we really come to deal with the masses the falling off is deplorable. Other causes may have been at work, and further on I shall have occasion to notice one of them, but that the famine has been the chief cause, I fear there can be no doubt at all. Taking aided and unaided schools together, the loss is 1,179 schools and 36,327 scholars. The total number now under inspection is 198,259, or upwards of 20,000

less than it was two years ago. It will be seen from the table in the margin that there has been a corresponding decrease in the amounts paid for results grants. The total decrease amounts to Rupees 27,977-4-5, and is almost entirely to be found under the head of Local Fund Board contributions. The money supplied from Municipal Funds is indeed a trifle more than in 1876-77, while the share of expense borne by Provincial Funds shows but a slight reduction. This last fact seems to show that the number of girls and the number of passes for the Fourth Standard, both of which receive aid from Provincial Funds, have not decreased in as great a ratio as the rest.

Grants drawn from—	1876-77. Rs.	A.	P.	1877-78. Rs.	A.	P.
Provincial Funds ...	69,881	4	0	67,329	0	0

during the year but were closed before its expiration.

Summary of results for each Division.

74. The preceding table may be summarised as follows for the six educational divisions :—

Divisions.	Number of Schools aided.	Attendance.	Grants paid.	Average Grant per School.
			Rs. A. P.	Rs. A. P.
First	1,045	21,834	35,997 13 2	34 7 2
Second	790	13,274	23,821 6 0	30 2 5
Third	667	17,564	32,814 5 4	49 3 2
Fourth	1,220	24,328	48,192 0 5	39 8 0
Fifth	1,308	38,044	93,846 8 0	71 12 0
Sixth	1,007	29,170	45,268 4 0	44 15 3
	6,037	144,214	2,79,940 4 11	46 5 11

If this is compared with the corresponding statement of last year's report, the changes will appear very numerous, but it must be borne in mind that in the interval all the divisions have undergone important modifications. The 1st Division has lost, and the 6th Division has gained, a whole district, while all the others have given one district in exchange for another. As at present constituted the 5th Division takes the lead both in the total amount of grants earned, and in the average grant per school examined. The average grant per school for the whole Presidency has changed but little; last year it was Rupees 47-6-2, and this year Rupees 46-5-11.

Number of Pupils passed under each Standard.

75. A statement will be found in the appendix showing for each district and division the number of pupils who passed under each standard. The following is a summary of the figures for the whole Presidency :—

	Standards.	Number of Schools that passed Pupils.	Number of Pupils presented for Examination.		Vernacular.						English or Extra Language.			Needle-work.
			Boys.	Girls.	Number of Pupils who passed in Reading.	Number of Pupils who passed in Writing.	Number of Pupils who passed in Arithmetic.	Number of Pupils who passed in Grammar.	Number of Pupils who passed in Geography.	Number of Pupils who passed in Reading.	Number of Pupils who passed in Writing.	Number of Pupils who passed in Grammar.	
5,929 schools passed pupils.	I	5,332	35,615	3,453	28,633	28,343	26,043	...	...	...	...	...	1,130
	II	4,600	25,775	1,834	19,094	21,031	17,720	...	...	...	...	...	798
	III	3,169	14,690	880	10,637	12,042	8,997	4,209	6,002	2,018	2,185	...	404
	IV	1,233	5,591	555	4,463	5,452	2,143	2,180	2,471	1,489	1,585	877	211
Total ...			81,671	6,722	63,027	66,868	54,903	6,389	8,473	3,507	3,770	877	2,543

These numbers of course exhibit a falling off as compared with last year's, but it is satisfactory to observe that the falling off in passed pupils is not as great proportionally as that in the total number of pupils, and that under the head "English or extra Language" there is for the Third Standard a positive advance, and for the Fourth Standard a decline of the most trifling nature. Under the head of Needlework also the decline is very slight, thus bearing out the remark made in the previous paragraph about the expenditure from Provincial Funds.

The following table shows the number of pupils who passed in reading alone, in both reading and writing, and in reading, writing, and arithmetic:—

Divisions.	Presented for Examination.		Passed in		
	Boys.	Girls.	Reading alone.	Both Reading and Writing.	Reading, Writing, and Arithmetic.
First	14,035	779	450	2,424	7,214
Second	8,240	357	222	1,653	3,881
Third	9.307	1,024	352	1,623	4,086
Fourth	16,144	654	767	2,118	8,018
Fifth	20,001	2,568	746	3,450	11,316
Sixth	13,944	1,340	198	2,357	7,208
Total ...	81,671	6,722	2,735	13,625	41,723

While speaking above of the great decline in the number of schools aided on the results system, and attributing it mainly to the effects of famine, I said that I should have to notice another cause of decline. The resources of the Local Fund Boards and Municipalities are limited, and even when there is a disposition to do what can be done for the cause of elementary or middle class education, the means at the disposal of those bodies are not always equal to the demand. It therefore often happens that when economy is to be practised the money set aside for results grants is diminished. The case as regards the 6th Division is thus stated by Mr. Garthwaite:—

"I regret to state that the amount allotted by the Boards for expenditure on education is insufficient for any extension of education. The educational allotment for Coimbatore, Nilgiri, and South Canara has been at pretty nearly the same amount for several years past, while that of the two circles of Malabar has been greatly decreased.

"Matters educational in Malabar have consequently come to this pass—that the limits of a judicious economy have long been overstepped. The Middle Class schools can no longer obtain or retain good teachers. Men of any ability prefer other departments, or if they join the Educational Department for a short time, they soon leave their work, because their prospects as Schoolmasters are so inferior to those men of less ability and attainments have in other work. In the Local Fund Middle Class schools in Canara, on the other hand, there has been latterly no such difficulty, because there the stipends and the grants for the Middle Class schools have been raised to an amount that satisfies men of moderate expectations. But in that

circle a large additional number of Lower Class schools are wanted, and would be very useful, as there are scarcely any indigenous schools, but there are no funds to provide for such an extension of Lower Class education.

"In regard to elementary education in Malabar the effects of the sweeping reduction in the allotments are still more disastrous. Schools have to be left unexamined, because the allotment for results grants has been spent. Pyal Schoolmasters who left their schools for a year, in order to attend the Pyal Normal Schools for training, and whose main inducement to forego a year's earnings was that they would as trained men be eligible for a stipend, have now to be told that the allotment for stipends is exhausted."

Revised Results Grants Rules.

76. The revised rules for results grants, though passed in 1877-78, only came into force on the 1st April last, and will therefore be more fittingly noticed in the next report. For Mahomedan schools and girls' schools, however, the old rates are to remain in force for five more years, as it was feared that the reduced rates, combined with some advance in the standard, would operate fatally upon schools of these classes whose constitution is not sufficiently robust to bear even the slightest shock.

Mappila Schools.

77. Speaking of Mahomedan schools leads me naturally to notice the Mappila schools in Malabar which are not making such progress as at one time seemed probable. Mr. Garthwaite gives a table in which he shows the decrease since 1875-76 in Mappila schools and scholars, and continues as follows:—

"It appears from the table that the amount expended on Mappila education has decreased yearly since 1875-76, chiefly by withholding the stipends promised to the Mappila Schoolmasters—a measure which has much shaken their faith in the permanence of any State aid. It will be seen also that the number of Mappila schools and scholars has decreased in something like proportion. Speaking roughly, it may be said that for every Rupee spent per annum a Mappila boy can be brought under instruction, and that for every Rupee knocked off there will be one boy less. Whether, in order to make a beginning in having the individuals of this race brought out of the dense ignorance and prejudice in which they are steeped, it is not worth the while of Government to devote that Rupee is a question which I think should be earnestly urged on the consideration of Government. A Mappila outbreak, even a small one, costs Government more than the extra sum required to place Mappila education on a satisfactory footing for several years; and, as long as the Mahomedan population of the Western Coast is allowed to remain in its present brute ignorance, such outbreaks must be looked for at least as regularly as the famine which Statesmanship now recognizes it as a duty to provide against, and, in fact, in a measure even to prevent."

Schools aided on the Combined System by Local Fund Boards.

78. The table given below may be considered as supplemental to that in paragraph 69; it includes all those combined schools in which the fees, if any, remain at the disposal of the Masters, and in which the action of the Local Fund Board ends with the payment of a fixed stipend and results grant. It is difficult to say, as I have remarked already, which class of combined school will ultimately survive the rest in the process of selection of the fittest, but if I were

obliged to hazard a conjecture, I should be inclined to fix upon this type of school, as being at once most easy to manage and best suited to the habits and wishes of the people. Correspondence is diminished, a vast amount of reference to the Local Fund Board is avoided, and the sanction of Government need not be perpetually applied for whenever a school has to be closed or a new one opened. Above all, in these schools the village people practically choose their own teacher, and do not get one imposed upon them by the Local Fund Board.

I do not, however, wish it to be understood that this development of the combined system is the one which I most approve of myself; on the contrary, I think that there is a radical defect in it; according to this system almost the whole of the cost falls upon Local or Municipal funds, and next to nothing, perhaps, in some cases nothing at all, upon the parents of the children taught. It may of course be urged that the parents contribute in the way of taxes to the resources from which the Boards support the schools, but so also do others who have no children to send or who do not send those they have. In any case it is most desirable to teach parents that if they want their children educated, they should themselves bear a fair proportion of the cost, and this is what can hardly be done, or at all events in practice is never done, with this description of combined school. When, however, the Local Fund Boards keep the management and the fees entirely in their own hands, the rates of fee may by degrees be brought up to a reasonable standard, and a great, if not the greater, part of the whole of the expense defrayed from this source; this is the system that personally I should wish to see the prevailing one.

79. The schools of the Native Infantry Regiments named in the margin were inspected during the year. Mr. Kershaw says that the results of these examinations are never satisfactory, but that the 2nd and 7th Regiments did better than the 41st. The whole number of pupils was only 128, the 2nd Regiment being the weakest numerically.

Army Schools.

FIRST DIVISION.

14th Regiment N.I.
19th do.
32nd do.
38th do.

FIFTH DIVISION.
37th Regiment N.I.

The schools of the 14th Regiment at Vellore, and of the 19th, 32nd, and 38th at Trichinopoly were all inspected by Mr. James Bradshaw, while acting as Inspector of the 4th Division. The first had only been recently organized and did little or nothing; the Trichinopoly schools were better; though both in discipline and teaching the school of the 32nd Regiment is reported to be inferior to the other two.

Mr. Bickle thus speaks of the school of the 37th Grenadiers stationed at Palamcottah :—

"This school consists of two sections—one English and the other Hindustani.

"The constitution of the school was unsatisfactory in the extreme, as the English Master had to look after no less than seven different classes in non-vernacular subjects, and the same number in the vernaculars, five classes reading Telugu and two Tamil. The range of non-vernacular subjects was very limited, being confined to English, Geography, and Arithmetic in the two highest classes, and to English and Arithmetic in the remaining classes. Two hours a day were devoted to those subjects, and two hours to the vernaculars. The results of my examination in the former were of every possible kind between very good and utter failure; the vernacular results were generally satisfactory."

This is the last time that these schools will be noticed in the Departmental Report, the schools having been withdrawn from inspection in June last.

Jail Schools.

80. The order of Government relative to Jail schools, dated the 22nd March 1877, No. 769, was communicated to all the Inspectors of Schools, and replies were received from Messrs. Fortey, Kershaw, and James Bradshaw. The matter, however, appears to have gone no further, and no Inspector has mentioned the subject of Jail schools in his annual report. From the records of this office it appears that the Jail schools at Madura and Rajahmundry are the only schools that have been inspected during the year under review. Mr. Garthwaite proposed visiting the Cannanore Jail in April 1877, but as the Superintendent would only allow half an hour for the inspection of upwards of 400 convicts, Mr. Garthwaite did not carry out his intention. Some correspondence on this matter was submitted to the Inspector-General of Jails, but apparently without result. At Madura the convicts are taught for half an hour in the evening after work is over for the day, all the teachers being also convicts, the Warders and Deputy Jailor being present to preserve order. Nine-tenths of the convicts were utterly illiterate, and only

32 out of 1,007 could read fluently. The Rajahmundry Jail school is rather more advanced, 51 convict teachers conducting the classes; 24 of these, however, employed in teaching the alphabet classes could only manage to read short sentences with difficulty, and do a little in mental addition and subtraction. The remaining 27 were men of better education, and some knew English as well as their own vernacular. As to their pupils the highest class could only manage the First Telugu Reader, and by no means all of them were acquainted with the four simple rules of arithmetic.

81. In G.O., 19th November 1875, No. 2,233, the views of Government with respect to elementary education were stated at some length, and a plan sketched for a large extension of primary instruction based on an increase of the existing number of Municipalities and some additional taxation. The scheme was referred to the Board of Revenue who called for the opinions of the Presidents of Local Fund Boards. These opinions have been summarized by the Board, and are, with very few exceptions, hostile to the proposed scheme. The general feeling seems to be that education is spreading surely if slowly, and that to impose additional burthens upon the people would be unwise. The change in the condition of the country since 1875 is of course a powerful argument against the proposed scheme, but even if the prosperity of the country had not been so grievously impaired by the recent distress, it might still, I think, be doubted if any great or sudden extension of our educational operations were advisable. The old paradox, *Festina lente*, seems specially applicable here; by the first word I understand in this connexion that we should be earnest to use to the utmost the means we have at our disposal, and to endeavor to make every Rupee spent as productive as possible, but that the second word warns us not hastily to set on foot large projects of extension before we have a supply of good teachers, and, above all, before we have the money to pay them with, without calling upon the people for fresh sacrifices. I am far from meaning that we should stand still, or rest content with what has already been accomplished; but I think we may rely upon natural growth if only we take care to sow good seed. Further, I believe that something might be done in the way of extension, even with our present resources, if our means were more carefully husbanded and their distribution in some respects readjusted. For instance, in the last three annual reports a list of schools aided on the salary system has been given in which the fees and the Government grant together exceed the total cost of the school, and the managers enjoy the surplus. This cannot be necessary, nor was anything of the kind contemplated when the proportion of the grant to the teacher's salary was fixed. The revision of the salary grant system is, I believe, at present before Government, and my only reason for alluding to the subject here is to point out that a judicious curtailment of salary grants would set free funds which are urgently needed for certain special objects, such as female or Mappilla education, any additional outlay on which would probably produce most important results, but which cannot be vigorously prosecuted for want of the necessary funds.

VIII.—Female Education.

82. Reference to the table in the margin will show that there has been a fair increase both in girls' schools and in the number of pupils attending them during the year under report. That this should be so in such a calamitous year as 1877-78 has been to the greater part of the Madras Presidency is a signal proof—if any such proof were wanting—of the strong tendency to development that female education now shows.

Number of Girls' Schools and Pupils.

Schools.	1876-77.		1877-78.	
	Schools.	Girls.	Schools.	Girls.
Girls', Higher.	...	...	...	...
Do. Middle.	15	1,180	18	1,644
Do. Lower.	313	13,616	341	14,845
Total ...	328	14,796	359	16,489
Normal ...	3	141	3	185
Mixed, Higher	1	88	1	68
Do. Middle.	10	311	11	366
Do. Lower.	2,473	12,815	2,575	13,104
Total ...	2,484	13,214	2,587	13,538
Grand Total...	2,815	28,151	2,949	30,212

The increase during the year has been 31 schools and 1,693 pupils; and if we add to them the girls in Normal and Mixed schools, we find an increase of 134 schools and 2,061 girls. The increase is indeed barely half the increase recorded in last year's report, but that there should be so considerable an improvement or even any improvement at all in such unfavorable circumstances is matter both of wonder and of congratulation. In the last three years the number of girls attending schools under inspection has risen from 20,000 to 30,000, and the latter number does not include some hundreds of girls in the schools at Madras supported by His Highness the Maharaja of Vizianagram, which furnish no returns. In the 1st Division also there are many girls under instruction who are not included in our statistics. Mr. Kershaw says on this subject: "In reality the town of Vizagapatam is well provided with girls' schools; there is Mr. G. L. Narasinga Rau's with nearly 200 pupils, a London Mission school not under inspection, and a large Roman Catholic Girls' school not under inspection. Then there is the Protestant Orphanage with several girls, but none of them appear in our returns." It is a satisfactory feature also that of a total net increase of 2,061 girls no less than 519 should be due to schools of the Middle Class. The Doveton Protestant Girls' school is the only school of the Higher Class under inspection, and that is classed as a Mixed school, because it contains a few little boys. The classification of girls' schools, though somewhat improved, seems still to need considerable revision. The Madras schools contribute largely to the Middle Class list, and of them Mr. Duncan writes as follows:—

"In this section the classification given by the managers has been adopted; it is, however, exceedingly arbitrary. The Wesleyan Mission school, Broadway, the Davidson Street and the Presentation Convent schools are as much Higher Class schools as the Doveton Girls' school. The Free Church Mission Branch (Girls') school and the school at Trivellore have now fallen to the Lower Class whatever they may once have been,

while the Free Church Mission Chetty school, two or three of the London Mission schools (including the Boarding school, Vepery), and St. Matthias' school, New Town, are fit to rank as girls' schools of the Middle Class. A regular system of classification based on the standard reached by the highest class in each school seems very desirable."

83. With one slight exception, all classes of the community are making progress in female education, but the increase is greatest among Native Christians, both absolutely and relatively; the exceptional character of the past year is perhaps the cause of this also, for in schools maintained by Missionary Societies where the children are often housed and fed as well as taught the painful effects of the late famine would not be so severely felt. The slight exception to the general increase will be found under the head of Europeans, who have again fallen a little short of the numbers of the previous year. Among the Hindus only nineteen were Uriya girls, but this number, small as it is, is relatively a great advance upon the two previous years, when the numbers were four and two.

Nationality of Girls under instruction.

Nationality.	1875-76.	1876-77.	1877-78.
Hindus	12,431	16,448	17,335
Native Christians ...	7,515	7,956	8,990
East Indians ...	2,128	1,781	1,872
Mahomedans ...	908	978	1,017
Pariahs	543	730	751
Europeans	264	251	236
Parsees	4	7	11
Total ...	23,793	28,151	30,212

84. In the following statement the schools are classified according to the agency by which they are managed. An abstract of this statement is given in the margin.

Classification of Girls' Schools.

Agency.	1876-77.	1877-78.
Government	1,682	1,592
Missionary and Religious organizations	15,619	18,127
Others	10,850	10,493
Total ...	28,151	30,212

It will be observed that in Government schools and "others," the attendance has slightly declined, and that the whole increase is due to schools belonging to missionary and religious organizations; the probable reason of this has been stated in the preceding paragraph; in times of distress the Mission schools offer a refuge as well as a place of education.

85. The statement in the margin shows the districts to which the girls belong. There is a falling off in six districts—Malabar, Chingleput, Coimbatore, Vizagapatam, Cuddapah, and Kurnool. Godavari has again made a considerable advance. This district, which three years ago stood thirteenth on the list, now ranks as fifth; Ganjam, which used to be always last, now stands above the Nilgiri District, and the three Ceded Districts.

86. It is perhaps somewhat anomalous that an examination at first designed only for those who wished to become Schoolmistresses should be taken as a sort of test of relative efficiency for all the girls' schools of the Presidency; such, however, has gradually become the case, and until girls in large numbers follow Miss Gow's example and offer themselves as candidates for the Matriculation examination, or until some other examination is instituted specially framed to test the condition of girls' schools of the Higher and Middle Class, perhaps it is as well that this examination should be regarded in the light it is. At all events the examination is popular even though a fee is now exacted, and that the teaching in our girls' schools is more efficient than it was will appear from the increased numbers that passed this year in all the grades. The total of passed candidates at this examination has risen from 190 to 312.

d. Teachers.

The schools are arranged first as normal or non-normal, and the latter are further sub-divided into three classes, corresponding to the highest grade for which they have passed candidates. In the First Grade it will be observed that a large proportion of the successful candidates are teachers, and that only six schools, the Government Female Normal School, the Presentation Convent School, the Wesleyan Mixed Day School, Davidson Street Girls' School, the Lawrence Asylum, Ootacamund, and Christ Church Girls' School, Nellore, passed any pupils for the highest test. This however is an improvement, for last year there were only three schools so distinguished. For a complete certificate in the First and Second Grades two languages, English and a vernacular, must be brought up, and only four candidates have succeeded this year, a teacher in the Free Church Mission Poor School, Madras, in the First Grade, and three pupils in the same Society's Boarding School in the Second Grade. Last year there were only two complete certificates, one in each grade. Taking the passing of pupils as a test, the Government Female Normal School with its Practising School stands first with 19 pupils, but is closely followed by the Presentation Convent School with 17, the Sarah Tucker Training Institution, Palamcottah, with 16, the Wesleyan Day School with 15, and the Military Orphan Asylum and the Davidson Street Girls' School with 13 each. I have again to call attention to the total absence from this list of schools under Hindu management; the reason for this was given by Colonel Macdonald in last year's report, and Mr. Kershaw thus describes the state of things in his own division, which may be taken as a type of all the rest:—

"The great evil in all these schools is the very early age at which the girls are withdrawn; consequently they have little opportunity of acquiring anything beyond the lowest elements of reading, writing, and arithmetic. In some few schools we contrive to have the highest class

taught the compound rules, but the highest class seldom contains half a dozen girls, and is a minute fraction of the whole school. There is no school yet in which the test of a school fee has been applied; in several the children *receive* a fee, but in others they receive nothing, and *even find their own books.*"

87. No new schools were established by Government during 1877-78, and the Mahomedan Girls' School at Gudur still remains unopened. The attendance has risen from 519 to 590, and the Inspector's reports upon the schools, except in the 1st and 3rd Divisions, are as satisfactory as can be expected in the circumstances. Considerable progress has been made during the year in the way of substituting certificated schoolmistresses for the old and too frequently incompetent school masters formerly employed.

88. The number of Municipal girls' schools is also unchanged. The schools at Combaconum and Mayavaram are both very favorably reported upon by Mr. Bickle; both these schools are now under schoolmistresses, and have increased in strength and efficiency since they have been appointed. The remaining schools are not specially mentioned in the Inspectors' reports.

IX.—Professional Colleges and Technical Schools.

Law Class, Presidency College

89. The Law Class at the Presidency College continues to be well attended, and more than paid its expenses during the past official year. At the present rate of fee an attendance of 60 students will just cover the Professor's salary, but as in the second course of 1877 there were 65 and in the first course of 1878, 66 students, a small surplus remains. In consideration of this surplus Government have recently intimated their willingness to make moderate annual additions to the Law Library of the College. Nine students of this class obtained the B.L. degree on the results of the last examination. The Professor of Law, Mr. H. H. Shephard, left for England in February last, and his place was temporarily filled by Mr. J. H. Spring Branson, Barrister-at-Law. The only other Law Class in existence is that established at the Maharajah's College, Trevandrum, from which one successful candidate came this year, as already recorded; but as this class, though affiliated to the University, is not connected with the Educational Department, I have no means of ascertaining its condition, nor does it strictly speaking come within the scope of this report.

Madras Medical College.

90. There are two sessions at the Medical College, the winter session lasting from the 1st October to the 31st March, and the summer session from the 1st April to the end of June. The medical year not coinciding with the ordinary official year, this report never deals with the most recent medical examinations, whether of the College or of the University, as these all take place in the months of June and July. The following table compares the statistics of the last three years:—

Medical College.

Attendance and Results of Examinations.	1875-76.	1876-77.	1877-78.
On the rolls at the commencement of the Winter Session.	...	...	...
Senior Department	12	28	23
Second do. Hospital Apprentices	32	33	64
Do. do. Female Students	4	4	4
Junior do. Medical Pupils	68	82	63
Total ...	116	147	154*
Senior Department.			
Passed Second M.B. and C.M. University Examination.	...	...	...
Passed First do. do.	...	1	1
Passed First L.M.S. do.	...	...	1
Passed Preliminary Scientific do.	3	2	6
Second Department.			
Passed for the grade of Assistant Surgeon	...	...	1
Passed for the grade of Assistant Apothecary	7	9	9
Junior Department.			
Passed for the grade of Hospital Assistant	28	26	36

* Exclusive of two private students, who attended to qualify themselves as chemists and druggists, and two female students, who attended the chemistry lectures only.

Of the 23 students who formed the Senior Department at the beginning of the winter session all but two were private students. The number is somewhat less than at the corresponding period of 1876-77, but this is due to the restrictions temporarily placed upon admissions to this department of the college. In July 1877 one student passed the First M.B. and C.M. Examination, one the First L.M.S. Examination, and six the Preliminary Scientific Examination of the Madras University. After the examination of the senior classes of Apprentices and Native Medical pupils by the Final Examination Committee, one was declared qualified for the grade of Assistant Surgeon, nine for that of Assistant Apothecary, and 36 for that of Hospital Assistant. As usual several students of the college gave up their scholarships in the course of the year, and proceeded to England to complete their medical studies, and possibly to compete for commissions in the Indian Medical Department. The college authorities naturally regret the premature loss of their most advanced pupils, and the University Calendar presents a most meagre appearance as far as the higher medical examinations are concerned. There can be little doubt, however, that the young men themselves are gainers from the extended experience acquired by travel and residence in Europe, and that if they are thus improved, the people among whom they have to practise their profession after their return to this country are gainers also. It was with a view to retaining a few more of these men that both the Surgeon-General and the Principal of the college recommended that the fees to be paid for the latter years of a student's attendance at college should be smaller than those paid at first, and the scale proposed was sanctioned by Order of Government, No. 65, of the 14th February last. It has long been the practice to take small fees from casual students attending certain courses of lectures, but this order inaugurates a new system of fees for private students going through the whole college curriculum, and is indeed the most important event of the college history for the past year. Students for the degree of M.B. and C.M. will, after the 1st of October of the present year, have to pay an annual fee of Rupees 150 for the first two years of their college course, and of Rupees 100 for the last three; while students only wishing to qualify for the degree of L.M.S. will pay Rupees 130 for the first two and Rupees 100 for the last two years of study. In the former case, however, a sum of Rupees 500, and in the latter Rupees 400, may be paid in one sum on joining college, if the student prefers doing so.

From the numerous applications that have been received there is every reason to hope that a very considerable number of young men, many too of good social position in the native community, will come forward to avail themselves of the excellent professional education afforded by the Medical College; and if it be so, the Principal and Professors will soon have the satisfaction of seeing a good number of their pupils pursuing their studies to their legitimate termination, even though some are still attracted by the pleasure and profit to be derived from a visit to Europe. The number of female students on the 31st March was five, four of whom were on the point of finishing their college course. They have since passed with great distinction, but their examination, as stated before, does not fall within the period at present under review.

At the commencement of the official year Dr. Dickinson was acting as Principal, but he was relieved on the 17th April by Dr. Rean, who in turn gave over charge of the college to the permanent Principal, Dr. Furnell, on the 6th October. The only other change to be recorded is the appointment, on the 27th March, of Surgeon A. M. Branfoot, M.B., as Assistant Physician, General Hospital, and Professor of Hygiene at the Medical College. Dr. Branfoot, however, continued to act as Resident Surgeon, General Hospital, and Surgeon T. K. Rogers, M.B., took up his duty.

91. The session of the Civil Engineering College begins in the first week in August, and the table in the margin shows the strength of the institution at the commencement and close of the last three sessions. The following statement gives the attendance at the end of each session and the chief features of the working of the institution.

* Includes 1 who appeared for the second time.

Looking at these statements it will be observed that the chief characteristic of the last session is the small diminution in numbers during the year. In 1875-76 the numbers fell from 208 to 152, in 1876-77 from 191 to 141, but in the last year only from 184 to 173. This is a very satisfactory feature, as it seems to prove that the students as a body were both more competent and more determined to make civil engineering in one or more of its branches the business of their lives.

Three men were examined in December for certificates of qualification as Assistant Engineer; two passed, one with credit and the other just securing the minimum, and the third failed. The first-mentioned, S. Venkatarama Aiyar, B.A., also obtained the degree of B.C.E., but the other two failed. A former student however who had failed in one subject in the previous year was also successful on this occasion. The first class of the Second Department is described as a very fair average class, with some remarkably good men at the head of it. Of 29 students 24 passed and received certificates of qualification, four as Supervisors and the rest as Taluk Overseers. Mr. A. J. Tims stood at the head of the class. The second class is also said to be a satisfactory one, and 32 out of 42 students have been promoted to the first class. In the Survey Class seven pupils out of ten obtained certificates, and in the Drawing Class 23 out of 28 obtained certificates as Draughtsmen and Estimators.

From April to December Mr. Bradshaw, 1st Assistant in this college, acted as an Inspector of Schools, and his place was filled, first, as a temporary measure, by Mr. Cames and afterwards by Lieutenant Love, R.E.

An important change in the tenure of certain scholarships, which is likely to have a most beneficial effect upon the classes concerned, is thus described by the Principal:—

"The five civil scholarships of Rupees 7-8-0 per mensem, tenable for two years and awarded by open competition to candidates for the Overseer's class, were found to have the effect of introducing into the college, students who came simply for the sake of the stipend, and who had no natural aptitude for the special professional studies connected with engineering, nor indeed any inclination to apply themselves to them, for many of the holders of these scholarships were frequently nearly at the bottom of the class. These scholarships have been replaced by scholarships of Rupees 15 per mensem, tenable for the second year of the college course, and are to be awarded to those students who have during their first year displayed the greatest proficiency in their studies.

"This system has the advantage not only of securing students who really intend to take up engineering as a profession, but it has the additional advantage of acting as a stimulus for exertion to all the students of the class. The five scholarships of Rupees 7-8-0 per mensem, tenable for two years by Non-Commissioned Officers and Privates of the Queen's Own Sappers, having never been taken up since their institution in 1872, have been withdrawn, and they have now been converted into ten scholarships of Rupees 7-8-0 per mensem tenable for one year, of which five are to be distributed to the Surveying Class and five to the Drawing Class, and they are to be held during the second year of study by those students who have made the greatest progress during their first year."

Colonel Rogers has more than once alluded in his reports to difficulties connected with the admission of British soldiers into the college,

and with the systematic employment of passed candidates; but the subjects are so important that it seems desirable once more to place upon record the Principal's views. Colonel Rogers writes as follows:—

"There can, I think, be little doubt, as I have more than once before remarked, that Commanding Officers of regiments and batteries are unwilling to allow men of superior abilities and character to join the college, upon the ground that the loss of such men would impair the efficiency of the corps to which they belong. Now there cannot be a more short-sighted policy than this, because, for every man who holds a good regimental position and performs its duties well, it is absurd to suppose that there are not half a dozen others equally good and efficient, ready and eager to fill it; and by compelling the incumbent of an appointment to retain it, and so prevent his further advancement, simply because he has made himself so useful in it that it is thought that his services cannot be dispensed with, is to make the man himself thoroughly discontented, and to take away from others the incitement to industry and good conduct which the hope of promotion always produces. I hope that in future no British soldier with the requisite character and capabilities will meet with any difficulty in obtaining permission to join the college, and secure for himself the high position in the Public Works Department which the Government offers to the steady, industrious, and capable men of his class.

* * * * *

"Under the regime of General Walker, the late head of the Public Works Department, who took a great interest in the students of the first department, all B.C.E.'s were sure of rapid advancement if they were found deserving of promotion. The practice adopted by General Walker was to appoint each B.C.E., with the exception of the senior of each year, to the post of Overseer of the 3rd Grade, and then, if he were favorably reported upon, to advance him rapidly to the higher grades. Accordingly an inspection of the Public Works Establishment list corrected up to April 1877 shows that no student who had taken his B.C.E. degree, nor even any one who had obtained a certificate of qualification as Assistant Engineer, was then in a lower position than that of a 1st Grade Overseer, permanent or temporary, and every B.C.E. of 1874 was made a Supervisor before the end of 1876, or in less than three years, so that there can be but little doubt that these students of the first department held a good reputation for character and acquirements.

"I do not think, however, that it is right that the status of the students should be made to depend on the personal views of the Chief Engineer, but that it should be settled by some fixed rule. The class of students who enter the first department has of late very much improved, and many B.A.'s now join it; and many of these graduates are not only superior in intellectual attainments, but also in social position; and in the interest of the Public Works Department it is highly advisable to encourage as much as possible this class of students to enter the college to study for their B.C.E. degree with the view of entering the department.

"Now, if the rule be established that every B.C.E. is to enter the department as a 3rd Class Overseer, and be promoted to 2nd Grade Overseer after three months' service, and 1st Grade Overseer after another three months (subject, of course, to a favorable report from their superiors), and that their diploma should also carry a claim to further advancement according to their efficiency in the discharge of their duties, I believe that the collegiate department will greatly increase, and a very high class of subordinates be secured for the Public Works Department.

"Of the three B.C.E.'s of the session preceding the present one, two obtained employment almost immediately after taking their diploma upon famine relief works, with pay and allowances of Rupees 210 and Rupees 240 respectively. Both, I have been given to understand, executed the duties entrusted to them in a highly satisfactory manner; one is still engaged on famine relief work, while the other, owing to the closing of the work on which he was employed, has had to subside into the rank of a 3rd Class Overseer.

"The question of the status of the senior B.C.E. of each year has not been definitely settled. One is now an Assistant Engineer of the 3rd Class.

"One who gained higher honors than any of his predecessors, taking a first-class B.C.E., was made a Supervisor, 2nd Grade, and, being a Tamil man, has for a long time served in a Telugu district by no means famous for its salubrity.

* * * * *

"The appointment of passed students to the post of Taluk Overseer is still left to the District Engineers, and the students have to obtain their first appointment to the Department of Public Works by soliciting District Engineers, or probably, in many instances, by securing the favor of some subordinate in the District Engineer's establishment.

"This system, as I remarked in my report last year, is highly objectionable, and I believe is one which is not followed in any other department, and such important appointments should not be distributed by the personal favor of individual officers, but should be made solely by the Chief Engineer. A list of students, with the marks they have obtained in each subject of study at their final examination is submitted every year to the Chief Engineer; this list enables the Chief Engineer to judge of the qualifications of each student, and, what is of great importance, informs him of the vernaculars with which he is acquainted. The appointments should be given according to seniority, and the choice of districts should, I think, be allowed to the senior students. Under the present system of personal interest it not unfrequently occurs that the worst students get the best places, and not only that, but they obtain appointments before the senior and more deserving students, and thus pass over their heads in the department.

"Under the present system it also happens that Tamil men are sent to Telugu districts and Telugu men to Tamil districts, and their ignorance of the language and the people of the district in which they are employed must very seriously impair their efficiency."

School of Industrial Arts.

92. The School of Industrial Arts appears to have made some progress during the year: the attendance has steadily increased month by month, and in the last month of the official year there was an average attendance of 100 in the Artistic branch. In September Mr. R. F. Chisholm relieved Major Hunt of the charge of the institution, and some changes in system have since been made, which are thus summarized by Colonel Macdonald when forwarding to Government the annual report of the Superintendent:—

"In the Artistic Department a girls' branch has been opened, and the course of study has been reorganized on the model of the South Kensington course. As yet only seven students have passed the lower standard of the simplest examination, but there seems some probability of greater results being produced hereafter. In the Industrial Department some important reforms have been made. Two new branches of industry have been introduced, viz., enamelling glass and decorating in oil color, and two others,

metal work and wood-carving, have been revived. In pottery the dry process hitherto used has been found to be a mistake, and is to be replaced by the wet process. The Artistic and Industrial Departments have been amalgamated, and it is hoped in a year's time to supersede all paid labor, retaining only the foreman and preparers of rough material. On the whole the School of Arts seems to be in a more promising condition than it has perhaps ever been."

The scholarships alluded to in last year's report do not seem to have fallen into the most worthy hands, for Mr. Chisholm remarks that the three scholars all competed at the simple examination already mentioned, and that they all failed.

School of Ordnance Artificers.

93. A report furnished by the Assistant Superintendent of Factories in charge of the Gun Carriage Factory gives some details of the School of Ordnance Artificers. As the report was printed *in extenso* last year, and as several paragraphs of the present report are identical with those for 1876-77, I need only remark that the number of students on the rolls has fallen from 65 to 63, that only two pupils were enlisted during the year, but that the vacancies caused by removal, desertion and death, have been filled up mainly by artificers from out-station arsenals. As far as education is concerned there is no change to report.

Industrial School, Black Town.

94. This institution has been going on steadily with its work, though no remarkable incident has occurred in connection with it. The report of the committee appears in November, at the conclusion of each year of the school's existence, and the following extract is made from the most recent report:—

"The Committee of the Industrial School have not much to report on concerning the school for the past or third year of its existence. It has held its own, and little more, but it is believed that much more progress would have been made save for the food relief so freely given during the famine to the class (among others) for whom the school was intended.

"The lads who attend the school are well fed, but they have to work for their food and to be under discipline for eight hours each day. When the free outside distribution of food to all who asked for it commenced, many who had attended, and others who would have sought admission into the school, preferred the bread of idleness. This was to be expected, and it is only a matter of surprise that, with the opportunity of getting food *gratis*, more than fifty lads should have elected to earn their bread by serving in the school. This seems hopeful. Three years ago, when the industrial training was started, at a time there was no outside food relief being distributed, it was found difficult to gather 50 lads together.

At the instance of Government the Committee last year resumed their original plan of giving elementary literary instruction to all the lads. Each gets his lesson in reading, writing and arithmetic in addition to his industrial training."

At the time of the report there were 55 boys at work, carpentering and book-binding being the employments of the majority; 10 boys were learning shoe-making, 8 blacksmith's and 2 rattan-work. The number at the close of the official year had advanced to 60, an increase of 17 upon the attendance reported on the 31st March 1877. This school is the only institution that owes its existence to the movement of 1875 in behalf of poor Eurasians and Europeans. This Presidency, however,

stood less in need than some others of the establishment of special schools for these classes, the existing accommodation being fairly sufficient even for increased numbers of pupils.

School of Agriculture.

95. The prospectus of the new School of Agriculture at Saidapet was printed in the Public Instruction Report for 1875-76, and copious extracts from the first report on the working of the school will be found in that for 1876-77; there is, therefore, less necessity for treating this subject, important as it is, in such great detail on the present occasion. The report for 1877-78 has not yet been published, but, by the courtesy of the Acting Superintendent of Government Farms, I have had an opportunity of seeing the proof-sheets, and am thus enabled to give a summary of the progress and present condition of this useful institution. Though the report is called "The Report of the School of Agriculture," in the body of the report the institution is invariably styled "the College," and I have therefore adopted the same term in this paragraph. The annual college course consists of two sessions, the summer session from the 1st April to the 30th June, and the winter session from the 1st September to the 31st March. The report accordingly includes the summer session of 1877 and the winter session of 1877-78. In the former the names of 30 agricultural students and 20 Normal School students were on the college rolls; in the latter the numbers were 29 and 23 respectively. The instruction embraced lectures and examinations on agriculture by Mr. Robertson, on veterinary science by Dr. Western, on chemistry by Mr. Hamilton, on arithmetic and book-keeping by Mr. C. H. Tambu Pillai, and on mensuration and surveying by Mr. T. V. Sitarama Mudali. In addition to these in the summer session Dr. Keess lectured on zoology, and in both sessions Mr. Wilkins on botany. Besides the lectures delivered in the college, there were field classes for agriculture, botany, and surveying. From the reports of the teachers the conduct of the students appears to have been most satisfactory, and in many instances testimony is borne to the interest displayed by them in their work. An interesting set of tables is drawn up by Mr. Robertson, in which the agricultural students are divided into three classes, corresponding to the three different modes in which the pupils entered the college. These three classes are (1) undergraduates of the Madras and Bombay Universities, (2) men who passed the Uncovenanted Civil Service General Test Examination or an equivalent examination in other Presidencies, and (3) students admitted on passing the entrance examination of the institution. The marks obtained by these students in the three sessions during which the college has been open are then given, and the result is a most striking superiority in the case of students of the first class: they obtain an average of 75 per cent. of full marks, while those in the second class obtain only 57 per cent., and those of the third 51 per cent. "The only complaint," says Mr. Robertson, "the lecturers ever made of the students, is that a few of them (those admitted under the Entrance Examination Rules) are not sufficiently well educated to be able to follow the lectures."

It is a curious fact that the best man of the second class would have been last but two, and the best man of the third class would have been last but one, if ranked among the undergraduates. A superior preliminary education seems, therefore, to be as desirable in the Agricul-

tural, as it has always been declared to be in the Medical College, and students of this description should be encouraged to join as much as possible. Mr. Robertson adds :—

"The education given in the college is unavoidably costly; it is therefore decidedly the best policy to admit to its benefit only those who are really competent to benefit fully from the instruction given. The education of the general agricultural population can be undertaken afterwards by employing in the work the men who have undergone a competent training in the college."

Among recent improvements Mr. Robertson notices the erection of a laboratory, the formation of botanical grounds, the completion of the cottages for the occupation of students who desire to reside on the farm, and the establishment of a gymnastic class. The library also is reported to be much used by the students.

The Normal students do not seem to have learnt much of agriculture during the sessions under report. The fact is that the sessions of the college and the periods during which the Normal students are under training at their own institution do not harmonize, and cannot, I fear, be made to harmonize. The result is a most desultory attendance on the part of this class of students, with its usual consequence of unsatisfactory progress. The Principal of the Normal School also complains that the early hour at which the students have to leave him to go to Saidapet interferes with the working of his institution, and altogether I fear that the attempt to give these men a knowledge of agriculture has not been a success and can hardly be made one.

Though much has been done to improve the educational appliances of the college, the principal building appears to be most unfit for the purposes to which it is devoted. Mr. Robertson again brings this to notice in the following terms :—

"The college itself, however, is still housed in the highly inconvenient manner described at paragraph 15 of the last report. From this cause its work suffers in various ways. From the great heat in the lecture-room during the day we have been forced to confine the lectures to the morning and evening, which interferes to some extent with the out-of-door duties of the students; and from the very limited accommodation available, it has as yet been impossible to admit another class of students. The consequence of this will be a break of at the least two years between the first and second classes, assuming that arrangements will be made to render it possible to admit a new class in September, which now seems unlikely.*

"I have repeatedly pointed out the urgent needs of the institution as regards accommodation; a large annual expenditure is now being incurred for salaries, stipends, &c.; from this expenditure the best results cannot possibly be secured under the present circumstances of the institution. As noticed in my last report, the plans and estimates for suitable buildings were long ago sanctioned, and the funds needed are forthcoming. If this institution is required—and it is almost universally admitted that it is very urgently needed—the least that can be done for it is to provide it with such

* Orders were received on September 1st to admit a second class without delay, but still no provision has been made for adequate accommodation.—(Signed) C.B., *Ag. Supt., Govt. Farms.*

house accommodation as will admit of its work being conducted under satisfactory conditions."

The cost of the institution during 1877-78 was Rupees 19,916-3-3, but this sum does not seem to include any portion of the salaries of Mr. Robertson or his assistants.

X.—Normal Schools.

Madras Normal School.

96. The following statement compares the strength of the Normal and Practising Departments of the Madras Normal School for the last five years. The most striking feature of the comparison is the increase that has lately taken place in the strength of the former, combined with a serious decline in the case of the latter. The increase in the number of Normal students is no doubt mainly attributable to the preference now given to trained teachers in all Government schools; permanent appointments being at the present time almost entirely confined to persons of this description. The great decline in the Practising School began two years ago and has continued ever since. It has been attributed to the unfavorable situation of the school, but this cause has always been in operation, and in my opinion does not account in any sensible degree for the facts of the case. I think it is much more probable that there is a growing dislike on the part of parents to send their children to be operated upon for the most part by raw young teachers, when there are schools in the immediate neighborhood, and good schools too, officered by permanent masters. With a view to stop this decline the Acting Inspector has suggested the formation of a matriculation class, but I am strongly disposed to think that there would be more difficulty in properly filling a matriculation class than the already existing lower classes, as the higher you go the more necessary it is to have skilled instruction. Of course this new class might be almost solely placed under one of the permanent teachers attached to the school, or, as Mr. Duncan suggested, under a new master; but if so, it would be valueless as part of a practising school, and would have no *raison d'être* whatever. Mr. Duncan's view is that if boys knew that they could continue in the Practising School up to matriculation, they would be more likely to join the lower classes, and in some few cases this consideration would probably have its effect; but I see no prospect, while the school is where it is, of anything like a strong matriculation class, and a weak one would be both expensive and useless:—

Department.	31st March 1874.	31st March 1875.	31st March 1876.	31st March 1877.	31st March 1878.
Normal Department ...	20	18	21	19	28
Practising do. ...	155	172	181	120	113
Total ...	175	190	202	139	141

On the examination of the Normal students in December last, Mr. Duncan has the following remarks:—

"Twenty-five students in all were examined for certificates, viz., four graduates, three First Arts men and eighteen Matriculates; of the graduates three passed in the first class and one in the second; of the F.A. men two passed in the second class and one in the third; and of the Matriculates two passed in the first class, fifteen in the second, and one only in the third. Thus all passed, and the general result was satisfactory. Most of the students went through the work required of them in a quiet and natural manner, and taught with considerable intelligence. The test applied was a severe one. I chose a passage out of the class Reader and required the student before me to teach it. The graduates taught the fourth class, the highest available; the rest taught the second and third classes.

"Sixteen of the students were Tamil-speaking men, of whom three knew Telugu also; five were Telugu men, of whom four knew Tamil also; and the remaining four were Malayalam students, sent to the school for six months' training by Mr. Sealy, Director of Education in the Cochin State. One of the Malayalam students, a graduate, passed second in the list.

"On the second day of my inspection I heard a criticism lesson given by one of the graduates. The subject was arithmetic, and the lesson was a very fair one. The critical remarks made upon it afterwards by the students showed that they had profited by their course of training.

"The note-books of the students were neatly kept; the critical notices of lessons were full, and in most cases contained matter of permanent interest to the writers."

The following extracts are taken from the report of the Acting Principal, Mr. Morgan:—

"In addition to the ordinary students, the Superintendent of Army Schools sent in six men who had been for two and a half years previously trained in the Bangalore Training School for Army Schoolmasters. These men are to remain for one session only to obtain a little additional and varied information and experience in school-keeping, and as I have found them attentive to and interested in their work, I hope and believe they will be greatly benefited by their attendance.

"During the year the undergraduate students attended the Agricultural College twice a week, except when that college was closed, as this was, and as the vacations of the two establishments do not coincide, there were of course several months during which the Normal students heard no lectures on this subject; so that on the whole, I am afraid the amount of information that they gathered on the subject was so small and fragmentary, and in some instances so technical, that it will be of very little practical value, notwithstanding that the lectures were so well given as to secure the interest of the majority of the students.

"The lectures to the Normal students are given between 4 and 6 o'clock; and as the Agricultural College is so far out of town, this necessitates their leaving the Normal School in the middle of the afternoon, thus interrupting the work of the school very considerably twice a week. The Normal student who stood highest in Mr. Robertson's examination was A. Nagesvara Aiyar, F.A., to whom therefore I have awarded a prize."

"In February, availing myself of the services of the Military Normal students, I commenced drilling the boys of the upper classes for half an hour once a week after school hours, and after the other Normal students had thus had an opportunity of witnessing the thing, I devoted another evening each week to their drill. I have thought it advisable not to ask for

sanction for the purchase of apparatus, as we have hitherto not advanced beyond Maclaren's Dumb-bell Exercises, and for these I have found bottles containing sand a cheap substitute."

Working of the Mofussil Government Normal Schools.

97. The following statement shows the leading features of the working of the Mofussil Government Normal Schools. No change in their number has taken place during the year, and the total strength of the schools both in the Normal and Practising Departments is almost without variation.

Institution.	31st March 1877.		31st March 1878.		Registered for Examination.		Passed.				Appointments.

a Ex-student. *b* Of these 3 are ex-students.

Vizagapatam Normal School.— "This institution," says Mr. Kershaw, "is intended to train higher-grade men, but the vacant scholarships cannot be filled, and of the few men who apply for them fully 50 per cent. are of such inferior attainments—being the mere dregs of the Matriculation and First Arts lists—that the expenditure of Government money upon them is sheer waste." In another letter Mr. Kershaw writes as follows:—

"There is no denying the fact that the Normal School here has never been a popular institution as a Normal School; it has never attracted good men to it, and it is painful to see the inferior men from this school that I have under me in the 1st Division, whom I am bound to employ because they are trained men. Its unpopularity is entirely independent of *my*

opinion of the utility of Normal Schools, and may be variously accounted for. Mr. Joseph gives me some reasons, and I have others of my own, which perhaps might be misinterpreted as personal if I were to give expression to them. In conclusion, I must bear testimony to Mr. Joseph's zeal, labor, and intelligence in his up-hill work of trying to make this school popular, and in trying to make it an attractive and an efficient training institution. If he has failed, I am confident that few other men could have succeeded. The whole appearance of the place is altered; the several classes wear an air of life and business very different from the listless dead-alive aspect which I always noticed before. This opinion I find is not confined to myself."

Narsapur.—This school, which is in connection with the Central School, Narsapur, was inspected by Mr. Kershaw in September last, and made a very unfavorable impression upon him. The most barbarous modes of working multiplication or division sums seemed to find the most favor; neatness and order were neglected, and the teaching generally, if it could be called teaching at all, was of the most mechanical and lifeless description. Of one teacher, a Fourth Grade man, Mr. Kershaw remarks:—

"The smallest amount of bodily and mental exertion both to himself and pupils seemed this young man's notion of perfection in teaching."

The following picture is drawn of another student:—

"One man, a Fifth Grade student, was teaching Indian History part of the time, and apparently arithmetic the other part; but for the two hours I observed him he never once rose from his chair till just about five minutes before the school closed. His questions were put in the usual desultory, dreary manner, and the boys bawled out their answer at the top of their voice. Apparently he saw nothing that occurred in the class, for he never reproved a boy for disorder, and there was no little. Every boy, except the one actually questioned, seemed to do as he liked till his turn came again. One spent the greater part of the time in tying and untying his turban; another, who wore a kind of jersey, amused himself the whole History hour in working it over his head and back again; here and there two were engaged in private conversation; one had his feet upon the bench, another had his arms stretched out behind his neighbours on the desk behind Not only was the tone of voice objectionable in which the questions were answered, but the attitude of the answerer was as bad, generally either swinging his body from side to side or swaying his arms about semaphore fashion. There was a map hung up during the History lesson, but it was never once referred to."

Great want of regularity and punctuality appears to be another characteristic of this institution. Mr. Kershaw writes:—

"I consider that Normal masters and students are bound to be models of punctuality and regularity of attendance. The attendance of Normal students here has always been most irregular. I have written about it and lectured about it with no result, but I have reduced it a little by insisting that every student who absents himself without leave and without sufficient cause should forfeit the full stipend for all such days, but many disregard this penalty. Mr. Vyapuri tells me that it is not at all an uncommon thing for a student to go to his home in some neighbouring village on the Saturday and return on Tuesday, Wednesday, or Thursday instead of on Monday. And he also informs me that *all* the Normal masters are very

unpunctual, generally coming five or ten minutes after time. I have directed him to send me a monthly statement of all such irregularities in future."

An institution of this sort can do very little towards improving elementary education in its neighborhood, and though steps have been taken by changes among the Normal masters and other means to improve the status of the school, I think it will be found that it is a mistake to expect good results from Normal masters or schools of this type.

Russelkonda.—At this place also there is only a Normal class and not a Normal school. It is designed mainly to train Uriya masters for elementary schools. From what Mr. Kershaw says it seems probable that the supply of trained Uriya masters will before long exceed the demand.

"All the hill schools," he writes, "are, I believe, now fully officered, and there is only one master that is uncertificated. I anticipate it will not be so easy to find appointments for the future passed students, as vacancies will now not occur so fast as to absorb the available men."

Trichinopoly and Vellore.—On these schools Dr. Bradshaw has the following remarks:—

"The cause of the admitted failure of the Mofussil Normal Schools and of these two in particular, I believe to be because they were so purely *local*, and this was in a great degree owing to their not being under the Inspector of the Division. The mode of admission was by means of an examination, held by the head-master, of candidates who responded to an advertisement in the District Gazettes. But the great majority of these belonged to the town itself or the neighboring villages, and so it was mostly inhabitants of the place that were passed out trained and certificated; and though some might be tempted by a good salary to go to the other districts, for small salaried posts at a distance from Vellore or Trichinopoly, Normal students were not forthcoming, as Rupees 10 is a very different income in a man's own village and in another district, to which he would have to bring some members of his family. Again, in Trichinopoly especially, the practice appears to have been for many of the Fourth Grade class (the subjects for which nearly come up to the Matriculation standard) to be at the same time preparing privately for the Matriculation Examination, and on passing it they generally secured employment in some other department. It was natural too, that when Trichinopoly and Vellore were severally overstocked with Normal students who would not go to other districts, many of them should seek employment of a non-educational kind, and thus their training and the cost of it had been thrown away.

"That these two schools were not (even in the way described) availed of as fully as the stipends allowed of, is evident from the fact that in Vellore only Rupees 539-10-8 was drawn last year in scholarships, *i.e.*, Rupees 45 per mensem out of a sanctioned amount of Rupees 110; on the other hand, in the Trichinopoly Normal School, which had Srirangam and the S.P.G. High School to draw upon for students, Rupees 1,137-1-3 were expended in stipends. Again, at my examination in teaching power there were presented at Vellore but 4 matriculated students and 8 preparing for Fifth Grade, and at Trichinopoly 7 matriculated and 17 reading for Fifth Grade. At the Fifth Grade Examination 5 passed from Vellore, 4 in the first class, and from Trichinopoly 11, of whom 7 were in the first class.

"Shortly after I took over charge of this Division I addressed you on the subject of the Normal Schools, and proposed that matriculated men should be trained in the Madras Normal School only and not in the mofussil schools, which should be for training the teachers of elementary schools and preparing them for the Fifth Grade Examinations; also that a

Telugu Normal School should be opened at Tripatty (*vide* Proceedings of 10th January and 10th March). This latter proposal awaits the sanction of Government, but in the Vellore and Trichinopoly schools the Normal classes now consist of students to be trained as teachers for lower class schools, and taught the subjects prescribed for the Fifth Grade. The full number of stipendiary studentships are filled up, about-two thirds of them by men already employed as teachers in Local Fund Board or Results schools in the several districts of this division, and nominated by myself or the Deputy Inspectors. Masters sent for training from other districts get stipends of Rupees 5, others Rupees 4, and unemployed men Rupees 3. But as these changes took place only just before the close of the official year, a report on the working of them will appertain to the history of 1878-79."

Normal Schools, Sixth Division.—Of four schools in the Sixth Division, those at Calicut and Mangalore are designed to train Matriculates and First Arts men, as well as to prepare candidates for the lower Grade Examinations, while those at Palghat and Tellicherry are intended for the class of Pyal Schoolmasters, and confine their operations to preparing men for the Fifth Grade Examination only. Mr. Garthwaite reports favorably of all these schools except Mangalore, but even in the case of this school Mr. Garthwaite pleads strongly against any idea of reduction. He attributes the falling off in the higher class of students chiefly to the abolition of the house-tax in South Canara, and the consequent reduction of the funds at the disposal of the Local Fund Board. The majority of the middle-class schools had to be closed, and so the openings for trained Matriculates and First Arts men became few and far between. The natural result was that few of these men came forward to be trained. Mr. Garthwaite considers that the present prospects are brighter, but why this is so is not very plainly stated. A resolution of the Local Fund Board is however quoted, which strongly deprecates any lowering of the standard of the school, and states that proposals are now under the consideration of the Board, which, if adopted, will open additional appointments to trained Matriculates. Further the Local Fund Board and the Inspector both believe that Canara will not send men in sufficient numbers, whether for general education or training for special professions, to distant places. As a matter of fact, Canara is and has been for several years very fairly represented in the B.A. Classes of the Presidency College, and several natives of this district have been, or still are, members of the Law Class. I think it would be just the same with regard to Normal training if only Colonel Macdonald's scheme were thoroughly carried out and men assured of an appointment before they had to make the journey to Madras. The people of the Western Coast have lost the terror they used to have of going to what they call a foreign country, and as to the Malayalis, I have no doubt that the young men themselves would regard a stay of nine months or so at Madras as a sort of pleasure trip more than anything else. Only if sufficient numbers are to be attracted, the prospect must in each case be a certain one. Of the Calicut Normal School Mr. Garthwaite gives some details, but they do not greatly add to the information already afforded by the tabular statement.

"In the Normal Schools for Pyal Schoolmasters, Palghat," says Mr. Garthwaite, "twenty-eight students were under preparation for the Fifth Grade Examination in December last, all of whom went up for the examination, 20 passing and 8 failing, the failures being attributed chiefly to

peculiarities in the dictation paper. * * * Of the 20 men who passed, 19 have opened schools of their own and one has been retained for a short time to help in the practising branch."

Colonel Macdonald also remarks that the school is attracting the right sort of men, and that it is satisfactory to find that some of them are going through the course, although they have as yet received no stipends. Of the similar school at Tellicherry Mr. Garthwaite writes :—

"The sister Pyal Normal School at Tellicherry, although a younger institution, has done equally well, perhaps better. Nineteen students were prepared for the Fifth Grade Examination, of whom 15 passed and 4 failed. Here again the peculiarities of one paper (arithmetic) are alleged as the cause of failure. Thirteen of the 15 passed my examination in "Teaching power;" two were unavoidably absent. The teaching of the students I thought very fair for their standing, as I did that of the Palghat men too. * * * On the whole I think that these two unpretentious little Normal Schools are two of the most practically useful educational institutions of my division."

Proposed changes in Government Mofussil Normal Schools.

98. In the preceding paragraph I have incidentally mentioned a proposal made by Colonel Macdonald for a change in the Mofussil Normal School system. Briefly stated it amounts to a reduction of the schools at Vizagapatam, Vellore, Trichinopoly, Calicut, and Mangalore to something like the status of the schools at Palghat and Tellicherry, and the concentration at Madras of all Normal training of University students from Matriculates to Graduates. The Director's views with regard to the employment and training of these latter are thus expressed in a recent letter to Government :—

"At Madras the Normal students, instead of being trained by Native or East Indian masters very little superior to themselves in general education, would learn method from a European Principal, and be trained in a practising school in which the subjects taught are more advanced than they are in any mofussil practising school. Of course the only vernacular languages taught in the Madras Practising School are Tamil and Telugu, but whoever the student may be, method is taught through the medium of English text-books and English lectures, and the principles of method apply to all instruction, whatever may be the particular language of the district. At present a Malayalam or Canarese graduate, if he is trained at all, is trained in the Madras Normal School, and there is nothing to prevent Malayalam or Canarese students who have passed the First Arts or Matriculation Examination being also trained at Madras. In fact during the past year 4 out of 25 trained men who passed out of the Madras Normal School were Malayalis, of whom one was a Graduate and three were Matriculates.

"It seems to me very important that only as many University students should be trained as are really wanted; that these men should as far as possible be the best men obtainable in the educational market; and that they should receive the best training available. Whenever a vacancy occurs or is about to occur in a Government institution, the officer whose duty it is to fill it up, should, I think, select the best man he can find for the post, appoint him provisionally, and send him to be trained in the Madras Normal School, making some temporary arrangement in the meanwhile. If the person selected refuse at the end of his training to take up his appointment, he should, I think, be required to refund the amount drawn by him as a scholarship, and be declared ineligible for any appointment under Government for two years. A similar course should, I think, be pursued in the event of his serving less than two years. After two years' service a simple

refund would be sufficient, and at the end of five years he might be allowed to leave the department without any refund. Similarly, with regard to University men for aided schools, I would train none but men selected and sent by the managers themselves with the promise of some particular post. In the event of the student refusing to take up his post at the expiration of his training, or abandoning it after a time, I would enforce the same penalties as in the case of students trained for Government schools. After a time the cost of these Normal scholarships might be shared equally by Government and the managers of schools, and eventually the latter might be expected to pay the whole cost of their own scholarships, but for the present I would put all on the same footing.

"Under the proposed system the career of a Normal student would no longer be the lottery which it is now. No student who conducted himself satisfactorily, would have any cause for anxiety regarding his immediate future. After passing he would have no excuse for discontent on the ground that he had failed to secure a post, or to secure a sufficiently well paid post. If inclined to be dishonest, he would have some hesitation about entering a Normal School when he knew that he would be unable, even by refunding, to obtain employment in any other branch of the public service. And those officers who dislike the whole system of Normal Schools would probably dislike it less if they found that they could after all get the men of their choice."

This important question was first raised in its present form by Colonel Macdonald's letter to Government of the 18th March last, so that its history belongs more properly to the current official year, and will be more appropriately treated in the next report.

Female Normal School.

99. The Female Normal School has made decided progress during the year. The Practising School being very thinly attended while the Normal School was located in Armenian Street, the institution was moved to Vurda Mootiappen Street, but, as was remarked in last year's report, the numbers did not increase as was expected. That increase has now taken place, 51 girls being in attendance against 33 of last year. The number of Normal pupils remains sixteen. Thirteen pupils went up to the Certificate Examination in December last and nine passed, all of them being placed in the first class of their respective grades. This is a most satisfactory result, and highly creditable to Miss Spence and to the pupils themselves.

Three ex-students of this school received appointments during the year each on a salary of Rupees 20.

The same excellence was apparent among the pupils of the Practising School. Out of sixteen candidates ten passed, all in the first class, two in the Second Grade and eight in the Third.

The Telugu Assistant in the Practising School also obtained a First Grade Certificate. The following extracts are taken from Mr. Duncan's report :—

"At my inspection of the school in December all the sixteen students were tested in teaching power. They all gave evidence of training, though their general style of teaching was marked by important defects caused by want of practice.

"Under G.O., dated 12th March 1878, No. 95, an important change was introduced into the system of admission of English-speaking students. This class of students is now admitted for training only after passing the Teachers' Certificate Examination. The change is already working well.

"A number of the elder girls from the Military Female Orphan Asylum continued to attend the weekly criticism lessons conducted by Miss Spence, and a part of the considerable success that institution met with at the last Teachers' Certificate Examination is due to this school.

"Three ex-students of this school received appointments during the year, one a Native Christian as a teacher in the Wesleyan Mission Boarding School, Royapettah, the second, a caste woman, was appointed Head-mistress of the Oosoor Girls' School, and the third, also a caste woman, became a teacher in a school in Tanjore; in each case the salary obtained was Rupees 20 per mensem.

Aided Normal Schools.

The Church Mission Training Institution is designed mainly to prepare pupils for the Fifth Grade Certificate, but a few study for the Fourth Grade. The results of the last examination were not satisfactory as to numbers, but the quality of the students must have been good as five out of the six who passed were in the first class. Mr. Fortey writes of this institution as follows:—

"I inspected this institution in February last and found fifteen normal pupils reading for the Fifth Grade and five for the Fourth Grade. I came to the conclusion that it was doubtful whether any of those reading for the higher grade would pass next December. From a return furnished to me I find that the charges (exclusive of the Practising School) amounted to nearly Rupees 4,000 for the year. Now as only 8 names were registered for the Fifth Grade Examination and none for the Fourth Grade, the results obtained do not seem at all commensurate with the expenditure."

All the pupils of the Dindigul Training Institution who appeared for the Teachers' Certificate Examination succeeded in passing, 13 out of 15 being placed in the first class. Mr. Bickle reports as follows:—

"The Dindigul Training Institution was examined on the 22nd and 23rd January 1878 with generally satisfactory results, both in the Normal Department and the Practising School; and though there were some peculiaritics in the teaching of some of the students, I was generally favorably impressed by the lessons that were given. The students who passed the written portion of the Teachers' Certificate Examination held in December last have not yet been examined in teaching with a view to the completion of their certificates.

"Mr. Yorke, the Principal of the institution, having proceeded on sick certificate to Europe at the end of January last, an additional master, a Fifth Grade man, was appointed to the school, so that now the work of the Normal Department is performed by two Fourth Grade and a Fifth Grade master. The institution is in charge of Dr. Chester as Acting Principal."

On the Palamcotta Institution Mr. Bickle has the following remarks:—

"The Palamcottah High School has amalgamated with its higher and middle departments for general education 30 Normal students, on whose account scholarships of the monthly value of Rupees 2-4-6 each are paid by Government. These students receive instruction in the theory and practice of teaching for five hours a week, and attend the Practising School attached to the institution in rotation in sets of three for a week at a time.

"Several of the students who passed the written test for certificates had left the institution for employment in various schools prior to the dates of my examination of them in teaching power, as for many years previously the practice of testing in teaching had been discontinued. Only seven students, therefore, were examined, all of whom passed and thus secured complete certificates, five for the Fourth Grade and two for the Fifth."

The Sawyerpuram Seminary has been already noticed under the head of Higher-class Schools.

"The Sarah Tucker Female Training Institution," says Mr. Bickle, "receives aid from Government at the rate of Rupees 60 per mensem in the form of thirty scholarships of Rupees 2 each. This institution sent up 17 candidates to the late Teachers' Certificate Examination, all of whom passed in the first class, four gaining Second Grade and thirteen Third Grade

Certificates. On the 6th and 7th March last 15 students, three of whom had passed the written portion of the test for Second Grade and twelve for Third Grade Certificates, were examined in teaching power with such favorable results that the whole fifteen secured complete certificates."

Six pupils of this school obtained employment during the past year on salaries ranging from 4 to 10 Rupees. The Practising School is aided on the results system, and is in a most satisfactory condition.

The Normal class attached to the Free Church Mission Girls' Day School was inspected by Mr. Duncan, and the following extract is taken from his report :—

"The Normal pupils receive stipends, and are bound to serve as teachers in any of the schools belonging to the Mission for three years after passing their examination. At the last Certificate Examination three of the pupils of this class passed, viz., one in the Second Grade and two in the Third. The student who passed in the Second Grade was in March a teacher on a salary of Rupees 12, and of the other two one was engaged in zenana teaching on a salary of Rupees 10 per mensem and the other was still in the class."

101. The table in the margin gives the general results of the Teachers' Certificate Examination. A considerable increase will be observed in the number of Fifth Grade candidates, and a still greater increase in the proportion passed: in the case of the Fourth Grade and Method candidates it is just the reverse. The fact is that Fourth Grade candidates are dying out ; they are not much in request as masters, and in many, if not in most cases, they are not now taught for the grade in Normal schools as they used to be. The vitality of the Schoolmistresses' Examination is surprising. The imposition of an examination fee appears to have had rather a stimulating effect than otherwise, for the numbers have steadily risen since it had to be paid. As already stated in the chapter on female education, this examination has accidentally come to be in effect a girls' school examination, and, when it is stated that 312 females have passed it, it must by no means be understood that upwards of 300 young women are ready to go forth every year to spread education amongst their uninstructed countrywomen. A large proportion of the 300, probably even the majority, are quite little girls who have a great deal of their own education to get through yet, and possibly not a tithe of the whole number will ever be teachers by profession. The following statement shows in detail the number examined and passed in each division and district:—

As far as the male candidates are concerned, the First and Fifth Divisions, and in them especially the districts of Ganjam, Godavari and Tinnevelly, show a considerable advance upon last year; the Sixth Division has passed 48 against 41, and the other divisions are either stationary or have retrograded. Cuddapah, Bellary, Nellore, South Arcot, Salem, and the Nilgiri District are wholly unrepresented, and Kurnool, Madras, Tanjore, and Coimbatore are only represented by one master each. The cause of this inadequate representation is generally the absence of elementary Normal Schools.

Again it will be seen that nearly two-thirds of the candidate mistresses, if they can be so called, come from Madras; Tinnevelly comes next, but not near; the Nilgiri District third. thanks to its Lawrence Asylum; while all the remaining districts pass fewer than ten candidates. Ganjam, Kistna, Cuddapah, Kurnool and Chingleput do not pass any at all.

XI.—Books.

Registration of Books.

102. From the report of the Registrar of Books it appears that there has again been a decrease in the number of works registered, and this year to a serious extent, the numbers having fallen from 759 to 637. The falling off is attributed by the Registrar "to the general distress caused by the terrible famine, which seems to have taxed severely the resources of printers generally and the native presses in particular." The works registered are classified below under the two sets of heads prescribed by the Government of India:—

First Classification.	1876-77.	1877-78.	Second Classification.	1876-77.	1877-78.
Books	364	278	Original Works	145	199
Pamphlets	321	281	Translations	10	50
Periodicals	69	74	Re-publications ...	604	388
Miscellaneous	5	4			
Total ...	759	637	Total ...	759	637

When these figures are inspected there is some cause for satisfaction; it is true that in the first table we find that the total number of books has greatly decreased, but a glance at the second table shows that the decrease is entirely among "Re-publications," and that there is a satisfactory increase in original works and translations. If this feature appears again in the returns of the current year it may, I think, be safely held that it is not due to accident, but that it is an indication of reviving interest and vitality in vernacular literature. The following statement shows the places at which the registered works have been printed and the number produced at each station:—

Order.	Towns.	English Works.		Vernacular, including Works partly Vernacular.		Total.	
		1876-77.	1877-78.	1876-77.	1877-78.	1876-77.	1877-78.
1	Madras	100	83	492	354	592	437
2	Mangalore	3	2	44	52	47	54
3	Tellicherry	...	...	7	49	7	49
4	Cochin	...	...	4	37	54	37
5	Calicut	1	...	15	18	16	18
6	Vizagapatam	1	...	9	16	10	16
7	Palamcottah	...	...	23	7	23	7
8	Tranquebar	...	...	3	3	3	3
9	Berhampore	...	...	1	3	1	3
10	Rajahmundry	...	...	...	3	...	3
11	Masulipatam	...	...	2	2	2	2
12	Cocanada	...	...	...	2	...	2
13*	Kotayam	...	...	...	2	...	2
14	Madura	...	...	3	1	3	1
15	Negapatam	...	1	...	...	...	1
16	Pulney	...	...	...	1	...	1
17	Tinnevelly	...	...	...	1	...	1

The most noticeable feature in the statement is the activity of the Western Coast presses as compared with all others in the Presidency except those in Madras itself. In a time of general decline Mangalore, Tellicherry, and Calicut show an increase, and Cochin has only fallen from the second to the third place in the list. Vizagapatam comes next to the Western Coast stations with 16 publications, and the work done at all the other places is insignificant.

The following statement shows the languages in which these books are written :—

Languages.	1876-77.	1877-78.

Syrian	...	1
Sanskrit and Prackrit	...	1

English books exhibit a falling off of nineteen works, but this is only about the average rate of decrease on the whole: the other changes are not very striking, except perhaps in Arabic. This language exhibits strange fluctuations; the total number of Arabic works and of Malayalam works in the Arabic character was in 1875-76 eighty; in the following year it declined to three, and in the year under review rose again to fifty. There is no book printed in Sourashtram this year, but there are two novelties —a work in Syrian and another in Marathi printed in the Nagari character.

It will again be observed that the great majority of the numerous Sanskrit works printed in this Presidency are in the Telugu character, and that not a single one is in Nagari; this is to be regretted, as greatly limiting the usefulness of these publications and their circulation in other Presidencies.

In the following statement the books are classified by subjects:—

Subjects.	1876-77.			1877-78.		
	English.	Vernacular.	Total.	English.	Vernacular.	Total.

Total ...	106	653	759	87	550	637

The Registrar remarks—

"The principal feature in this table compared with that of last year is a decrease under ten principal heads out of the fifteen entered. Of the total number of books 120 are *educational* in their aim and 517 *non-educational*, and 52 per cent. of the latter are religious."

The following books are named by the Registrar as the most prominent publications of the year:—"Hand-book of Common Salt," by Dr. Ratton; "Digest of Hindu Law," by Mr. Justice Cunningham; "Rediviva," a Drama by Mr. Justice Innes; an Essay by Mr. Nelson on the injustice of applying to modern Hindu society what is styled the Hindu Law as represented in Sanskrit writings; a Digest of the English Law of Easements, by Mr. Justice Innes; Practical Researches in the Code of Civil Procedure (author not mentioned); and the "Samhitopanishad Brahmana," by Dr. A. C. Burnell. These are all in English, but in Sanskrit he brings to notice the Jalárgala Sastram, an old work about the quality of soils and the best mode of sinking wells; the Dhayabhaga Kaumudi or the Hindu Law of Inheritance in Sanskrit, with a clear Telugu paraphrase of the Sanskrit text; the Paribashendra Sekhara, a well known text-book in Sanskrit; and the Laghu Sabdantha Sarvasva, being the first volume of a comprehensive Sanskrit Dictionary, with Sanskrit explanations and quotations. In Tamil he mentions the Pratapa Chundra Vilasam, based on the supposed adventures of a zemindar's son in Madras in quite recent days, the translation of Johnson's Rasselas, and the Paribhasha Tirathi, ascribed to Agastya, and treating partly of the Yoga system of Hindu philosophy and partly of alchemy and medicine. The list concludes with a Hindustani work, the "Ferozenama-i-Turk," an abridged Moslem History of the Ottoman Empire.

The Registrar again brings to notice the abuse of the option of registering copyright. It is of course open to authors and publishers

to register copyright or not, but if they do not they are hardly justified in printing the word "copyright" or "all rights reserved" on the title-page. It is true that merely printing these words without actual registration does not confer any rights upon the authors, but the public are not in a position to know whether registration has taken place or not, and will therefore naturally conclude that all requisite steps have been taken to acquire an exclusive right to the property. It seems quite time that this practical evasion of the law should be noticed and repressed.

Book Department.

103. The Curator of Government Books opens his report with a comparative statement exhibiting the principal features of the working of the Book Department for the last ten years. In the first quinquennium there was always a loss to Government more or less serious in amount, but during the second quinquennium there has always been a fair profit except in the year 1876-77, in which there was a loss of Rupees 4,598 owing to a clearance sale of books nominally worth nearly 11,000 Rupees, but which only realized at auction Rupees 457-11-3. Had the accounts been carried on in the usual way, this year would have shown a profit of about 6,000 Rupees instead of the loss mentioned above.

The nominal value of the Curator's stock at the end of last year was Rupees 1,40,364-6-8; on the 31st March last it stood at Rupees 1,56,235-5-8, to which must be added a sum of Rupees 7,007-5-6, the value of printing paper ordered out in large quantities to meet the expected increased demand in connection with the new Readers and other school books in preparation by officers of the Educational Department agreeably to the orders of Government. These works, however, have not progressed as rapidly as could be wished; the officers in question are all men with laborious daily duties to perform, and it can hardly be expected that they should proceed rapidly with extra work demanding the minutest care and attention; the work has also been retarded by the absence from India of more than one editor or compiler, and it is only now that these works are approaching completion and passing through the press. For instance, two works mentioned by Colonel Macdonald in last year's report as complete, are not at this moment quite ready for publication, though they will be very shortly. The number of books printed and published during the last two years is shown in the margin. The margin of profit is 95 per cent. against 55 and 66 of the two preceding years.

Years.	Copies.	Actual Cost.	Value.
		RS. A. P.	RS. A. P.
1876-77 ...	264,500	21,475 12 0	33,375 0 0
1877-78 ...	264,520	18,169 13 2	35,412 8 0

"The result thus secured," writes Mr. Krishnamachariar, "is not due to an enhancement of any previous scale of prices, but simply to the continued efforts made on our part to diminish the cost of production, or in other words, to the reduction in the prices paid for printing paper and in the rates of charge for printing and binding, brought about by an increased competition among the local printers. This is the more satisfactory as the quality of printing and binding work has of late improved instead of being affected injuriously by such reduction."

Twenty-seven books were printed during the year, of which 4 were in English or Anglo-Vernacular, 10 in Tamil, 9 in Telugu, 2 in Canarese, and one each in Malayalam and Hindustani. Four of these were new works: Johnson's Rasselas in Tamil, the Anglo-Canarese First Reader, the Teacher's Hand-book to the same, and the Hindustani version of Duncan's Geography.

It will be seen from the table given in the margin that there has been an unusually large increase in the number and value of books and maps purchased both locally and in England. Comparing the net value of the supplies received with the value put on them at Depôt prices, the account gives a profit of 40 per cent. against 42½ of the previous year.

Years.	Copies.	Prime Cost.	Value at Depôt Prices.
		Rs. A. P.	Rs. A. P.
1876-77 ..	78,459	24,612 9 6	35,312 6 2
1877-78 ..	97,651	30,867 6 5	43,231 13 2

"This decline," remarks the Curator, "is due in part to the unfavorable state of foreign exchange consequent on the continued depreciation of the silver currency of this country, and partly to our resolution to keep down the prices of books, &c., so far as the interests of local trade would permit."

The year under review is remarkable as being the last in which books and maps required from England had to be imported through the agency of the India Office and Messrs. Allen and Co. On the costliness of this system and on the better prospects for the future the Curator has the following remarks:—

"An abstract of this year's transactions connected with the India Office supplies is given in the margin; and it appears from these figures that the financial result has been even more unfavorable than in previous years. The Depôt value put on the supplies at the usual sanctioned rates gives a profit of Rupees 7,057 and odd, or nearly 43 per cent. over invoice prices, which is much the same as the percentage for last year, and the loss by exchange and freight, &c., charges debited against this department, have actually brought down the nominal discount of 25 per cent. allowed by Messrs. Allen and Co. to something like 13½ per cent., which is the lowest recorded since the introduction of the system of getting out books from the English market. The various disadvantages attending the present plan of obtaining our supplies through the agency of the India Office have long attracted the attention of the department, and have been more than once brought to the notice of Government. Just before the close of the year I had the honor of receiving an order of Government to the effect that all school books should in future be procured without the intervention of the Secretary of State, and requiring me to suggest a different arrangement for securing future supplies from

Supply of Books and Maps from England.

	Rs. A. P.
1. Prime cost of English Books, &c. imported during the year 1877-78.	16,462 14 9
2. Value of the above at Depôt prices.	23,520 0 0
3. Do. at the published prices ...	19,063 4 2
Difference between 1 and 2	7,057 1 3
Do. between 2 and 3	4,456 11 10

Europe or America ; and in reply I recommended, after due enquiry and consideration, the expediency of restoring to Messrs. F. P. Baker and Co. the former agency for the supply of books to this department, they having worked admirably during the period that they were entrusted with our orders, and having now offered far better terms than any that could be secured from the leading booksellers in Madras or any other dealer in London. The re-appointment of Messrs. Baker and Co. as our agents has since been sanctioned, and arrangements are now in progress for obtaining supplies through that London firm on the same terms as those agreed to by the Bombay Government, and I am sanguine that if adopted, they will benefit the Government financially and benefit the schools at the same time."

In the following abstract the quantity and value of the books sold during the year are classified according to the languages in which they are printed :—

Languages.	Copies.		Depôt Value.					
	1876-77.	1877-78.	1876-77.			1877-78.		
			Rs.	A.	P.	Rs.	A.	P.
English	51,854	47,326	27,874	5	0	28,879	11	2
Tamil	160,528	125,073	19,025	8	8	17,010	8	4
Telugu	83,430	99,463	13,313	14	6	11,951	2	8
Malayalam	11,016	11,961	2,098	5	0	2,759	13	6
Canarese	10,248	7,434	1,959	4	6	1,300	7	0
Uriya	3,215	1,812	696	12	6	238	2	8
Hindustani	2,421	2,063	457	1	6	477	5	9
Sanskrit	238	164	122	15	0	62	0	6
Persian	1	...	0	2	6	...		
Total ...	322,951	295,296	65,548	5	2	62,678	14	2

It will be observed that on the whole there is a falling off both in the number and value of the books, &c., sold; Malayalam is the only language which shows an advance both in the number of books sold and in their value. The sales to Local Fund Boards amounted to Rupees 10,960-7-7 against Rupees 14,746-14-10 of the previous year : this very serious decline being no doubt due to the famine, as the falling off is most apparent in the districts of South and North Arcot, Chingleput, Salem, Coimbatore, Nellore, and Cuddapah. In Bellary, strange to say, there is a small increase, but Tanjore, Malabar and Kistna are the only districts in which the advance is marked, and in the case of the last-mentioned the advance is only apparent, because there happened to be no sales at all to the Local Fund Board in the previous year. The following statement summarizes the financial results of the year : as already stated a small profit has been realized, and everything seems to show that the Book Department has been administered by Mr. Krishnamachariar with his usual care and ability.

Translator.

103. The Tamil Translator who works under the supervision of the Professor of Vernacular Literature was mainly engaged last year in the compilation of a Tamil-English Classical Dictionary, a work of considerable labor, but he also finished his version of Smiles' "Self-Help," and corrected the proofs of various Tamil works passing through the press.

Madras School Book and Vernacular Literature Society.

104. The report of the Madras School Book Society shows a comparatively small amount of work done during 1877, the reason, in many cases, being that the Society was afraid to bring out large editions of certain works for fear of their approaching supersession by the books now under preparation. One of the most successful has been the revised edition of "Morris' History of India" in Tamil; the first issue was rapidly exhausted and a second edition called for. Several little manuals, taken from the Short Account of the Madras Presidency, and consisting of the introduction and one district, have been published in Hindustani, and one in Malayalam; but they do not seem to have met with the expected sale. The translations of "Lamb's Tales from Shakespeare" are continued, the latest issues being the Merchant of Venice in Telugu and Cymbeline in Tamil; corresponding to these are the stories taken from Sanskrit dramas, such as "Sakuntala" and "Ratnavali," both in Tamil and in Telugu, which seem to be appreciated by the public, as there is a fair though not extensive demand for them. The largest work which the Society has now in hand is the Telugu Dictionary alluded to in last year's report. It has made considerable progress during the year and will, it is hoped, be completed in about a year's time. This work is a heavy expense to the Society and is not likely to repay the outlay upon it for many years to come, so that, although the Society still holds Government securities to the amount of Rupees 25,000 and has a small cash balance besides, the prospect for the future is not very bright, as it is certain that the main sources of profit will be dried up

when the new Readers and other school books come into use. It must always be remembered that a large number of the Society's publications are not intended to bring in profit, but are printed and issued at a very low price, in order, if possible, to create a taste for useful and amusing prose vernacular literature. The Society's magazine "Janavinodini," issued both in Tamil and Telugu, continues to flourish under the able management of Mr. Krishnamachariar, the Honorary Editor. The number of subscribers fell off a little during 1877, as might naturally be expected, but is now increasing again. The editing of the vernacular classics mentioned last year has gone on rather slowly owing to various hindrances, but the Balakandam of the Tamil Ramayanam has been completed and the Ayodhyakandam commenced.

Library of Oriental Manuscripts.

105. Dr. Oppert submits the following report on the work done in the Manuscript Library under his care :—

"The Catalogue of the Sanskrit Manuscripts has been revised preparatory to its being sent to press.

"The Index to the local Records has been finished and printed. It will soon be issued.

"Up to the end of March lists containing the names of about 2,500 Sanskrit manuscripts have been forwarded to me.

"The Library was every day—Government holidays excepted—open to the public, and 403 persons have during the last year consulted the manuscripts deposited in the Library."

Revision of Malayalam and Canarese School Books.

106. The Madras Committee for the Revision of School Books dealt only with those written in English, Tamil and Telugu; but separate committees were appointed on the Western Coast, with Mr. Garthwaite as their president, to report upon Malayalam and Canarese school books. Though a considerable time has now elapsed, no report has as yet been received from either of these committees.

XII.—General Statistics.

Number of Schools and Scholars.

107. It will be seen from the statement given below that there has been a very serious decline in the number of schools and scholars connected with the department, the former having fallen from 10,121 to 9,143, and the latter from 287,948 to 255,809. The whole of the decrease apparently both in schools and scholars is due to Lower Class Boys' Schools; but looking at the increase under the head of Mixed Lower Class Schools, and the small comparative decline among the scholars attending them, I am inclined to believe that, as in former years, a good many schools reckoned as boys' schools in former returns have this year been described as mixed schools; thus the falling off in boys' schools looks greater than it is, while the decline in mixed schools is greater than it looks. That the famine is the great cause of this check to the development of elementary education I have already expressed my belief, but that it is anything like the sole cause I do not feel so sure. The table shows a positive increase in all the other departments: the College Department has advanced by 69, the Upper Department by 470, and the Middle by 588; it is only when we come to the Lower Department that we encounter this unprecedented decline. I fear that it

will be found, even after the distress has passed away, that Lower Class Schools under inspection will not be as numerous or as well filled as they once were; and that higher standards, combined with reduced grants, will greatly thin the ranks of "schools under improvement." Turning to schools of a higher stamp the outlook is more encouraging. Middle Class Schools are fewer by ten than they were a year ago, and there are 300 fewer scholars in their middle classes, but Colleges and Collegiate Schools have added 421 pupils to their rolls, and Higher Class Schools 1,115. The increase of one under Arts Colleges and Collegiate Schools, and the same decrease under Normal Schools have been caused by the transfer of the Church Mission Society's Institution, Palamcottah, from the latter to the former class. The increase under Higher Class Schools is due to the raising of certain Taluk and other schools from the Middle Class, and the decrease under Middle Class Schools is due partly to the same cause and partly to some schools having been reduced to the Lower Class. It will be observed that there are no girls' schools of the higher class; this, however, is rather a matter of classification than of fact, the Doveton Girls' School being reckoned as a Mixed School, and two or three other schools in Madras doing higher class work being still counted as Middle Class Schools.

The next table divides the schools into four great classes and shows the increase and decrease under each head. Of increase indeed there is nothing as far as the number of schools is concerned, though institutions under the direct management of the department show an increase of 676 pupils. Of decrease there is a great deal, especially in unaided schools, to which half the falling off, both in schools and scholars, is to be attributed. The number of schools under the Educational Department remains the same as last year:—

Distribution of Schools by Divisions and Districts.

108. The next table shows the distribution of schools by Divisions and Districts. Eight districts out of twenty-one have increased the number of their schools, and seven the number of their pupils, but only two of them, Godavari and Tanjore, have made any progress worth mentioning, and it is interesting to observe that these districts are most famous for the extent to which irrigation has been carried on. This seems to be another indication of the influence that the famine has had upon education, as the distress in these districts must have been slight as compared with what was experienced elsewhere. Madura, too, appears to have added largely to its schools, and also, but in a smaller degree, to its scholars; but I am inclined to think that this is rather a matter of account than anything else. Last year there was in this district a very large decrease in the number both of schools and scholars, and this violent fluctuation is probably mainly due to schools under improvement—a class of schools, I need hardly remark, very liable to vary with the greater or less amount of energy displayed by individual Deputy Inspectors and Inspecting Schoolmasters. The greatest positive loss is in South Arcot, where the number rises to upwards of eight thousand, while the greatest proportional loss is in Cuddapah, which has lost nearly half its pupils. The falling off in Tinnevelly, North Arcot, Bellary, Nellore, and

Coimbatore is also very serious, and the total net deficiency amounts to nearly 1,000 schools and upwards of 32,000 scholars.

Area and population compared with extent of education.

110. The following table compares the area and population of each division and district with the number of pupils under instruction in schools connected with the department. It is a curious fact that though by the recent changes already referred to the Sixth Divisionhas gained and the First Division has lost a whole district, yet the Sixth Division has fallen from second to third in the list, while the First Division has advanced from fifth to fourth. The development of education in the three most northern districts is remarkable; only three years ago the First Division was at the bottom of the list, now it has passed the Second and Fourth Divisions, and it is quite possible that next year it will be on a level with the Sixth. It is in fact the only division which has advanced during the year. The Second and Fourth Divisions have fallen off most, and the former is, and is likely to remain, much behind the others. It must, of course, be recollected that its area is now the largest of all and that its population is comparatively scattered, though not more so than that of the First. As to individual districts Madras, Nilgiri and Tinnevelly retain their places at the head, Tanjore and Vizagapatam have each gained three places, and Kistna and Madura two; while South Arcot has lost four places, and North Arcot and Cuddapah three; the remaining districts are stationary or nearly so.

Schools in Municipalities and Local Fund Circles.

111. From a table given in the appendix it will be seen that the number of schools in Municipalities has risen from 1,206 to 1,272, and the number of scholars from 70,750 to 72,915. In Local Fund Circles the number of schools has fallen from 8,915 to 7,871, and the number of scholars from 217,198 to 182,894. A list is given in the margin of the more important towns in which the number of pupils under instruction exceeds a thousand. It will be seen that no town named in last year's list has fallen out of it, and that one town (Vizianagram) is added to the roll. Gooty is saved from the ignoble position given it in last year's report by the appearance of Mettapolliem, with its one school and 34 pupils, as the smallest of Municipalities.

Race and Sex of Pupils.

112. The following table shows the race and sex of the pupils under instruction. Taking boys and girls together, there is a decrease of 30,000 under the head of Hindus; Mahomedans and Pariahs have also decreased in much the same ratio; but there are small increases under the heads of Native Christians, East Indians, Europeans, and Parsees. In the case of the three former the proportion of population to one pupil compares unfavorably with the statement of last year, but in the remaining classes there is a slight improvement.

Race.	1876-77.			1877-78.			Population.	Proportion of Population to one Pupil.	
	Boys.	Girls.	Total.	Boys.	Girls.	Total.		1876-77.	1877-78.

113. The table in the margin shows the number of boys and girls studying different languages. Pupils who study more than one language are entered under two or more heads. Among the boys all the leading languages show a decrease more or less serious; the only exceptions in fact to the general decline are Sanskrit and Persian, but the increases here are hardly large enough to justify hopes of a classical revival. Among the girls, on the other hand, all the leading languages except Malayalam show an increase; of the less generally cultivated languages Uriya, Arabic and Latin have advanced, while Sanskrit, Hindustani, French and Portuguese have receded, the last-named to zero. Persian also is a language which is utterly neglected by girls.

114. The following table shows the amount raised in school fees during the last decade. It is arranged on the principle described in last year's report, giving separate columns for institutions under Government, Institutions under the management of Local Fund Boards and Municipalities, and Private Institutions.

School Fees.

Years.	Government Institutions.			Institutions under the management of Local Fund Boards and Municipalities.			Private Institutions.			Total.		
	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.

The receipts from Government schools have been practically identical for the last three years, and this is fairly satisfactory considering all the circumstances of the case; the fees collected in Local Fund and Municipal schools have lost the advance they made last year and returned to the level of 1875-76; while the fees obtained in private

schools have decreased by 75,000 Rupees and are below the figure reached in 1873-74. The former, however, is a decline in appearance rather than in fact, for it arises from the transfer of certain schools, formerly regarded as Local Fund Board schools, to the class of private institutions, but for which circumstance Local Fund schools would probably have shown a slight increase; similarly the decline under private institutions would have been greater than it is but for the sums contributed by the schools so transferred.

The following table shows the average fee in these three classes of schools for the first and last years of the decade 1868—1878: the fee is calculated both according to the average number on the rolls and according to the average daily attendance. It is a remarkable fact that while in Government schools pupils pay nearly twice as much as they did ten years ago, in private institutions the average fee remains as near as possible the same. In Local Fund and Municipal schools the fee is still very low, but it seems to have a slight tendency to rise.

Year.	Average Fee according to average number on the rolls.			Average Fee according to average daily attendance.

The Committee appointed by Government to revise the then existing scale of school fees presented its report in February 1877 and orders were passed upon it in May following; by this order the new rates were approved and came into force on the 1st January 1878. The sanctioned scale is as follows:—

Nomenclature of Classes.	Madras.						*A.* Mofussil Towns of the First Grade.						*B.* Mofussil Towns of the Second Grade.						*C.* Mofussil Towns of the Third Grade.						Remarks.

According to the system in force from September 1871 to January 1878 there were four distinct rates of fee: schools being classed (1) as Government or Private; (2) as Madras or Mofussil schools; according to the present system it will be observed that there are eight rates, the mofussil towns being arranged in three grades, according to their supposed importance, wealth or educational advantages. The committee were far from unanimous, as appears from the various dissenting notes attached to the report and recorded in the order of Government, and the somewhat arbitrary classification given above is one result of that difference of opinion. Apart, however, from the vexed question of the different rates prescribed for Government and aided schools, of which Government officers to a man disapprove, and which some managers of aided institutions also condemn, I am not aware of any great discontent with the new rates, except in the case of Srirangam, which has already been brought to notice. The new rates have produced a considerable increase in the fee receipts from Government Colleges and Collegiate Schools; but in Higher and Middle Class Schools the receipts are almost the same as last year, owing to the loss of strength in some of those institutions and the partial lowering of rates in a few others. From a return before me comparing the receipts of the first quarter of 1878-79 with the corresponding quarter of the previous year, it appears that there is an increase of nearly 4,000 Rupees in Government schools of all the four classes taken together, and if the schools are fairly prosperous for the remainder of the year, a total increase of about 15,000 Rupees may be expected from this source.

Percentage of Fees to Cost.

* The Local Fund Schools at Saidapet and Palghat having been converted into Government Zillah Schools during the year, no entry is made under the head "Average Cost to Government per Pupil."

In former years Aided colleges have shown a higher percentage of fees to cost than Government colleges, but this year the Government colleges have just managed to get the advantage of the aided ones, the difference being ·1 per cent. The Law Class of the Presidency College does not appear to be quite self-supporting, though in reality it more than pays its expenses; the cause of this is that the Morehead scholarship is given here as a charge, but of course the proceeds of the endowment are credited elsewhere. The middle departments of colleges are more than self-supporting, though not quite to the same extent as last year. In private institutions no department is self-supporting in any class of school. In Higher-Class schools all the percentages are in favor of Government institutions, and the same is true of purely departmental schools of the Middle class, though Local Fund and Municipal schools show lower percentages than private schools. In Lower-class schools the advantage is as usual with private institutions, but as was remarked last year the returns from village schools can hardly be accepted as trustworthy, and the high percentage may therefore be partly fictitious. It is to be observed, however, that this high percentage is going down year by year, perhaps because the returns get gradually more and more approximately correct.

The cost to Government is naturally generally greater in Government than in Aided schools, but there are two exceptions; in the Middle Department of Government colleges boys yield a profit, while in Aided schools each boy costs Rupees 6-9-1, and in the same department of Higher-class schools the cost is Rupees 6-1-1 in Government and Rupees 9-0-9 in Aided schools.

The next table compares the percentage of fees to total cost in individual Government and private Colleges and Collegiate schools:—

Noble High School	Masulipatam ...	9·1	30·1	54·6	29·	25·7

In last year's report it was stated that all but six institutions had retrograded; on this occasion, on the other hand, I am able to report that all but five have advanced, one, the Provincial School at Mangalore, remaining stationary. The higher rates of fee introduced on the 1st of January are the principal cause of this advance. The retrograding institutions are Rajahmundry, owing to the increased cost of the staff, which will be felt still more next year, the Doveton College, which has fallen off in numbers, Bellary Provincial School and St. Joseph's College, Negapatam, owing to the same cause. No Government institution of this rank has a lower department: in aided institutions the percentages range from 16·6 at Palamcottah to 107·6 at Coimbatore, at which a fair margin of profit is obtained from this department. The middle department in Government schools is generally self-supporting, the only exceptions being the Presidency College and the Provincial School, Bellary. At Mangalore, where the middle department is exceptionally strong, the receipts from this source nearly double the cost. In aided institutions on the other hand, the middle department is self-supporting only at Trichinopoly. Combaconum College stands alone in having a self-supporting higher department, and Rajahmundry College is not far behind. The highest percentage for the higher department in aided institutions is 70·3 at Tanjore, and the lowest 14·9 at Palamcottah. College Departments cannot possibly support themselves or even make an approach to doing so, but here again Combaconum stands at the head of the list with a percentage of 29·4, the Madras Christian College ranking next with 27 per cent. The lowest in this list is the Provincial School, Bellary, with 4·7 per cent., the college department in that institution having fallen to a very low ebb. Taking all the institutions together, only four out of the whole number—two Government and two private—pay more than a fifth of their college expenses.

The following table compares the percentage of fees to total cost in individual Government and private schools of the higher class:—

The percentages in Government schools range between 82 5 and 31 1 against 66 5 and 32 8 of last year. The Anglo-Vernacular schools recently made Higher-class schools are the cause of this advance. In aided schools the percentages vary from 98·1 to 7·7 against 88·4 and 7. The Town school, Combaconum, is all but self-supporting, and might well dispense with State aid as soon as its new building is completed. This school excels all the Government schools in proportion of fees to total cost; but, as a general rule, the advantage lies with the Government institutions, as even the lowest in the Government list, Kurnool, would have fourteen schools below it if placed among the aided institutions. As to the cost of particular departments, the Town school at Combaconum shows a profit both in the middle and lower schools, the Government Anglo-Vernacular school, Tiruvalur, in the lower school only, and the Hindu Anglo-Vernacular schools at Palamcottah and Viraragavapuram (Tinnevelly) in the middle school only.

The following is a list of Middle-class schools, in which the income from fees exceeds half the expenditure. It compares very unfavorably with the corresponding list last year. The Anglo-Vernacular schools at Tiruvádi and Tiruválur are removed from it, as they are now ranked with Higher-class schools, and the percentages of the other schools are, as a general rule, lower than they were. The number of schools also, both Government and private, is less than it was in 1876-77. The Presentation Convent school is worked with very little expense as will appear in the next table; hence the high percentage of fees to cost. The Muthialpet school under native management may be considered self-supporting:—

Government Schools of the Middle Class.	Percentage of Fees to Total Cost.	Aided Schools of the Middle Class	Percentage of Fees to Total Cost
Town School, Berhampore .	61 5	Presentation Convent Special School, Black Town (Girls')	187 7
Taluk School, Badakarai	59 5	Anglo-Vernacular School, Muthialpet	99 7

		Hindu Anglo-Vernacular School, Karur	51 2
		Anglo-Vernacular School, Calacad .	50 9
		Govindu Naidoo's Primary School, Black Town.	50·3

116. The following is a list of schools aided on the Salary Grant system, in which the fees and Government grant-in-aid exceed the total expenditure. Eleven schools of last year's list do not appear in this, and only eight new schools are added, so that the list is shorter by three schools. The profit made by some of the schools is however larger than it was last year, notably in the case of the Town school, Combaconum, and the S.P.G. schools at Trichinopoly and Tanjore:—

Salary Grant Schools in which the Receipts from Government and from School Fees exceed the Expenditure.

117. The usual list of salary grants will be found in the Appendix. The following statement shows the distribution of these grants among the several educational divisions. Owing to the great changes that have taken place in the areas of the divisions nothing need be said with regard to the increases and decreases noted in the last two columns of the statement:—

Salary Grants.

Divisions.	Salary Grants drawn in 1876-77.	Salary Grants drawn in 1877-78.	Increase.	Decrease.
	RS. A. P.	RS. A. P.	RS. A. P.	RS. A. P.

Expenditure on Educational Buildings.

118. The subjoined table gives the expenditure from the Educational Building Fund during the past year. Under the head of repairs less than usual has been spent, but the cost of Original Works has been considerable. The most important of them are noted below:

Description of Works.	Expenditure during 1877-78.
	RS. A. P.
The Senate House	42,392 8 7
Anglo-Vernacular School, Ongole ...	4,844 14 5
Provincial College, Rajahmundry ...	4,767 0 9
Zillah School, Berhampore	2,989 2 2
Laboratory, Presidency College	2,986 14 8
Taluk School, Anakapalle	2,526 5 9
Normal School, Trichinopoly	2,400 0 0
Taluk School, Dharmapuri	1,739 8 1
Provincial College, Combaconum ...	1,051 7 0
Total ...	65,697 12 5

Expenditure by the Public Works Department.		Expenditure other than by Public Works Department.	
	RS. A. P.		RS. A. P.
a. Repairs	5,098 6 8	*a.* Repairs to Government buildings.	...
b. Minor works up to Rupees 1,000.	3,431 4 1	*b.* Minor Government buildings ...	...
c. Larger works above Rupees 1,000.	65,697 13 5	*c.* Minor grants-in-aid (Rs. 1,000 and under).	3,482 3 6
d. Supervision ...	18,556 14 2	*d.* Larger grants-in-aid (above Rupees 1,000).	25,440 4 5
e. Tools and Plant ...	1,855 11 1		
Total ...	94,640 1 5	Total ...	28,922 7 11

Under the head of Grants-in-Aid the most noticeable works are the following:—

Description of Works.	Amount of Grant paid.		
	RS.	A.	P.
S.P.G. High School, Trichinopoly	7,350	0	0
Breeks Memorial School, Ootacamund ...	4,020	4	5
Free Church Mission School, Nellore ...	4,000	0	0
Baptist Girls' School, Nellore	3,000	0	0
Presentation Convent School, Madras ...	2,875	0	0

Subscription School, Tuticorin	1,450	0	0
Lines Caste Girls' School, Ellore	1,195	0	0
Total ...	25,440	4	5

The capital at the beginning of the official year was Rupees 3,09,500, and there was a balance of Rupees 35,950-4-0. Interest accrued during the year to the amount of Rupees 11,073-3-7, but as the total charges amounted to Rs. 1,23,562-9-4, the capital was diminished by 1,06,000, and stood on the 31st March last at Rupees 2,03,500 with a cash balance of Rupees 32,408-11-11. At the present rate of expenditure the capital of the fund will disappear in two or three years, but it has lately been suggested by Colonel Macdonald that the cost of Government buildings only should be defrayed from this fund in future, building grants being made from the general allotment for grants-in-aid:—

Abstract of Receipts and Charges of the Educational Building Fund for 1877-78.

Receipts.	RS.	A.	P.	Charges.	RS.	A.	P.
Balance on 31st March 1877.	35,950	4	0	Original works ...	69,129	1	6

Grand Total of General and Special Instruction.	10,50,562	6,65,925	10,81,707	17,47,632	27,98,194	...

This table may be summarized as shown in the margin. The only item in which there is any change worth noticing as compared with the corresponding figures for last year is the percentage for primary instruction which has fallen nearly 3 per cent., owing, no doubt, to the diminished numbers in primary schools. The cost of secondary instruction on the other hand has advanced 1 per cent., and minor increases will be found under all the other heads except superior instruction in Law, Medicine, &c., Normal schools, and Scholarships.

Superintendence	10·30
General Instruction.	
Superior instruction	6·34
Secondary do.	22·91
Primary do.	45·75
Miscellaneous	7·29
Special Instruction.	
Superior instruction in Law, Medicine, and Civil Engineering.	·48
Secondary instruction in Professional Colleges and Technical Schools.	4·14
Normal Schools	2·18
Scholarships	·61

126. By G.O., of the 5th March last, No. 86, a most important change was introduced in the Graded Educational Service. The principle of grading salaries instead of appointments, sanctioned by the Government of India in 1873, was adopted, and officers will in future be promoted on the principle of seniority tempered by selection, irrespective of the appointments held by them. On the former plan three out of the four best appointments of the service were assigned to Inspectors, so that three out of six Inspectors were always at the head of the service, while out of the eight Principals and Professors only one, the Principal of the Presidency College, was in that favored position. This inequality has now been removed in principle, and, as the senior Inspectors retire from the service, will cease in practice.

Graded Officers.

I have the honor to be,

Sir,

Your most obedient servant,

EDMUND THOMPSON,

Acting Director of Public Instruction.

OFFICE OF THE DIRECTOR OF PUBLIC INSTRUCTION,
MADRAS, *5th October* 1878.

APPENDICES.

TABLE I.
